Technology Of Transition:

Accelerating Technology Transition National Research Council, Division on Engineering and Physical Sciences, Board on Manufacturing and Engineering Design, National Materials Advisory Board, Committee on Accelerating Technology Transition, 2004-11-15 Accelerating the transition of new technologies into systems and products will be crucial to the Department of Defense's development of a lighter more flexible fighting force. Current long transition times ten years or more is now typical are attributed to the complexity of the process. To help meet these challenges the Department of Defense asked the National Research Council to examine lessons learned from rapid technology applications by integrated design and manufacturing groups. This report presents the results of that study which was based on a workshop held to explore these successful cases. Three key areas emerged: creating a culture for innovation and rapid technology transition methodologies and approaches and enabling tools and databases.

Managing Technology Transition in Saudi Arabia Khalid A. Alrashoud, 2020-06-08 This book presents a comprehensive overview of the adoption of small scale residential solar photovoltaic systems (RSPs) in Saudi Arabia. Focusing on the current technological development of RSPs it discusses elements of socio technical governance theories and energy policy analysis. It also identifies the critical factors that affect Saudi residents' decisions to adopt this new technology and analyzes broader energy systems on a state level by investigating factors that shape RSPs integration policies. This multi faceted interdisciplinary book paves the way for an integrated transition management policy design model to stimulate RSPs adoption rates. Given its scope it is a valuable resource for readers seeking an in depth and up to date integrated overview of the ever expanding theoretical and quantitative fields of socio technical transitions and the transition to sustainability.
