## Technology In The 1990s:

**Information Technology and the Corporation of the 1990s** Thomas J. Allen, Michael S. Scott Morton, 1994-01-06 One of the most pathbreaking and influential business books of the 1990s is *The Corporation of the 1990s* by Michael Scott Morton. Its expert view of how information technology would influence organizations and their ability to survive and prosper in the 1990s has become the benchmark of thinking about information technology. Now in a supporting companion volume *Information Technology and the Corporation of the 1990s* makes available the research on which *The Corporation of the 1990s* was based. The research was conducted at the Sloan School of Management at MIT by the Management in the 1990s program. The program was funded by a group of 12 industrial and government sponsors from the United States and Britain which included American Express, Digital Equipment Corporation, Eastman Kodak, British Petroleum, MCI Communications, General Motors, U.S. Army, ICL Ltd, Internal Revenue Service, Ernst Young, BellSouth, and CIGNA Corporation. *Information Technology and the Corporation of the 1990s* aims to disseminate ideas on how organizations can manage the impact of information technology and also to raise issues and stimulate further thought by both academics and professionals. The book is divided into three sections which cover the information technology revolution, strategic options, and organization and management responses. It incorporates the work of many important scholars including Charles Jonscher, Michael J. Piore, Thomas W. Malone, JoAnne Yates, Robert I. Benjamin, Gary W. Loveman, Eric von Hippel, Edgar H.
