

Stargazing

SPACE EXPLORATION is the greatest scientific adventure of all. In the 1950s, after centuries of stargazing, scientists took a leap into the sky. They sent the first satellite into orbit. Soon, space probes and human flights were revealing more and more about the Moon, planets and stars.

1 Galileo's discoveries

In 1609, Italian astronomer Galileo pointed his telescope at the night sky. He discovered that the Moon's surface was covered with craters and mountains and was the first to see clearly the separate stars of the Milky Way.

2 Dione by mirrors

Galileo's telescope used mirrors designed as spherical lenses. It collected light from objects, which made the image clearer. Mirrors were used to collect light from objects and reflect it back to the eye.

3 On a stand

The telescope was mounted on a stand. It was made of metal and was used to observe objects in the sky. The stand was made of wood and was used to hold the telescope steady.

4 Dished up

Before it was built, there were many different designs for telescopes. Some were made of wood and some were made of metal. They were used to observe objects in the sky. The telescope was made of metal and was used to observe objects in the sky.

5 The Hubble Space Telescope

The telescope orbits the Earth. Because it is above the Earth's atmosphere, it can see things that ground-based telescopes cannot see.

Spaces of Geographical Thought Paul Cloke, Ron Johnston, 2005-01-26 Spaces of Geographical Thought examines key ideas like space and place which inform the geographic imagination The text discusses the core conceptual vocabulary of human geography agency structure state society culture economy space place black white man woman nature culture local global and time space explains the significance of these binaries in the constitution of geographic thought and shows how many of these binaries have been interrogated and re imagined in more recent geographical thinking A consideration of these binaries will define the concepts and situate students in the most current geographical arguments and debates The text will be required reading for all modules on the philosophy of geography and on geographical theory

Digitally Disrupted Space Anastasia Panori, 2024-02-15 Digitally Disrupted Space Proximity and New Development Opportunities for Regions and Cities develops an analytical framework of the key structural elements in relation to digital space and its impact on existing spatial interactions at a regional and urban level It puts forth the argument that digital space is a new form of space acting complementary to existing spatial structures and creating novel interactions between and or within them It explores how digital space enhances connected intelligence by combining knowledge intensive activities cooperation between organisational and institutional actors and smart environments of knowledge creation and diffusion Readers will better understand the connections between digital transformations and traditional paths of regional development as well as

underlying mechanisms fostering externalities and proximity emergence triggering effective collaboration between the digital and other expressions of space The first set of chapters Part I focuses on space disruptions in a digitalising world The key notions of space and digital space are defined alongside the main concepts that form it in relation to space dynamics space connectors and space routines The following group of chapters Part II discuss aspects related to the digital space reshaping transition processes exploring the role of digital space under the multi level perspective and the digital space in the forefront of twin transition Finally the last three chapters Part III focus on digital space challenges and opportunities for regional development A specific focus is given in three key areas of regional development and the ways in which digital space can enhance them including Productivity Resilience and Inclusion Academics and researchers will find insights into how cities and regions can adopt this new developmental paradigm how to organise connected intelligence within regional and urban environments and how to sustain productivity resilience and inclusion through the use of digital space Digital transformation managers in the public sector and entrepreneurs in private organisations can leverage the opportunities offered from this transition process not only by identifying actions and strategies for boosting their productivity but also for making them more resilient during socio economic environmental and health crises And professionals and policymakers in urban and regional development will find concrete guidance about the design development and management of the digital space and the creation of connected intelligence environments at the urban and regional level Thoroughly analyzes the role of digital space to complement existing structures and generate new interactions and networks revealing the digital elements that are essential for the rise of new dynamics connectors and routines Positions the digital space emergence under the framework of a multi level transition perspective shedding light on how digital space reshapes transition processes Explores the potential challenges and opportunities arising from the emergence of the digital space for regional development

Retailising Space Prof Dr Mattias Kärrholm, 2013-06-28 Over the past few years there has been a proliferation of new kinds of retail space Retail space has cropped up just about everywhere in the urban landscape in libraries workplaces churches and museums In short retail is becoming a more and more manifest part of the public domain The traditional spaces of retail such as city centres and outlying shopping malls are either increasing in size or disappearing producing new urban types and whole environments totally dedicated to retail The creation of these new retail spaces has brought about a re and de territorialisation of urban public space and has also led to transformations in urban design and type of materials used and even in the logic and ways through which these design amenities meet the needs of retailers and or consumers This book describes how the retailisation of public domains affects our everyday life and our use of the built environment Taking an architectural and territorial perspective on this issue it looks specifically at how retail and consumption spaces have changed and territorialised urban life in different ways It then develops a methodology and a set of concepts to describe and understand the role of architecture in these territorial transformations
