## **Technology And Responsibility:**

**Technology and Responsibility** P.T. Durbin, 2013-03-09 Since it may seem strange for a new series to begin with volume 3 a word of explanation is in order The series Philosophy and Technology inaugurated in this form with this volume is the official publication of the Society for Philosophy the one requirement is that the scholarship be sound and all contributions to the series are subject to rigorous blind refereeing Technology the other half of the philosophy and technology pairing is also construed broadly

**The Imperative of Responsibility** Hans Jonas, 1984 Hans Jonas here rethinks the foundations of ethics in light of the awesome transformations wrought by modern technology the threat of nuclear war ecological ravage genetic engineering and the like Though informed by a deep reverence for human life Jonas's ethics is grounded not in religion but in metaphysics in a secular doctrine that makes explicit man's duties toward himself his posterity and the environment Jonas offers an assessment of practical goals under present circumstances ending with a critique of modern utopianism

**Technology, Anthropology, and Dimensions of Responsibility** Birgit Beck, Michael Kühler, 2020-02-19 With great power comes great responsibility In today's world with our growing technological power and the knowledge about its impact we are considered to be responsible for many instances that not long ago would have been deemed a matter of fate At the same time the looming options of e.g. genome editing or neuroprosthetics threaten traditional notions of responsibility if no longer the person but the technology involved is deemed to be responsible for a specific behaviour The growing ethical debate on the expansion of human responsibility e.g. when it comes to human machine interaction ambient intelligence or reproductive technologies thus intertwines with the challenge to formulate an appropriate understanding of the concept of personal responsibility and our respective anthropological self understanding in today's technological world The volume brings together both perspectives and aims at illuminating crucial dimensions of responsibility in light of technological innovation and our self understanding as responsible beings

**Responsibility in Science and Technology** Simone Arnaldi, Luca Bianchi, 2016-07-07 The present volume elucidates the scope of responsibility in science and technology governance by way of assimilating insights gleaned from sociological theory and STS and by investigating the ways in which responsibility unfolds in social processes Drawing on these theoretical perspectives the volume goes on to review a heuristic model of responsibility Such a model provides a simple tentative though no less coherent analytical framework for further examining the idea of responsibility its transformations configurations and contradictions

**Technology-Driven Evolution of the Corporate Social Responsibility Ecosystem** Singh, Kuldeep, Yadav, Jitendra, Abraham, Rebecca, 2024-07-22 In the field of Corporate Social Responsibility CSR and sustainability a profound challenge emerges the intersection of traditional practices with the relentless march of technology Companies face a pressing dilemma as they navigate mandatory and voluntary CSR requirements grapple with stakeholder demands and strive for transparency in a digitally driven era The relationship

between technology and CSR has become a pivotal concern affecting compliance monitoring reporting and ultimately the very fabric of corporate reputation This challenge calls for a nuanced understanding and it is precisely this void that the book *Technology Driven Evolution of the Corporate Social Responsibility Ecosystem* aims to fill The central predicament lies in the dynamic evolution of CSR practices against the backdrop of technological advancements As companies seek to balance mandatory and voluntary CSR initiatives the landscape is fraught with complexities Stakeholders armed with technology demand accountability and transparency pressuring companies to adapt swiftly The challenge extends to the need for effective reporting maintaining social legitimacy and navigating the intricacies of CSR governance in a rapidly digitizing world The traditional norms of CSR are being reshaped requiring businesses to not only comprehend but also harness technology to align with societal expectations and environmental imperatives

*Social Responsibility in Science, Technology, and Medicine* Paul T. Durbin, 1992 Not everyone agrees that professionals including academic philosophers need to be actively engaged in this fashion So another theme throughout is an argument against non engaged philosophers non engaged scientists and other non engaged professionals The social problems of a technological society are manifest The book attempts to show in a scholarly way how they might be addressed effectively Jacket

**Epigenetics and Responsibility** Emma Moormann, Anna Smajdor, Daniela Cutas, 2024-01-25 EPUB and EPDF available Open Access under CC BY NC ND licence We tend to hold people responsible for their choices but not for what they can't control their nature genes or biological makeup This thought provoking collection redefines the boundaries of moral responsibility It shows how epigenetics reveals connections between our genetic make up and our environment The essays challenge established notions of human nature and the nature nurture divide and suggest a shift in focus from individual to collective responsibility

Uncovering the links between our genetic makeup environment and experiences this is an important contribution to ongoing debates on ethics genetics and responsibility      **The Role of the Federal Laboratories in Domestic Technology**

Dürr, Wolfgang Gehra, Martina Wegner, 2024-01-04 The title of the book derives from the theme of the 20th Conference on Applied Social Sciences of the Professional Association of German Sociologists held in Munich in May 2019 The question of what concrete contributions social innovations can make to the transition to forms of sustainable coexistence and economic activity is as much the focus of this book as the question of what contribution the social sciences can make Thus on the one hand it is about concrete social innovations that help us to achieve the goal of living and doing business sustainably but on the other hand it is also about the way in which the social sciences not least through appropriate theoretical and methodological training can be made socially responsible for the success of such socially innovative processes This book is a translation of an original German edition The translation was done with the help of artificial intelligence machine translation by the service DeepL com A subsequent human revision was done primarily in terms of content so that the book will read stylistically differently from a conventional translation      Innovations Through Information Technology Information
