**Televised Legislatures: Political Information Technology and Public Choice** W. Mark Crain, B. Goff, 2012-12-06

Our interest in studying televised legislatures was kindled by two episodes. The first was a series of rejections by the U S Senate between 1984 and 1986 of resolutions to permit live television coverage of floor proceedings. The second was the 1984 Camscam affair, the media label given to a partisan war over camera coverage of U S House proceedings. Each episode, if nothing else, made plain the intensity of the feelings that elected representatives feel about televised sessions. Legislative television was not taken lightly by those who had the most to gain or lose. Surveys indicate that legislative watchers, C SPAN junkies, number in the millions and penetration of cable access to televised sessions numbered nearly 40 million in 1986. In addition to the direct viewers, television news programs increasingly use excerpts from the televised sessions as enhancements and sources for political reporting. Televising legislatures in short has attracted much new attention to the process of legislating. The innovation and diffusion of the electronic Acropolis has transformed politics in the U S. Yet its impact on the democratic process has attracted little notice except from a few political journalists. Our predilections as economists working in the public choice tradition led us into the analysis of several questions surrounding television. What do televised sessions provide for legislators? How are incumbent reelection bids affected? Do all incumbents benefit? How are legislative sessions changed? Has the enactment of laws been influenced? For the most part, these questions had received only cursory treatment.

*The C-span Revolution* Stephen E. Frantzich, 1996. Explores the inception, development, and current status of the public service television network and examines C SPAN's impact on public figures and the station's role in the development of cable TV.

Legislative Television as Political Advertising Franklin Mixon, 2003-02-28. Using theoretical and statistical models along with several new sets of empirical results, this book examines the impact of legislative television on the political process in the United States. It examines the relationship between political economic variables and the tendency to adopt support live television in the U S Congress, the impact of television on the length of U S House and Senate sessions, the use of parliamentary procedures in the presence/absence of television cameras, and the role that legislative television has played in improving incumbents' success rates in primary general federal elections. Where possible, the economic costs to taxpayers of legislators' use of television cameras in order to enhance their reelection prospects are also considered.

**The Encyclopedia of Public Choice** Charles Rowley, Friedrich Schneider, 2008-01-25. The Encyclopedia provides a detailed and comprehensive account of the subject known as public choice. However, the title would not convey sufficiently the breadth of the Encyclopedia's contents, which can be summarized better as the fruitful interchange of economics, political science, and moral philosophy on the basis of an image of man as a purposive and responsible actor who pursues his own objectives as efficiently as possible. This fruitful interchange between the fields outlined above existed during the late eighteenth century during the brief period of the Scottish Enlightenment when such great scholars as David Hume, Adam Ferguson, and Adam

Smith contributed to all these fields and more. However, as intellectual specialization gradually replaced broad-based scholarship from the nineteenth century onwards, it became increasingly rare to find a scholar making major contributions to more than one. Once Alfred Marshall defined economics in neoclassical terms as a narrow positive discipline, the link between economics, political science, and moral philosophy was all but severed, and economists redefined their role into that of the humble dentist providing technical economic information as inputs to improve the performance of impartial, benevolent, and omniscient governments in their attempts to promote the public interest. This indeed was the dominant view within an economics profession that had become besotted by the economics of John Maynard Keynes and Paul Samuelson immediately following the end of the Second World War.

**Media Tactics in the Long Twentieth Century** Marie Cronqvist, Fredrik Mohammadi Norén, Emil Stjernholm, 2024-08-08. Integrating media studies with history, *Media Tactics in the Long Twentieth Century* explores the dynamic relationship between tactics and strategies in recent history. Drawing on examples from a range of different countries and world regions and looking at the infrastructures, entanglements, and institutions involved, the volume makes a strong case for media tactics as a new field of scholarly inquiry and for the importance of a historically informed approach. In contrast to strategic communication approaches, this media historical intervention contributes to new knowledge about the practical implementation of strategies. First foregrounding tactics as an object of study, the volume then counters the presentism of contemporary studies by adding a necessary historical perspective. Moreover, the book theoretically disentangles the concept of strategy from an abstract contemporary buzzword to concrete hands-on actions, which in turn reveals the complexity of using media strategies and media tactics in reality. This volume will interest scholars and students working in the field of media and communication in general and in the subfields of strategic communication, public relations, media history, and propaganda studies.
