Technological Entrepreneurship Research In Entrepreneurship And Management V :

Technology Entrepreneurship in Theory and Practice J. Mark Munoz, Orestis Terzidis, 2025-02-11 Technology entrepreneurship refers to business activities that are based on new scientific insights and new technical developments. It describes the process by which enterprising teams and individuals convert new technical knowledge into products and services. It encompasses entrepreneurial pursuits in all fields of engineering and science where progress opens novel ways of creating value. Often these activities are based on intellectual property, although it may also make sense to consciously pursue an open technology strategy. Entrepreneurial activities in these domains lead to ventures with specific characteristics. **Technology Entrepreneurship in Theory and Practice** compiles the essential research knowledge about principles and practices in technology entrepreneurship. Systematically presenting theory and practice for entrepreneurs coming from an engineering or scientific background, the authors assemble a comprehensive overview of the subject and enhance it with their expert viewpoints. The book compiles and summarizes available knowledge and approaches to enable engineers and scientists to develop entrepreneurial initiatives. **Technology Entrepreneurship in Theory and Practice** will find an audience among technology entrepreneurs, engineers and scientists, entrepreneurship educators, executives, consultants, and policymakers worldwide.

Technology Entrepreneurship Natasha Evers, James Cunningham, Thomas Hoholm, 2020-12-12 This second edition of the critically acclaimed core textbook provides students from technology and science-based backgrounds with the theoretical knowledge and practical skills required to transform innovative ideas into commercially viable businesses for profit or social ends. Blending theory, policy, and practice in a manner that is accessible to readers with little prior knowledge of business commercialisation, it offers a framework for understanding the entrepreneurial process for technological ideas. The book provides students with comprehensive guidance on the specialized field of technopreneurship. It provides the tools and frameworks required for managing commercialising and marketing technological innovation. With real-life examples and case studies from a range of countries and industries, it will equip students with the understanding required to successfully launch their product. This text caters for undergraduate and postgraduate students studying technology entrepreneurship modules on engineering, science, and computing technology programmes. New to this edition: All chapters updated to reflect the evolution of theory and practice in the field. New cases on digital entrepreneurship, growth, and scaling. Extended geographical coverage of case studies. Entrepreneurial practices updated to include recent research. Strategic context of business models, business growth, and scaling. Digital entrepreneurship, entrepreneurial marketing, organization design, and crowdfunding developed and updated.

Technological Entrepreneurship Ian Chaston, 2017-01-28 This comprehensive book responds to the growing demand to study entrepreneurship as a key driver of innovation and competitive advantage. Challenging the existing idea that technological entrepreneurship exists predominantly in SMEs and as a result of market demands, the author argues that a commitment to entrepreneurship remains the most effective strategy for sustaining wealth.
