

The background of the book cover is a black and white photograph of an industrial construction site. In the foreground, a worker in a hard hat stands on a metal platform or scaffolding, looking towards the right. In the background, there are large industrial structures, including what appears to be a crane or a large piece of machinery with a hook. The overall scene is industrial and somewhat dark, with a focus on the worker and the machinery.

Workers, Unions, and Global Capitalism Rohini Hensman,2011-01-27 While it s easy to blame globalization for shrinking job opportunities dangerous declines in labor standards and a host of related discontents the flattening of the world has also created unprecedented opportunities for worker organization By expanding employment in developing countries especially for women globalization has formed a basis for stronger workers rights even in remote sites of production Using India s labor movement as a model Rohini Hensman charts the successes and failures strengths and weaknesses of the struggle for workers rights and organization in a rich and varied nation As Indian products gain wider acceptance in global markets the disparities in employment conditions and union rights between such regions as the European Union and India s vast informal sector are exposed raising the issue of globalization s implications for labor Hensman s study examines the unique pattern of employees unionism which emerged in Bombay in the 1950s before considering union responses to recent developments

especially the drive to form a national federation of independent unions A key issue is how far unions can resist protectionist impulses and press for stronger global standards along with the mechanisms to enforce them After thoroughly unpacking this example Hensman zooms out to trace the parameters of a global labor agenda calling for a revival of trade unionism the elimination of informal labor and reductions in military spending to favor funding for comprehensive welfare and social security systems Mitteilungsblatt des Instituts für soziale Bewegungen ,2004 **Coop Made in USA** Enrico Massetti,2017-08-25 In the age of unemployment downsizing and outsourcing where can a poor soul find a job Well maybe it s time we create our own Self employment is an option and can seem freeing but it s hard to do everything yourself and find time for a non work life The worker coop is an alternative to the isolation of self employment and the exploitation of traditional jobs Mira Luna Coop made in USA is a pamphlet that covers the cooperative movement in the United States with examples of co op realities and explanation of organizational and governance methods used in various co ops From Clans to Co-ops Theodoros Rakopoulos,2017-11-01 From Clans to Co ops explores the social political and economic relations that enable the constitution of cooperatives operating on land confiscated from mafiosi in Sicily a project that the state hails as arguably the greatest symbolic victory over the mafia in Italian history Rakopoulos s ethnographic focus is on access to resources divisions of labor ideologies of community and food and the material changes that cooperatives bring to people s lives in terms of kinship work and land management The book contributes to broader debates about cooperativism how labor might be salvaged from market fundamentalism and to emergent discourses about the human economy Lewis & Clark Law Review ,2003 Entrepreneurs and Institutions in Europe and Asia, 1500-2000 Ferry de Goey,2002 This study uses a comparative perspective on entrepreneurship and institutions The comparative perspective includes a geographical and a chronological aspect the articles cover the history of Asian and European entrepreneurship in its institutional context in the last five hundred years This comparative perspective is merged with newly developed paradigms from social and economic history business history and other social sciences The topics range from discussions on 18th century Russian trade policy the Exchange Office in Sweden innovations in 18th century French silk industry Greek shipping companies and family networks 20th century Italian industrial districts Hong Kong businessmen in the IT sector entrepreneurs in late colonial Indonesia business elites in Singapore to the Taiwanese state and small and medium sized businesses The volume focuses on the complex relationship between entrepreneurs and institutions How do entrepreneurs create and use institutions and to what extent do institutions mould entrepreneurial behaviour **Spain** Graham J.
