**A Feature-Centric View of Information Retrieval** Donald Metzler,2011-09-18 Commercial Web search engines such as Google Yahoo and Bing are used every day by millions of people across the globe With their ever growing refinement and usage it has become increasingly difficult for academic researchers to keep up with the collection sizes and other critical research issues related to Web search which has created a divide between the information retrieval research being done within academia and industry Such large collections pose a new set of challenges for information retrieval researchers In this work Metzler describes highly effective information retrieval models for both smaller classical data sets and larger Web collections In a shift away from heuristic hand tuned ranking functions and complex probabilistic models he presents feature based retrieval models The Markov random field model he details goes beyond the traditional yet ill suited bag of words assumption in two ways First the model can easily exploit various types of dependencies that exist between query terms eliminating the term independence assumption that often accompanies bag of words models Second arbitrary textual or non textual features can be used within the model As he shows combining term dependencies and arbitrary features results in a very robust powerful retrieval model In addition he describes several extensions such as an automatic feature selection algorithm and a query expansion framework The resulting model and extensions provide a flexible framework for highly effective retrieval across a wide range of tasks and data sets A Feature Centric View of Information Retrieval provides graduate students as well as academic and industrial researchers in the fields of information retrieval and Web search with a modern perspective on information retrieval modeling and Web searches

**Space: Views from the Hubble Telescope Calendar** Pomegranate Communications, Inc,2002-12-01 First deployed in 1990 the Hubble Space Telescope is still delighting us with awe inspiring images sent from 380 miles above the earth It continues to educate opening the book of the universe to our amazed eyes Each of the twelve images within this calendar is explained in detail and daily grid entries highlight important events and achievements in the history of space exploration Witness the formation of a star observe the heavenly formations of nebulae and consider the celestial beauty of the galaxies

**The Universe** Leo Marriott,2011-12-17 Humans have always been fascinated by what can be seen at first with the naked eye and then with larger and more powerful telescopes Now with satellite images from space there is a new dimension to star gazing The Universe starts with an examination of the history of astronomy from the earliest times Next follows a brief history of the Hubble Space Telescope and the technology that supports its sensor package Beautiful majestic full color photographs illustrate this book and reveal the mysteries of the night sky to readers Illustrations also help to describe the processes that keep the Universe going and growing and the technology humans use to view these

processes and their outcomes The Universe also contains portraits and the stories of the men and women that have advanced the science of astrology A glossary of terms provides a helpful resource for readers who want to know more about the complex technology , *Hubble Revisited* Daniel Fischer,Hilmar Duerbeck,2012-12-06 Arguably the single most successful scientific instrument ever built the Hubble Space telescope continues to dazzle In recent months it has discovered the most distant known galaxy and the most massive known star and has been at the front lines of all the most pressing questions in astrophysics the age of the Universe the nature of gamma ray bursters the discovery of extrasolar planets In *The Discovery Machine* the authors of the widely acclaimed *Hubble A New Window to the Universe* bring you an exciting detailed gorgeously illustrated account of Hubble s breathtaking new discoveries Acclaim for *Hubble A New Window to the Universe* Wonderful to behold Buy it and feast your eyes *Scientific American* A wonderful volume a clear and insightful explanation is included for each and every image *The Planetarian Breakthrough!* Robert Gendler,R. Jay GaBany,2015-11-05 This unique volume by two renowned astrophotographers unveils the science and history behind 100 of the most significant astronomical images of all time The authors have carefully selected their list of images from across time and technology to bring to the reader the most relevant photographic images spanning all eras of modern astronomical history Based on scientific evidence today we have a basic notion of how Earth and the universe came to be The road to this knowledge was paved with 175 years of astronomical images acquired by the coupling of two revolutionary technologies the camera and telescope With ingenuity and determination humankind would quickly embrace these technologies to tell the story of the cosmos and unravel its mysteries This book presents in pictures and words a photographic chronology of our aspiration to understand the universe From the first fledgling attempts to photograph the Moon planets and stars to the marvels of orbiting observatories that record the cosmos at energies beyond the range of human vision astronomers have always relied on images to break through to the next level of understanding A subset of these breakthrough images has profound significance in documenting some of the greatest milestones in modern astronomy **Jacaranda Science 10 for Western Australia, 5e LearnON and Print** Jacaranda,2025-10-10 Computerworld ,1992-01-20 For more than 40 years Computerworld has been the leading source of technology news and information for IT influencers worldwide Computerworld s award winning Web site Computerworld com twice monthly publication focused conference series and custom research form the hub of the world s largest global IT media network **FROM THE QUANTUM TO THE MULTIVERSE** Don Hainesworth M.Sc. M.Eng.,2025-01-30 From the Quantum to the Multiverse Probing the Universe Quantum theory is among the great intellectual achievements of the 20th century and how this came about is interesting in itself Quantum theory was once widely held to resist any realist interpretation and to mark the advent of a postmodern science characterized by paradox uncertainty and the limits of precise measurement It seems that there is a realm of reality in the subatomic or micro physical domain The success of the Aspect Experiment in Paris in 1982 marked the end of the contemplation period with the first direct experimental proof that even

the most unusual aspects of QM are a literal description of the way things really are in the real world Further analyses of QM have led scientists to ponder the possibility of multiple dimensions Extra dimensions have changed the way physics think about the Universe And because the connections of extra dimensions in the Cosmos could connect to many more well established physics ideas extra dimensions are a way to approach older already verified facts about the Universe As a consequence of this physicists have postulated the real possibility of parallel universes

*Zantai (My Life Story)* Dr. Assefa Belay Wondim, 2024-06-11 Born in Adwa Tigray Ethiopia a semi rural town with limited infrastructure but rich in history and culture Assefa Wondim inherited his parents legacy and used it to mold his children Zantai My Life Story describes among others his birthplace ancestry upbringing and how he raised his children including how he viewed education for his children his goals for them the style of his parental control his commitment to meeting his children s needs and his involvement in his children s lives and activities Also the opportunities and challenges he encountered in life are described in the book This book may bring nostalgia to those whose upbringing was in Adwa the history geography culture and their school life in that beautiful town It may also give the young generation an insight into what Adwa looked like in the 1950s through the early 1970s

**Discovering the Universe** Neil F. Comins, William J. Kaufmann, 2011-04-25 Discovering the Universe is the bestselling brief text for descriptive one term astronomy courses especially those with no mathematics prerequisites Carried along by the book s vibrant main theme the process of scientific discovery the Ninth Edition furthers the book s legacy for presenting concepts clearly and accurately while providing all the pedagogical tools to make the learning process memorable

Space Views From The Hubble Telescope: Bestsellers in 2023 The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous captivating novels enthralling the hearts of readers worldwide. Lets delve into the realm of top-selling books, exploring the engaging narratives that have captivated audiences this year. The Must-Read : Colleen Hoover's "It Ends with Us" This heartfelt tale of love, loss, and resilience has gripped readers with its raw and emotional exploration of domestic abuse. Hoover masterfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can succeed. Space Views From The Hubble Telescope : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This intriguing historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids compelling storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This mesmerizing coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens weaves a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These bestselling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of compelling stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and suspenseful novel that will keep you wondering until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
