Sparring With Charlie Motorbiking Down The Ho Chi Minh Trail:

Sparring with Charlie Christopher Hunt, 1996 When Christopher Hunt set off in search of Vietnam's notorious Ho Chi Minh Trail he hardly expected to end up on a rickety Russian made motorcycle navigating 5 000 kilometers of paths rarely traveled by tourists and on roads missing from maps Hunt left the United States expecting to explore the 1 700 kilometer highway that was once the supply route for the North Vietnamese Army He soon found himself roaming the Vietnamese countryside in need of help and direction In the process he found that being an American in Vietnam conjured constant reminders of the past and encountered a country and a people poised precariously between the ancient and the modern With adventure wit and an eye for the absurd Christopher Hunt goes beyond the newspaper headlines and myths about Vietnam to capture the color and complexity of Vietnam today

Sparring with Charlie Christopher Hunt, 1997 Hunt's account of his search for the Ho Chi Minh Trail On a rickety Russian made motorbike he set off to explore what was once the supply route for the North Vietnamese Army Roaming the countryside he soon found that being an American in Vietnam conjured constant reminders of the past

An Alternative History of Bicycles and Motorcycles Steven E. Alford, Suzanne Ferriss, 2016-04-06 An Alternative History of Bicycles and Motorcycles Two Wheeled Transportation and Material Culture accounts for the nineteenth century creation and development of two wheeled vehicles both human powered and motorized Specifically the book focuses on the period from 1885 which saw the appearance simultaneously of the Safety bicycle and the Einspur the first motorcycle to 1920 while exploring implications for later bicycling and motorcycling We argue that invention of these vehicles rather than the product of gifted individuals should be seen as the consequence of a number of historical economic cultural and political forces that intersect so unpredictably that the notion of a genius inventor is reductive The common evolutionary model of development from the bicycle to the motorcycle oversimplifies both the technology and its origins Stripping the vehicles of all their material and cultural associations such a model fails to advance our understanding of the devices their creators and their riders Taking a contemporary vehicle and tracing its lineage creates a false sense of evolutionary necessity in its creation and fails to account for the many possible developmental paths that were for whatever reason abandoned By contrast our book adopts a material culture approach a form of inquiry that stresses the connections between artifacts and social relations We consider not simply the bicycle and motorcycle as material objects but focus also on the complex socio political and economic convergences that produced the materials materials that in turn themselves shaped the vehicles appearance function and adoption by riders
