## **Spaces Of Capital Towards A Critical Geography:**

**Spaces of Capital** David Harvey, 2002-01-18 David Harvey is the most influential geographer of our era possessing a reputation that extends across the social sciences and humanities *Spaces of Capital* a collection of seminal articles and new essays spanning three decades demonstrates why his work has had and continues to have such a major impact The book gathers together some of Harvey's **Spaces of Capital** David Harvey, 2001 **Spaces of Capital/Spaces of Resistance** Chris Hesketh, 2017-12-15 Based on original fieldwork in Chiapas and Oaxaca Mexico this book offers a bridge between geography and historical sociology Chris Hesketh examines the production of space within the global political economy Drawing on multiple disciplines Hesketh's discussion of state formation in Mexico takes us beyond the national level to explore the interplay between global regional national and sub national articulations of power These are linked through the novel deployment of Antonio Gramsci's concept of passive revolution understood as the state led institution or expansion of capitalism that prevents the meaningful participation of the subaltern classes Furthermore the author brings attention to the conflicts involved in the production of space placing particular emphasis on indigenous communities and movements and their creation of counterspaces of resistance Hesketh argues that indigenous movements are now the leading social force of popular mobilization in Latin America The author reveals how the wider global context of uneven and combined development frames these specific indigenous struggles and he explores the scales at which they must now seek to articulate themselves

**Spaces of Contention** Byron Miller, 2016-04-01 As social movements have become more complex geographers are increasingly studying the spatial dynamics of collective resistance and sociologists and political scientists increasingly analyzing the role of space place and scale in contentious political activity Occupying a position at the intersection of these disciplinary developments this book brings together leading scholars to examine how social movements have employed spatial practices to respond to and shape changing social and political contexts It is organised into three main sections 1 Place Space and Mobility sites of mobilization and regulation 2 Scale and Territory structuring collective interests identities and resources and 3 Networks connecting actors and resources across space It concludes by suggesting that different spatialities place scale networks interlink within one another in particular instances of collective action playing distinctive yet complementary roles in shaping how these actions unfold in the political arena By mapping state of the art conceptual and empirical terrain across Geography Sociology and Political Science *Spaces of Contention* provides readers with a much needed guide to innovative research on the spatial constitution of social movements and how social movements tactically and strategically approach and produce space New Urban Spaces Neil Brenner, 2019-05-24 The urban condition is today being radically transformed Urban restructuring is accelerating new urban spaces are being consolidated and new forms of urbanization are crystallizing In *New Urban Spaces* Neil Brenner argues that understanding these mutations of urban life requires not only concrete research but new theories of urbanization To this end Brenner proposes an approach that breaks

with inherited conceptions of the urban as a bounded settlement unit the city or the metropolis and explores the multiscalar constitution and periodic rescaling of the capitalist urban fabric Drawing on critical geopolitical economy and spatialized approaches to state theory Brenner offers a paradigmatic account of how rescaling processes are transforming inherited formations of urban space and their variegated consequences for emergent patterns and pathways of urbanization The book also advances an understanding of critical urban theory as radically revisable key urban concepts must be continually reinvented in relation to the relentlessly mutating worlds of urbanization they aspire to illuminate

Globalization Development and Social Justice Ann El Khoury, 2015-03-27 Are there existing alternatives to corporate globalization What are the prospects for and commonalities between communities and movements such as Occupy the World Social Forum and alternative economies Globalization Development and Social Justice advances the proposition that another globalization is not only possible but already exists It demonstrates that there are multiple pathways towards development with social justice and argues that enabling propositional agency rather than oppositional agency such as resistance is a more effective alternative to neoliberal globalization El Khoury develops a theory of infraglobalization that emphasizes creative constitution not just contestation of global and local processes The book features case studies and examples of diverse economic practice and innovative emergent political forms from the Global South and North These case studies are located in the informal social economy and community development as well as everyday practices from prefigurative politics to community cooperatives and participatory planning This book makes an important contribution to debates about the prospects for and practices of a transformative grassroots globalization and to critical debates about globalization and development strategies It will be of interest to students and scholars of international relations globalization social movement studies political and economic geography sociology anthropology and development studies

**Shopping Malls and Public Space in Modern China** Nicholas Jewell, 2016-03-03 China's rise as an economic superpower has been inescapable Statistical hyperbole has been accompanied by a plethora of highly publicized architectural forms that brand the regeneration of its increasingly globalized urban centres Despite the sizeable body of literature that has accompanied China's modernization the essence and trajectory of its contemporary cityscape remains difficult to grasp This volume addresses a less explored aspect of China's urban rejuvenation the prominence of the shopping mall as a keystone of its public spaces Here the presence of the built form most representative of Western capitalism's excess is one that makes explicit the tensions between China's Communist state and its ascent within the free market This book examines how these interrelationships are manifested in the culturally hybrid built form of the shopping mall and its role in contesting the public space of the modern Chinese city By viewing these interrelationships as collisions of global and local narratives a more nuanced understanding of the shopping mall typology is explored Much architectural criticism has failed to address the levels of meaning implicit within the shopping mall yet it is a building type whose public popularity has guaranteed its endurance Consequently if architecture is to remain a relevant

social art a more holistic understanding of this phenomenon will be indispensable to the process of adapting to globalizing forces This examination of Chinese shopping malls offers a timely and relevant case study of what is happening in all our cities today

**A Companion To Marx's Capital, Volume 2** David Harvey, 2013-12-17 The biggest financial crisis since the Great Depression shows no sign of coming to a close and Marx's work remains key in understanding the cycles that lead to recession For nearly forty years David Harvey has written and lectured on Capital becoming one of the world's most foremost Marx scholars Based on his recent lectures and following the success of his companion to the first volume of Capital Harvey turns his attention to Volume 2 aiming to bring his depth of learning to a broader audience guiding first time readers through a fascinating and hitherto neglected text Whereas Volume 1 focuses on production Volume 2 looks at how the circuits of capital the buying and selling of goods realize value This is a must read for everyone concerned to acquire a fuller understanding of Marx's political economy

**Spatial Formats under the Global Condition** Matthias Middell, Steffi Marung, 2019-08-05 Contributions to this volume summarize and discuss the theoretical foundations of the Collaborative Research Centre at Leipzig University which address the relationship between processes of re-spatialization on the one hand and the establishment and characteristics of spatial formats on the other hand Under the global condition spatial formats are products of collective negotiations on the most effective and widely acceptable balance between the claim for sovereignty and the need for interconnectedness

**Amman: Gulf Capital, Identity, and Contemporary Megaprojects** Majd Musa, 2017-01-20 Gulf capital flows to Amman Jordan in the early twenty first century and the investment of this capital in large scale urban developments have significantly transformed the city's built environment Therefore to understand urban transformation in Amman during this period it is important to analyze it against the backdrop of Gulf capital and its integration into Jordan's economy and the integration of both the country's economy and Gulf capital into the global capitalist economy This book analyzes three cases of megaprojects planned for the city in the early twenty first century The New Downtown Abdali Jordan Gate and Sanaya Amman Drawing upon theories on urban development and capitalism identity and discourse and urban development processes and cases in other cities the book investigates how contemporary megaprojects in Amman fit into the capitalist economy and its modes of production how capital flows construct a modern image of the city and how the new image and megaprojects represent the city residents as modern and create Amman as a global city This book presents a new approach to the study of the urban built environment in Amman providing a valuable interdisciplinary contribution to the scholarly work on globalizing cities especially in the Middle East

**Metromarxism** Andrew Merrifield, 2013-04-15 Metromarxism discusses Marxism's relationship with the city from the 1850s to the present by way of biographical chapters on figures from the Marxist tradition including Marx Walter Benjamin Guy Debord and David Harvey Each chapter combines interesting biographical anecdotes with an accessible analysis of each individual's contribution to an always transforming Marxist theory of the city He suggests that the interplay between the city as center of

economic and social life and its potential for progressive change generated a major corpus of work That work has been key in advancing progressive political and social transformations      **Envisioning Media Power** Brett Christophers, 2009-04-16

Envisioning Media Power develops an original geographical perspective on the nature and exercise of power in the international television economy It uses theories of political economy as the basis for a comparative empirical examination of the UK and New Zealand television markets while closely considering these markets respective relationships with the US market and its globally influential media corporations In fleshing out this geographical perspective the book critically addresses the power to produce reproduce and extract profit from territorialized media markets To understand such powers the book examines processes of creation and dissemination of industry knowledge structures of industry governance and the locational characteristics of television s operational economy Through its rigorous and creative combination of conceptual insights with empirical substance Envisioning Media Power both illuminates the fabric of television s international space economy and ultimately offers a unique theoretic argument suggesting that power knowledge and geography are inseparable not only from one another but from the process of accumulation of media capital      Accumulations, Crises, Struggles Baris Karaagac, 2013 This book is about the most recent phase or stage of capitalist development neoliberal globalization Neoliberalism as much a political project as an economic one is still pervasive and it continues to provide the general framework for politics and political imagination across most of the globe The book brings together a group of scholars from different parts of the world looking at the impact of neoliberalism on societies And as such it contributes as much to the critique and overcoming of this process as to its analysis With its extensive coverage both geographically and thematically the book will be of interest for students of the social sciences as well as for anyone making an effort to understand and change the world Series Politics Society and Community in a Globalizing World Vol 15      *Leviathan Undone?* Roger Keil, Rianne Mahon, 2010-01-01 Caught in the trap of the nation state and frozen in postwar bloc logic critical political economy has been found wanting when it comes to problematizing space and scale Globalization and the rise of world cities and regions have shaken the discipline s foundations and fostered new interest in the concept of scale Leviathan Undone brings together leading theorists and scholars from a variety of disciplines to develop a new language to understand the spatial restructuring that has accompanied globalization By treating scale as the core concept of our time these innovative groundbreaking essays bring a new sensibility to classical and contemporary concerns in Canadian and international political economy      Safe Space Christina B. Hanhardt, 2013-12-04 Winner 2014 Lambda Literary Award in LGBT Studies Since the 1970s a key goal of lesbian and gay activists has been protection against street violence especially in gay neighborhoods During the same time policymakers and private developers declared the containment of urban violence to be a top priority In this important book Christina B Hanhardt examines how LGBT calls for safe space have been shaped by broader public safety initiatives that have sought solutions in policing and privatization and have had devastating effects along race and class lines

Drawing on extensive archival and ethnographic research in New York City and San Francisco Hanhardt traces the entwined histories of LGBT activism urban development and U S policy in relation to poverty and crime over the past fifty years She highlights the formation of a mainstream LGBT movement as well as the very different trajectories followed by radical LGBT and queer grassroots organizations Placing LGBT activism in the context of shifting liberal and neoliberal policies Safe Space is a groundbreaking exploration of the contradictory legacies of the LGBT struggle for safety in the city

**The Spatial Politics of the Sculptural** Euyoung Hong,2016-10-04 Space is a formative factor in the production of sculpture Phenomenological thought interprets sculptural work in relation to the immersive experience of the viewer situating it within its environment But what possibilities lie beyond this unitary position What is the political potential of a sculptural object How can its spatial relations and movements be reconfigured beyond its immediate environment Spatial Politics of the Sculptural investigates the concept of space and its role in the production of the sculptural form from a multidimensional perspective Engaging with the work of Krauss Fried Merleau Ponty Deleuze and Guattari and using case studies of urban development in Paris New York and Seoul it reinterprets and dislocates the sculptural form in terms of the political dynamism of space proposing a new methodology for reading producing and expanding sculptural practice Drawing on David Harvey s theory of capital it scrutinizes the idea of the spatial in the process of urbanization It examines the interrelationship between capital flow and accumulation and explores the production and destruction of space in relation to the creation of three dimensional works of art In doing so it expands the idea of the sculptural object in relation to the urban environment
