Technoscientific Angst Ethics And Responsibility:

Technoscientific Angst Raphael Sassower, 1997 This work considers two related phenomena the positive public image of science as the citadel of truth and the objectivity and the angst displayed by scientists over their indirect roles in technological horrors such as the atomic devastation of Hiroshima

Ethical Choices in Contemporary Medicine Mary Ann Gardell Cutter, Raphael Sassower, 2014-12-05 Ethical Choices in Contemporary Medicine jettisons the standard medical ethics models of rights language and shows how the bioethical problems that receive attention from the media and the public are related to and are explicable in terms of the epistemological foundations of science and medicine These epistemological concerns include how medical knowledge is established scientific validity how medical protocols are administered checks and balances how medical certainty is evaluated probability and medical responsibility is framed personal or collective and how medical knowledge is transmitted popular media versus professional journals and how medical care is allocated insurance policies and government subsidies The book examines the present predicaments of medicine within a broad cultural context and suggests that rational discourse and parochial ethical dialogue may be futile in the face of competing and incommensurable frameworks and agendas attitudes and wishes The authors show that in the postmodern age two interrelated issues surface when it comes to medicine On the one hand there is a strong critique of science and the privileges associated with the scientific discourse and on the other there is still a deep seated quest for certainty in all medical matters

Japanoise David Novak, 2013-06-03 Noise an underground music made through an amalgam of feedback distortion and electronic effects first emerged as a genre in the 1980s circulating on cassette tapes traded between fans in Japan Europe and North America With its cultivated obscurity ear shattering sound and over the top performances Noise has captured the imagination of a small but passionate transnational audience For its scattered listeners Noise always seems to be new and to come from somewhere else In North America it was called Japanoise But does Noise really belong to Japan Is it even music at all And why has Noise become such a compelling metaphor for the complexities of globalization and participatory media at the turn of the millennium In Japanoise David Novak draws on more than a decade of research in Japan and the United States to trace the cultural feedback that generates and sustains Noise He

provides a rich ethnographic account of live performances the circulation of recordings and the lives and creative practices of musicians and listeners He explores the technologies of Noise and the productive distortions of its networks Capturing the textures of feedback its sonic and cultural layers and vibrations Novak describes musical circulation through sound and listening recording and performance international exchange and the social interpretations of media *Tensions and Convergences* Reinhard Heil,Andreas Kaminski,Marcus Stippak,Alexander Unger,Marc Ziegler,2015-07-15 This book presents results of an international conference which addressed the interaction of aesthetical and technological dimensions within the formation of contemporary society The contributions discuss the production of time and space self and nature individual and society in the image of technology They focus on the productive tensions and convergences between aesthetic and technological concepts when implemented in everyday life The volume contains among others texts about technologies of visualisation the aesthetics of warfare and the design of technological lifeworlds The Moment of Complexity Mark C.
