**Technology, Investment, and Trade** Kimio Uno, 1991      Technology and Trade, 1986      *Technology Policy: Trade and technology issues* United States. Congress. House. Committee on Science, Space, and Technology. Subcommittee on Technology, Environment, and Aviation, 1993      *Trade and Technology Promotion Act* United States. Congress. Senate. Committee on Governmental Affairs, 1990      Trade and Technology United States. Congress. House. Committee on Science, Space, and Technology. Subcommittee on Technology and Competitiveness, 1991      Trade, Foreign Direct Investment, and International Technology Transfer Kamal Saggi, 2010

What role does trade play in international technology transfer Do technologies introduced by multinational firms diffuse to local firms What kinds of policies have proved successful in encouraging technology absorption from abroad and why Using these questions as motivation this article surveys the recent trade literature on international technology transfer paying particular attention to the role of foreign direct investment The literature argues that trade necessarily encourages growth only if knowledge spillovers are international in scope Empirical evidence on the scope of knowledge spillovers national versus international is ambiguous Several recent empirical plant level studies have questioned earlier studies that argued that foreign direct investment has a positive impact on the productivity of local firms Yet at the aggregate level evidence supports the view that foreign direct investment has a positive effect on economic growth in the host country

**Trade, Foreign Direct Investment, and International Technology Transfer** Kamal Saggi, 1999 The author surveys the literature on trade and foreign direct investment especially wholly owned subsidiaries of multinational firms and international joint ventures as channels for technology transfer He also discusses licensing and other arms length channels of technology transfer He concludes

- 1 How trade encourages growth depends on whether knowledge spillover is national or international Spillover is more likely to be national for developing countries than for industrial countries
- 2 Local policy often makes pure foreign direct investment infeasible so foreign firms choose licensing or joint ventures The jury is still out on whether licensing or joint ventures lead to more learning by local firms
- 3 Policies designed to attract foreign direct investment are proliferating Several plant level studies have failed to find positive spillover from foreign direct investment to firms competing directly with subsidiaries of multinationals However these studies treat foreign direct investment as exogenous and assume spillover to be horizontal when it may be vertical All such studies do find the subsidiaries of multinationals to be more productive than domestic firms so foreign direct investment does result in host countries using resources more effectively
- 4 Absorptive capacity in the host country is essential for getting significant benefits from foreign direct investment Without adequate human capital or investments in research and development spillover fails to materialize
- 5 A country's policy on protection of intellectual property rights affects the type of industry it attracts Firms for which such rights are crucial such as pharmaceutical firms are unlikely to invest directly in countries where such protections are weak or will not invest in manufacturing and research and development activities Policy on

intellectual property rights also influences whether technology transfer comes through licensing joint ventures or the establishment of wholly owned subsidiaries Proceedings of the 2nd International Academic Conference on Blockchain, Information Technology and Smart Finance (ICBIS 2023) Jerome Yen, Mohammad Zoynul Abedin, Wan Azman Saini Bin Wan Ngah, 2023-07-25 This is an open access book With the rapid development of modern economy and Internet technology the traditional financial industry has to develop Internet finance to provide better services and meet the needs of the times It is against this background that the blockchain relying on its special advantages collective maintenance reliable databases and decentralization provides the reliability to solve the credit risk of Internet finance has an impact on institutions trust mechanisms risk control etc in the Internet finance industry and has derived more new application scenarios thus paving the way for the development of finance in the Internet era Applying blockchain technology to the financial field can promote data information sharing improve value transmission efficiency and enhance database security The financial market based on the decentralized system of blockchain technology can reduce the operating costs of financial institutions improve economic efficiency and solve problems such as information asymmetry The new financial business model of blockchain finance is conducive to improving the Internet credit reporting system preventing and controlling Internet financial risks and further realizing financial disintermediation At present in China s financial field blockchain technology has been applied and innovated in supply chain finance cross border payment trade finance asset securitization and other scenarios To promote the exchange and development of blockchain information technology and financial experts and scholars The 2nd International Academic Conference on Blockchain Information Technology and Smart Finance ICBIS 2023 will be held in Hangzhou from February 17 to 19 2023 This conference mainly focuses on the latest research on blockchain information technology and smart finance This conference brings together experts scholars researchers and relevant practitioners in this field from all over the world to share research results discuss hot issues and provide participants with cutting edge scientific and technological information so that you can timely understand the development trends of the industry and master the latest technologies broaden research horizons and promote academic progress **Linking Trade and Technology**
