Technology-Based Regional Economic Development Akio Nishizawa, David V. Gibson, 2024-10-08 This book provides an overview of United States and Japanese technology policy development at the national level with case analyses of Austin Texas and Tsuruoka Japan to identify key strategies and processes that have resulted in successful endogenous technology based business development and job creation *Information Technology Economic Development* Johnny Ch Lok, 2019-12-11 Scientific technology comparative economy development Any countries must have limited skill labor and technological materials to manufacture any high technological products Nowadays information technology and technology both industries are increasing needs to adapt consumers need to enjoy to use any kinds of technological products in order to satisfy their better living of standard feeling However any countries technological engineers number and technological material number they have limited number to supply to any technological industries to use to manufacture any high technological products In economic view comparative advantage will cause when the technological product manufacturer needs to employ technological engineers skill labors and technological material to choose to manufacture either any related information technological products or general technological products such as the skill labor and technological material supply number is limited If the technological product manufacturer choose to apply more skill labors and technological material to manufacture any information technological product Then due to skill labors and technological material supplying number shortage factor I believe that they will not have enough skill labor and technological material to supply to manufacture any high technological products Hence they must need to compare whether information technological product or other technological product both kinds which kind of technological product can help them to bring more economic manufacturing benefit in order to sell to global technological product market I shall indicate the technology product such as natural energy farming technology etc as well as automatic technology in manufacturing industry to let manufactures to compare whether they ought choose apply technological skill labor and technological material to choose to use to manufacture information technological product such as AI smart mobile AI smart mobile game software or other technological products in order to bring more comparative economic benefit to themselves The future comparative economic advantages between information technology and technology products may include as below 1 Information technological related online distance learning teaching service provision to students learning need High level education and high birth rate population raising online learning information technology distance learning service needs According to John G 2016 indicated that a point forecast is that GDP per capita will rise well under 1% per year in the longer run with overall GDP growth of a little over 1 to 12% The main drivers of slow growth are educational attainment and demographics First rising educational attainment will add less to productivity growth than it did historically Second because of the aging and retirement of baby boomers

employment will rise more slowly than population which in turn is projected to rise slowly relative to history. Thus it seems that some economists believe education and birth rate will influence future US employment method. They assume that the employment and growth ratio will rise and unemployment ratio will decline. US will increase birth ratio and future there are many young people students can have chance to accept high education degree to raise whose education level to prepare to enter different kinds of high educational jobs market to work in the future.

*Technology, Innovation, and Regional Economic Development*, 1983-05      Emerging Technologies for Economic Development Dirk Meissner, Leonid Gokhberg, Ozcan Saritas, 2019-03-28. This book provides an impressive overview of emerging technologies especially nanotechnologies and biotechnologies and their prospective applications. It identifies and describes existing and potential markets for emerging technology based applications and projects scenarios for macroeconomic development based on these technologies. Integrated roadmaps for the development of a nano and bioindustry are shown and policy measures and corporate strategies developed to advance these technologies. These measures are illustrated using roadmaps and policy case studies. The book combines a practical comprehensive overview of the technical side of emerging technologies and their applications in various fields with an analysis of market developments and characteristics.
