Information, Communication, and Space Technology

Mohammad Razani,2017-12-19 Many books have covered the rapidly evolving fields of information and communication technology ICT and space technology separately However no single book has ever focused on how the integration of these two areas is creating a stronger platform for various scientific advancements including some research work that cannot be performed on Earth To fill the void Information Communication and Space Technology provides a novel illustration of that connection Dividing content into sections that cover ICT existing and future space technologies and satellites the author demonstrates the individual and combined power of each of these parts of the overall system He explores how the combination of concepts from each of these interrelated fields is creating massive potential for broader advances in areas such as robotics communications navigation agriculture health care and nanotechnology The book introduces particular potential innovations including rocket less spacecraft launches and development of a global system to balance energy distribution by using satellites that would collect solar energy and transmit it via microwave beams to different locations around the world Equally useful to students and professionals this work is a culmination of the domestic and international experience that the author has acquired throughout more than three decades as an instructor and researcher Emphasizing the strong need to incorporate ICT and space technology into the general university curriculum the book starts with basic explanations of key concepts and theories building toward more concrete application oriented examples that reveal the importance and impact of new technologies This includes coverage of how satellites transfer voice video and other data across continents as well as techniques used to obtain very high resolution images from space for use in agricultural and environmental sciences This timely work employs a logical practically structured approach that will help readers to better understand existing and emerging ICT and space technologies including the most recent developments and achievements in the field
