Huertas, Bonnie Lucero, Gregory J. Swedberg, 2016-11-29 Crime exists in every society revealing not only the way in which societies function but also exposing the standards that society holds about what is harmful and punishable Criminalizing individuals and actions is not the exclusive domain of the state it emerges from the collective consciousness the judgments of individuals and groups who represent societal thinking and values Studying how these individuals and groups construct represent perpetrate and contest crime reveals how their message reinforces and also challenges historical and culturally specific notions of race class and gender Voices of Crime examines these official and unofficial perceptions of deviancy justice and social control in modern Latin America As a collection of essays exploring histories of crime and justice the book focuses on both cultural and social history and the interactions among state institutions the press and a variety of elite and non elite social groups Arguing that crime in Latin America is best understood as a product of ongoing negotiation between top down and bottom up ideas not just as the exercise of power from the state the authors seek to document and illustrate the everyday experiences of crime in particular settings emphasizing underresearched historical actors such as criminals victims and police officers. The book examines how these social groups constructed contested navigated and negotiated notions of crime criminality and justice This reorientation in contrast to much of the existing historical literature that focuses on elite and state actors prompts the authors to critically examine the very definition of crime and its perpetrators suggesting that not only the actions of the poor and racial others but also the state can be termed as criminal The Spatial Evolution of Greater Buenos Aires, Argentina **Buenos Aires** David J. terms with the need to restructure in the face of economic environmental and demographic crises The examination of restructuring processes in Buenos Aires is organised around four major themes economic change accessibility and mobility environmental impacts and cultural adjustments The book begins with an overview of the city s four hundred year history which forms the basis for an examination of the contemporary urban landscape This leads to an analysis of local politics in relation to planning and housing policies which is followed by a consideration of changes in the city's economic structures and an examination of Buenos Aires national regional and global transport links The book then turns to a detailed look at the city s urban transport networks and surveys the city s green spaces environmental problems and health care systems It also provides a detailed analysis of the cultural geography of Buenos Aires and the implications for the Latin Americanizing of a city that was traditionally the most European of the South American cities The book concludes with some suggestions for future planning policies in Buenos Aires David J Keeling provides a highly illustrated and authoritative portrait of a major World City It is essential reading for students of urban and regional geography Latin American specialists of all disciplines and social scientists interested in urban issues **Library of Congress Catalogs** Library of Congress, 1976 **Congress Catalog** Library of Congress, 1970 The Spatial Evolution of Greater Buenos Aires, 1870-1930 Charles S.
