## **The Scientific Imaginary in Visual Culture**

Anneke Smelik, 2010 Popular media art and science are intricately interlinked in contemporary visual culture This book analyses the scientific imaginary that is the result of the profound effects of science upon the imagination and conversely of the imagination in and upon science As scientific developments in genetics occur and information technology and cybernetics open up new possibilities of intervention in human lives cultural theorists have explored the notion of the posthuman The Scientific Imaginary in Visual Culture analyses figurations of the posthuman in history and philosophy as well as in its utopian and dystopian forms in art and popular culture The authors thus address the blurring boundaries between art and science in diverse media like science fiction film futurist art video art and the new phenomenon of bio art In their evaluations of the scientific imaginary in visual culture the authors engage critically with current scientific and technological concerns

*Media and New Capitalism in the Digital Age* E. Fisher, 2010-03-15 This book explores the new terrain of network capitalism through the transformations of the discourse on technology Rather than viewing such discourse as either a true or false reflection of reality Fisher evaluates the ideological role that technology discourse plays in the legitimation of a new form of capitalism Based on an extensive empirical analysis the book argues that contemporary technology discourse at one and the same time promises more personal empowerment through network technology and legitimates a more privatized flexible and precarious economic constellations Such discourse signals a new tradeoff in the political culture of capitalism from a legitimation discourse which emphasizes the capacity of technology and technique to bring about social emancipation through equality stability and security to a legitimation discourse which focuses on the capacity of technology to bring about individual emancipation through individual empowerment authenticity creativity and cooperation Contrary to the prevailing assumption that sees network technology as liberating from the rigidity and pitfalls of a stifling Fordist capitalism the book offers a theoretical framework which sees contemporary technology discourse as an ideology that legitimates the economic social and political arrangements of the new capitalism

*Distrusting Educational Technology* Neil Selwyn, 2013-11-26 Distrusting Educational Technology critically explores the optimistic consensus that has arisen around the use of digital technology in education Drawing on a variety of theoretical and empirical perspectives this book shows how apparently

neutral forms of educational technology have actually served to align educational provision and practices with neo liberal values thereby eroding the nature of education as a public good and moving it instead toward the individualistic tendencies of twenty first century capitalism Following a wide ranging interrogation of the ideological dimensions of educational technology this book examines in detail specific types of digital technology in use in education today including virtual education open courses digital games and social media It then concludes with specific recommendations for fairer forms of educational technology An ideal read for anyone interested in the fast changing nature of contemporary education
