Technocrats of the Imagination John Beck, Ryan Bishop, 2020-03-13 John Beck and Ryan Bishop explore the 1960s interdisciplinary art and technology collaborations between American avant garde artists and the military industrial complex that took place in universities private labs and museums **Jacques Ellul and the Technological Society in the 21st Century** Helena M. Jerónimo, José Luís García, Carl Mitcham, 2013-07-08 This volume rethinks the work of Jacques Ellul 1912-1994 on the centenary of his birth by presenting an overview of the current debates based on Ellul's insights As one of the most significant twentieth century thinkers about technology Ellul was among the first thinkers to realize the importance of topics such as globalization terrorism communication technologies and ecology and study them from a technological perspective The book is divided into three sections The first discusses Ellul's diagnosis of modern society and addresses the reception of his work on the technological society the notion of efficiency the process of symbolization de symbolization and ecology The second analyzes communicational and cultural problems as well as threats and trends in early twenty first century societies Many of the issues Ellul saw as crucial such as energy propaganda applied life sciences and communication continue to be so In fact they have grown exponentially on a global scale producing new forms of risk Essays in the final section examine the duality of reason and revelation They pursue an understanding of Ellul in terms of the depth of experience and the traditions of human knowledge which is to say on the one hand the experience of the human being as contained in the rationalist sociological and philosophical traditions On the other hand there are the transcendent roots of human existence as well as revealed knowledge in the mystical and religious traditions The meeting of these two traditions enables us to look at Ellul's work as a whole but above all it opens up a space for examining religious life in the technological society **Sociology as Social Criticism** T. B. Bottomore, 2010 First published in 1975 this collection of essays embodies a conception of sociological thought as a critical analysis of social theories and doctrines of social institutions and political regimes of recent social movements They deal in particular with some conservative versions of sociology and with attempts

to develop more radical theories they extend the author's previous writings on classes elites and politics and they analyse some of the problems of socialism in the late twentieth century There is a close unity of theme throughout the book in its critical attempt to formulate new intellectual bases for future radical and egalitarian politics It is written with that quiet wisdom and impressive command of sources which readers have come to associate with Professor Bottomore's work

Rapp, 2012-12-06 Only recently has the phenomenon of technology become an object of interest for philosophers The first attempts at a philosophy of technology date back scarcely a hundred years a span of time extremely short when compared with the antiquity of philosophical reflections on nature science and society Over that hundred year span speculative critical and empiricist approaches of various sorts have been put forward Nevertheless even now there remains a broad gap between the importance of technology in the real world and the sparse number of philosophical works dedicated to the understanding of modern technology As a result of the complex structure of modern technology it can be dealt with in very different ways These range from metaphysical exposition to efforts aimed at political consensus Quite naturally within such a broad range certain national accents can be discovered they are shaped by a common language accepted philosophical traditions and concrete problems requiring consideration Even so the worldwide impact of technology its penetration into all spheres of individual social and cultural life together with the urgency of the problems raised in this context all these demand a joint philosophical discussion that transcends the barriers of language and cultural differences The papers printed here are intended to exemplify such an effort at culture transcending philosophical discussion *Recent Advances in the Modeling of Hydrologic Systems* David S. Bowles, P. Enda O'Connell, 1991 This book offers a wealth of information to anyone seeking a survey of the state of the hydrologic modeling discipline in the research community in the late 1980s The book is an excellent source of information for students seeking topics that may prove worthy of further research and study Practitioners of hydrology would also benefit from exposure to the activities at the leading edge of their field of interest It also serves as a means of introducing people to aspects of hydrology that are outside their editors are to be commended for their efforts in presenting this material to the hydrologic community Bulletin American meteorological Society 73 12 1992 **Science, Technology, and Public Policy: Books, monographs, documents, and articles in journals, 1968 through 1970** Lynton Keith Caldwell, William B. This compelling new book challenges the view that a clear and unwavering boundary exists between nature and technology. Rejecting this dichotomy, the contributors show how the history of each can be united in a constantly shifting panorama where definitions of nature and technology alter and overlap.
