I was asked recently to prepare an independent background report on the subject of priority assessment in science and technology policy for the Australian Science and Technology Council The Council while not necessarily endorsing this book suggested that a wider audience could be interested in the type of material contained in my report and kindly gave me permission to publish the material in my own right The present book contains this and other material some of which was presented at a seminar on National Science Policy Implications for Government Departments arranged by the Department of Science and the Environment Additional ideas were developed in response to comments on the manuscript by referees as a result of discussions with Professor John Metcalfe and Dr Peter Stubbs of Manchester University a conversation with Dr Keith Hartley of the University of York and in the wake of a communication from Dr Ken Tucker Assistant Director Bureau of Industry Economics Australia Science and technology policy affects and concerns everyone of us if for no other reason than we cannot escape in this interdependent world from the economic social and environmental over pills generated by science and technology We must face the problems and promises inherent in new and existing science and technology whether we like it or not Not surprisingly this book finds that all industrialized countries seem to be facing similar economic and social problems **New Technology Policy and Social Innovations in the Firm** Jorge Niosi,2014-02-04 In the light of increased discussion of technology policy by all major industrial countries this volume presents the state of the debates and institutional change in the United States the United Kingdom the European Union and Canada It goes on to present studies of the major changes taking place in these countries with regards to the adoption of new technology and the reorganization of institutions to suit these changes Panel on Science and Technology Eighth Meeting (government, Science, and International Policy), Proceedings...90-1, January 24, 25, 26, 1967 United States. Information Technology has become symbolic of modernity and progress almost since its inception The nature and boundaries of IT have also meant that it has shaped or become embedded within a wide range of other scientific technological and economic developments Governments from the outset saw the computer as a strategic technology a keystone of economic development and an area where technology policy should be targeted This was true for those economies interested in maintaining their technological and economic leadership but also figured strongly in the developmental programmes of those seeking to modernise or catch up So strong was the notion that IT policy should be the centre of economic strategy that predominant political economic ideologies have frequently been subverted or distorted to allow for special efforts to promote either the production or use of IT This book brings together a series of country based studies to examine in depth the nature and extent of IT policies as they have evolved from a complex historical interaction of

politics technology institutions and social and cultural factors In doing so many key questions are critically examined Where can we find successful examples of IT policy Who has shaped policy Who did governments turn to for advice in framing policy Several chapters outline the impact of military influence on IT What is the precise nature of this influence on IT development How closely were industry leaders linked to government programs and to what extent were these programs particularly those aimed at the generation of national champions misconceived through undue special pleading How effective were government personnel and politicians in assessing the merits of programs predicated on technological trajectories extrapolated from increasingly complex and specialised information This book will be of interest to academics and graduate students of Management Studies History Economics and Technology Studies and Government and Corporate policy makers engaged with IT and Technology policy

Government, Innovation and Technology Policy Sunil Mani, 2002 This volume offers a comprehensive analysis of the changing role of government with respect to domestic technology development in eight countries in both the developed and the developing world The author distinguishes between those countries which can be classed as creators of new technologies Japan Korea and Israel and those which possess the potential to create new technologies Singapore Malaysia India South Africa and Brazil

Science and Technology Policy in the United States Sylvia Kraemer, 2006-06-20 During the latter half of the twentieth century federal funding in the United States for scientific research and development increased dramatically Yet despite the infusion of public funds into research centers the relationship between public policy and research and development remains poorly understood How does the federal government attempt to harness scientific knowledge and resources for the nation's economic welfare and competitiveness in the global marketplace Who makes decisions about controversial scientific experiments such as genetic engineering and space exploration Who is held accountable when things go wrong In this lucidly written introduction to the topic Sylvia Kraemer draws upon her extensive experience in government to develop a useful and powerful framework for thinking about the American approach to shaping and managing scientific innovation Kraemer suggests that the history of science technology and politics is best understood as a negotiation of ongoing tensions between open and closed systems Open systems depend on universal access to information that is complete verifiable and appropriately used Closed systems in contrast are composed of unique and often proprietary features which are designed to control usage From the Constitution's patent clause to current debates over intellectual property stem cells and internet regulation Kraemer shows the promise as well as the limits of open systems in advancing scientific progress as well as the nation's economic vitality

Science, Technology and Innovation Policies for Inclusive Growth in Africa Reuben A. Alabi, Achim Gutowski, Nazar Mohamed Hassan, Tobias Knedlik, Samia Satti Osman Mohamed Nour, Karl Wohlmuth, 2018 The volume analyses how to make Science Technology and Innovation STI Policies relevant for inclusive growth strategies in

Africa The base for a transformative STI policy is to link the STI policies to Africa's economic transformation policies In a first part the general issues of introducing effective STI policies are presented In a second part country case studies highlight the new approach Cases such as Sudan and Nigeria are analysed as these two countries have a long history of STI development because of different history size and structure they need to move in different directions towards a coherent STI policy for inclusive growth
