Spaceflight Revolution James R. Hansen, 1995 **Spaceflight Revolution** James R. Hansen, 1995 *SPACEFLIGHT REVOLUTION* JAMES R. HANSEN, 2018 Spaceflight Revolution: NASA Langley Research Center from Sputnik to Apollo National Aeronautics and Space Administration, James Hansen, 2020-02-25 This book presents a careful analysis of the history of the Langley Memorial Aeronautical Laboratory of the National Advisory Committee for Aeronautics NACA from its formation in 1917 to the demise of the NACA in October 1958 when this prestigious organization became the centerpiece of the new National Aeronautics and Space Administration NASA Whereas the NACA was concerned primarily with aeronautical research conducted by government employees in its own laboratories NASA would have a much broader charter that included not only aeronautical and space research but also the development and operation of various types of space vehicles including manned vehicles Within this new organization the Langley Aeronautical Laboratory became the Langley Research Center of NASA As a part of NASA Langley underwent many profound changes in program content organization and management and areas of personnel expertise Although aeronautical research continued in the NASA era research in support of such projects as Echo Scout Mercury Apollo and the Space Shuttle occupied a larger percentage of the Langley research effort as the years passed In addition Langley forged into new fields by assuming management responsibility for such large space projects as Lunar Orbiter and Viking This responsibility involved major contract activities and support of in house research New research facilities such as large vacuum tanks and high speed and high temperature air jets capable of simulating atmospheric entry from space were developed and constructed James Hansen s new book *Spaceflight Revolution* covers the turbulent seventeen year period from 1958 1975 in great and interesting detail With his usual thoroughness Hansen has based this book on careful analysis of hundreds of written records both published and unpublished as well as on numerous personal interviews with many of the key individuals involved in the great transition at Langley One Langley activity that was intentionally omitted from this study is aeronautical research which as the author mentions will hopefully be covered in a separate book *Spaceflight Revolution* is a very complete and well researched exposition and interpretation of a period of great change at the Langley Research Center The main events and trends are clearly and succinctly presented Although many who worked for Langley during the period covered may not agree entirely with some of Hansen s interpretations and conclusions sufficient information is given in the text references and notes to permit the reader to evaluate the work In any event anyone who ever worked for Langley or NACA NASA or who has any interest in the history of technology will find the book fascinating and thought provoking In addition anyone interested in the present and the future of NASA and the American space program will want to pay close attention to the insights found in his epilogue Spaceflight Revolution James R. Hansen, 2017-09-16 Excerpt from *Spaceflight Revolution Nasa Langley Research Center From Sputnik to Apollo* 3 Carrying Out the Task A Home at Langley The Tracking Range Shouldering the Burden The End of the Glamour

Dick,National Aeronautics and Space Administration,2010-07-07 On 29 July 1958 President Dwight D Eisenhower signed the National Aeronautics and Space Act creating the National Aeronautics and Space Administration NASA which became operational on 1 October of that year Over the next 50 years NASA achieved a set of spectacular feats ranging from advancing the well established field of aeronautics to pioneering the new fields of Earth and space science and human spaceflight In the midst of the geopolitical context of the Cold War 12 Americans walked on the Moon arriving in peace for all mankind Humans saw their home planet from a new perspective with unforgettable Apollo images of Earthrise and the Blue Marble as well as the pale blue dot from the edge of the solar system A flotilla of spacecraft has studied Earth while other spacecraft have probed the depths of the solar system and the universe beyond In the 1980s the evolution of aeronautics gave us the first winged human spacecraft the Space Shuttle and the International Space Station stands as a symbol of human cooperation in space as well as a possible way station to the stars With the Apollo fire and two Space Shuttle accidents NASA has also seen the depths of tragedy In this volume a wide array of scholars turn a critical eye toward NASA s first 50 years probing an institution widely seen as the premier agency for exploration in the world carrying on a long

tradition of exploration by the United States and the human species in general Fifty years after its founding NASA finds itself at a crossroads that historical perspectives can only help to illuminate **Enchanted Rendezvous** James R. Hansen,1995

A Dictionary of the Space Age Paul Dickson,2009-04-14 The launch of Sputnik 1 in 1957 ushered in an exciting era of scientific and technological advancement As television news anchors radio hosts and journalists reported the happenings of the American and the Soviet space programs to millions of captivated citizens words that belonged to the worlds of science aviation and science fiction suddenly became part of the colloquial language What s more NASA used a litany of acronyms in much of its official correspondence in an effort to transmit as much information in as little time as possible To translate this peculiar vocabulary Paul Dickson has compiled the curious lingo and mystifying acronyms of NASA in an accessible dictionary of the names words and phrases of the Space Age This dictionary captures a broader foundation for the language of the Space Age based on the historical principles employed by the Oxford English Dictionary and Webster s Third New International Dictionary Word histories for major terms are detailed in a conversational tone and technical terms are deciphered for the interested student and lay reader This is a must own reference for space history buffs Book Jacket

Looking backward, looking forward Stephen J. Garber,2002 **Power to Explore** Andrew J. Dunar,Stephen P. Waring,1999 This scholarly study of NASA s Marshall Space Flight Center places the institution in social political scientific and technological context It traces the evolution of Marshall located in Huntsville Alabama from its origins as an Army missile development organization to its status in 1990 as one of the most diversified of NASA s field Centers Chapters discuss military rocketry programs in Germany and the United States Apollo Saturn Skylab Space Shuttle Spacelab the Space Station and various scientific and technical projects including the Hubble Space Telescope It sheds light not only on the history of space technology science and exploration but also on the Cold War federal politics and complex organizations **Exploring the Unknown** Roger D. Launius,1995 Exploring the unknown is a multi volume series containing a selection of key documents in the history of the U S civil space program Volume V focusing on the exploration of space by robotic spacecraft that have significantly altered our perspectives on the cosmos prints 121 key documents on the history of space science planetary exploration of the solar system and space astrophysics edited for ease of use Many of these documents are published here for the first time Each is introduced by a headnote providing context bibliographical information and background information necessary to understanding the document This documentary history is an essential reference for anyone interested in the history of the U S civil space program and its development over time It will serve as a valuable source both for students and scholars Additional volumes will appear later that trace space science and the programmatic developments in the history of the U S exploration of space **The Development of Propulsion Technology for U.S. Space-launch Vehicles** J. D. Hunley,2007 In this definitive study J D Hunley traces the program s development from Goddard s early rockets and the German V 2 missile through the Titan IVA and the Space Shuttle with a focus on space

launch vehicles Since these rockets often evolved from early missiles he pays considerable attention to missile technology not as an end in itself but as a contributor to launch vehicle technology Focusing especially on the engineering culture of the program Hunley communicates this very human side of technological development by means of anecdotes character sketches and case studies of problems faced by rocket engineers He shows how such a highly adaptive approach enabled the evolution of a hugely complicated technology that was impressive but decidedly not rocket science Unique in its single volume coverage of the evolution of launch vehicle technology from 1926 to 1991 this meticulously researched work will inform scholars and engineers interested in the history of technology and innovation as well as those specializing in the history of space flight NASA's First A Robert G. The Top Books of the Year Spaceflight Revolution Nasa Langley Research Center From Sputnik To Apollo The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous compelling novels enthralling the hearts of readers worldwide. Lets delve into the realm of popular books, exploring the captivating narratives that have captivated audiences this year. Spaceflight Revolution Nasa Langley Research Center From Sputnik To Apollo : Colleen Hoover's "It Ends with Us" This touching tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover skillfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can triumph. Uncover the Best : Taylor Jenkins Reid's "The Seven Husbands of Evelyn Hugo" This spellbinding historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reid's compelling storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens' "Where the Crawdads Sing" This mesmerizing coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens spins a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These bestselling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of engaging stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a exceptional and suspenseful novel that will keep you guessing until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
