Technology And The Politics Of Knowledge:

Technology and the Politics of Knowledge Andrew Feenberg, Alastair Hannay, 1995 Technology and the Politics of Knowledge responds to an evergrowing concern with technology in contemporary social thought The leading figures in the current philosophical study of technology address such complex and hotly debated issues as the place of science and technical knowledge in the political sphere the role of individual choice and citizen virtue in a technological society the relevance of gender to technical innovation the contributions of Habermas and Heidegger to thinking on technology and the political and moral implications of innovation in such diverse fields as the media and reproductive technologies

Questioning Technology Andrew Feenberg, 2012-08-21 In this extraordinary introduction to the study of the philosophy of technology Andrew Feenberg argues that technological design is central to the social and political structure of modern societies Environmentalism information technology and medical advances testify to technology's crucial importance In his lucid and engaging style Feenberg shows that technology is the medium of daily life Every major technical change reverberates at countless levels economic political and cultural If we continue to see the social and technical domains as being separate then we are essentially denying an integral part of our existence and our place in a democratic society *Questioning Technology* convinces us that it is vital that we learn more about technology the better to live with it and to manage it

The Global Politics of Science and Technology - Vol. 1 Maximilian Mayer, Mariana Carpes, Ruth Knoblich, 2014-08-20 An increasing number of scholars have begun to see science and technology as relevant issues in International Relations IR acknowledging the impact of material elements technical instruments and scientific practices on international security statehood and global governance This two volume collection brings the debate about science and technology to the center of International Relations It shows how integrating science and technology translates into novel analytical frameworks conceptual approaches and empirical puzzles and thereby offers a state of the art review of various methodological and theoretical ways in which sciences and technologies matter for the study of international affairs and world politics The authors not only offer a set of practical examples of research frameworks for experts and students alike but also propose a conceptual space for interdisciplinary learning in order to improve our understanding of the global politics of science and technology This first volume summarizes various time tested approaches for studying the global politics of science and technology from an IR perspective It also provides empirical theoretical and conceptual interventions from geography history innovation studies and science and technology studies that indicate ways to enhance and rearticulate IR approaches In addition several interviews advance possibilities of multi disciplinary collaboration

Ecologies of Knowledge Susan Leigh Star, 1995-07-06 *Ecologies of Knowledge* provides a comprehensive overview of issues relating to work politics and the latest perspectives on the role of materials feminism nonhumans and work practices as shaping scientific and technical knowledge In addition to theoretical contributions the authors cover biotechnology computing representations and

space aerospace engineering and a variety of ethical perspectives and controversies in these domains **Knowledge**

Politics Nico Stehr, 2005 **Cultures of Knowledge**, 2011-11-14 Looking at knowledge transmission as a cultural feature this book isolates and examines the individual factors that affect knowledge in the making and created uniquely Chinese cultures of knowledge The volume is organized into four sections Internode Imperial Court Agora and Scholarly Arts Each has a theoretical introduction followed by two core contributions from experts in Chinese history The section concludes with a reflection by a historian of Western Technology who scrutinizes each sphere and identifies the points that reflect universal technological experience The combination of broadly sketched theoretical introductions and detailed core contributions provides an unparalleled insight into pre modern Chinese history from the Song to early Qing dynasty revealing Chinese attitudes towards innovation and invention **Multicultural Curriculum** Ram Mahalingam, Cameron McCarthy, 2000 The legendary Greek figure Orpheus was said to have possessed magical powers capable of moving all living and inanimate things through the sound of his lyre and voice Over time the Orphic theme has come to indicate the power of music to unsettle subvert and ultimately bring down oppressive realities in order to liberate the soul and expand human life without limits The liberating effect of music has been a particularly important theme in twentieth century African American literature The nine original essays in Black Orpheus examines the Orphic theme in the fiction of such African American writers as Jean Toomer Langston Hughes Claude McKay James Baldwin Nathaniel Mackey Sherley Anne Williams Ann Petry Ntozake Shange Alice Walker Gayl Jones and Toni Morrison The authors discussed in this volume depict music as a mystical shamanistic and spiritual power that can miraculously transform the realities of the soul and of the world Here the musician uses his or her music as a weapon to shield and protect his or her spirituality Written by scholars of English music women s studies American studies cultural theory and black and Africana studies the essays in this interdisciplinary collection ultimately explore the thematic linguistic structural presence of music in twentieth century African American fiction

Handbook of Research in Educational Communications and Technology M. J. Bishop, Elizabeth Boling, Jan Elen, Vanessa Svihla, 2020-09-21 The 5th edition of the prestigious AECT Handbook continues previous efforts to reach outside the traditional instructional design and technology community to the learning sciences and computer information systems communities toward developing a conceptualization of the field However given the pervasive and increasingly complex role technology now plays in education since the 1st edition of the Handbook in 1996 the editors have reorganized the research chapters in this edition to focus on the learning problems we are trying to solve with educational technologies rather than to focus on the things we are using to solve those problems Additionally for the first time this edition of the Handbook reflects our field's growing understanding of the importance of design scholarship to inform practice by including design case chapters These changes for this edition of the Handbook are intended to bring educational technology research into the broader framework of educational research by elaborating on the role instructional design and technology plays as a scholarly discipline in addressing education's increasingly complex issues Provides comprehensive reviews of new developments in educational technology research and design practice Includes concrete examples to guide future research and practice in the ways emerging technologies can be used to solve educational problems Contains extensive references furnished to guide readers to the most recent research and design practice in the field of instructional design and technology

Fundable Knowledge A.D. Van Nostrand, 2013-11-05 Knowledge is the basic output of the defense technology establishment in the United States it is what enables the development of weapon systems From this premise this volume explores the process of knowledge production in defense technology from the beginnings of the Cold War to the present time Produced through the process of research and development R D technical knowledge for defense is an economic commodity It is fundable in the sense of having future value Like other commodities in the futures

market it is purchased before it is produced But unlike those other commodities this knowledge is typically produced through the joint efforts of the customer and the vendor This study highlights two polar aspects of knowledge production technology development and technology transfer It centers on the present shifting concept of defense conversion that is redefining defense technology policy The book also includes cited documents pertaining to the transactions that engage customers and vendors in the process of knowledge production The documents constitute a literature of needs and claims and they reveal two chief properties problem formulation and tactical positioning Apart from the substantive yield of these particular documents the strategy of evidence in this volume has broad implications for further study suggesting a means of analyzing knowledge production in other large social systems
