Cinematic Chronotopes Pepita Hesselberth, 2014-06-19 The site of cinema is on the move The extent to which technologically mediated sounds and images continue to be experienced as cinematic today is largely dependent on the intensified sense of being here now and me that they convey This intensification is fundamentally rooted in the cinematic s potential to intensify our experience of time to convey time s thickening of which the sense of place and a sense of self presence are the correlatives In this study Pepita Hesselberth traces this thickening of time across four different spatio temporal configurations of the cinematic a multi media exhibition featuring the work of Andy Warhol 1928 1987 the handheld aesthetics of European art house films a large scale media installation by Rafael Lozano Hemmer and the usage of the trope of the flash forward in mainstream Hollywood cinema Only by juxtaposing these cases by looking at what they have in common this study argues can we grasp the complexity of the changes that the cinematic is currently undergoing

The Cinematic Footprint Nadia Bozak, 2011-10-28 Film is often used to represent the natural landscape and increasingly to communicate environmentalist messages Yet behind even today s green movies are ecologically unsustainable production distribution and consumption processes Noting how seemingly immaterial moving images are supported by highly durable resource dependent infrastructures The Cinematic Footprint
