Strategic Planning in Technology Transfer to Less Developed Countries Christian Madu, 1992-01-27 Despite an avalanche of literature over the last 30 years there has been relatively little written on the role played by strategic planning in the transfer of technology particularly from developed to less developed countries Technology transfer which involves the acquisition of inventive activity by secondary users is conceded vital to socio economic growth but usually it is looked at internationally from a micro perspective Unlike other books Madu s volume looks at technology transfer holistically It examines the advantages of technology transfer and its limitations by viewing recipient nations as systems in which social economic behavioral and political influences converge to help shape technological decisions Only when a systems perspective like this is adopted and technology seen as a strategic variable can technology transfer be understood and successfully implemented says Madu Madu thus identifies the failures of technology transfer as the result of malfunctions in three components of the system technology structure and behavior He analyzes these

malfunctions offers ways to repair them and considers technology from the viewpoints of both transferrer and receiver whose missions goals and objectives are often not only disparate but sometimes in conflict He then offers what he calls prescriptive frameworks and guidelines to help implement transfer and to see it as a variable that must be integrated into national development planning Throughout Madu makes it clear that the objective of technology transfer is the maximizing of social welfare Using this overarching premise he is able to evaluate both the benefits and the social costs associated with technology transfer and to develop his prescriptive integrative models Intended for specialists in international finance and development and international business management Madu s book will be of special value to teachers of graduate courses in socio economic development public policy and economics and to policymakers throughout government **Foreign**

Technology Transfer to Developing Countries Thomas J. Allen, 2015-08-05 Excerpt from Technology Transfer to Developing Countries The International Technological Gatekeeper A questionnaire was developed and administered to the research personnel of An Foras Taluntais the Irish agricultural research and development organization to study the operation of communications channels for the international transfer of technological information The techniques employed are consistent with those used in previous studies of the purely domestic flow of technological information into American research and development laboratories Results of the study show that the international transfer like domestic transfer takes place in a two step process operating through certain intermediary agents called technological gatekeepers These technological gatekeepers must be well integrated into two information networks an external network of information sources and an internal network of users to whom the information can be delivered Possible strategies for gatekeeper development are discussed About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Technology and Developing Economies Zeinab Karake-Shalhoub, 1990-05-21 This is the first empirical study to compare and contrast the effects of technology transfer to developing countries from the West and from Eastern European countries The author's primary purpose is to compare the effects of the different technologies offered by the two groups the capital intensive technologies of the West and the labor intensive technologies of the Eastern bloc on the economic growth of developing countries as measured by growth in output Using an analytical method based on the production input structure the author is able to quantify the impact on economic growth of technology transfer from different sources and with different characteristics Karake also evaluates the experience of developing countries in importing technologies and identifies the direction pattern and content of those

technologies Scholars in international and economic development will find Karake's work an important contribution to the documented information concerning the trade in technology and its relation to economic growth and technological interdependence Following an introductory chapter Karake offers a general discussion of the relationships among development growth and technology She then introduces the econometric time series models and describes the basic study structure The next section examines policies mechanisms and trends in technology transfer in both the West and the East focusing on such issues as the factors and policies which affect technology transfer to the Middle East and patterns of technological exports A chapter devoted to model formulation empirical analysis estimation and results specifies the empirical models used in the study and presents statistical analysis of the appropriate data Finally Karake summarizes the major research findings suggests avenues for further research and assesses the future of technology transfer activity Four appendices containing important supplemental information and a bibliography complete the study
