## Space Investigation Level 1:

**The Parameter Space Investigation Method Toolkit** Roman Statnikov, Alexander Statnikov, 2011 The Parameter Space Investigation PSI method was developed to help engineers with a wide range of multicriteria optimization problems such as design identification design of control systems and operational development of prototypes This unique resource shows you how to use PSI to construct a feasible solution set without limitations on the number of parameters and criteria The book presents visualization tools that are used to construct the feasible solution set conduct multicriteria analysis and correct the initial problem statement You explore topics that have not been covered in any other books including multicriteria analysis from observational data multicriteria optimization of large scale systems in parallel mode adopting the PSI method for database searches and interpretation of the prototype improvement problem The book also offers guidance in understanding and using the accompanying newly released MOVI software package [Empirical Investigations of Social Space](#) Jörg Blasius, Frédéric Lebaron, Brigitte Le Roux, Andreas Schmitz, 2020-01-07 This book provides an in depth view on Bourdieu s empirical work thereby specially focusing on the construction of the social space and including the concept of the habitus Themes described in the book include amongst others the theory and methodology for the construction of social spaces the relation between various fields and the field of power formal construction and empirical observation of habitus the formation accumulation differentiation of and conversion between different forms of capital relations in geometric data analysis The book also includes contributions regarding particular applications of Bourdieu s methodology to traditional and new areas of research such as the analysis of institutional international and transnational fields It further provides a systematic introduction into the empirical construction of the social space *Integrated Technology Plan for the Civil Space Program* United States.
