## **Television Aesthetics:**

Television Aesthetics Nikos Metallinos, 2013-11-05 USE FIRST TWO PARAGRAPHS ONLY FOR GENERAL CATALOGS

This volume offers a response to three ongoing needs to develop the main composition principles pertinent to the visual communication medium of television to establish the field of television aesthetics as an extension of the broader field of visual literacy and to promote television aesthetics to both students and consumers of television. Based on effective empirical research from three axes: perception, cognition, and composition, the aesthetic principles of television images presented are drawn from converging research in academic disciplines such as psychology, perceptual cognitive, and experimental neurophysiology, and the fine arts: painting, photography, film, theater, music, and more. Although the aesthetics of the fine arts were traditionally built on contextual theories that relied heavily on subjective evaluation, on critical analyses, and on descriptive research methods, the aesthetics of today's visual communication media consider equally valuable empirical methodologies found in all sciences. Investigations in these different academic disciplines have provided the constructs and strengthened the foundations of the theory of television aesthetics offered in this book. Special features include a great variety of pictures supporting the topics discussed, a thorough up-to-date and specifically related bibliography for each of the major parts of the book, computer drawings illustrating the concepts examined in the text, scientific data tables and charts documenting the research findings, cited simplified explanations of the processes of visual, auditory, and motion perceptions of images, enhanced by specific diagrams, detailed analyses of the threefold process of stimulation, perception, and recognition of televised images, and workable, easy-to-understand and use rules of picture composition, visual image evaluations, and television program appreciation.

**Television Aesthetics and Style** Steven Peacock, Jason Jacobs, 2013-07-04 Although Film Studies has successfully returned attention to matters of style and interpretation, its sibling discipline has left the territory uncharted until now. The question of how television operates on a stylistic level has been critically underexplored despite being fundamental to our viewing experience. This significant new work redresses a vital gap in Television Studies by engaging with the stylistic dynamics of TV, exploring the aesthetic properties and values of both the medium and particular types of output, specific programmes, and raising important questions about the way we judge television as both cultural artifact and art form. *Television Aesthetics and Style* provides a unique and vital intervention in the field, raising key questions about television's artistic properties and possibilities. Through a series of case studies by internationally renowned scholars, the collection takes a radical step forward in understanding TV's stylistic achievements.

Vaage, 2015-10-14 The antihero prevails in recent American drama television series Characters such as mobster kingpin Tony Soprano The Sopranos meth cook and gangster in the making Walter White Breaking Bad and serial killer Dexter Morgan Dexter are not morally good so how do these television series make us engage in these morally bad main characters And what does this tell us about our moral psychological make up and more specifically about the moral psychology of fiction Vaage argues that the fictional status of these series deactivates rational deliberate moral evaluation making the spectator rely on moral emotions and intuitions that are relatively easy to manipulate with narrative strategies Nevertheless she also argues that these series regularly encourage reactivation of deliberate moral evaluation In so doing these fictional series can teach us something about ourselves as moral beings what our moral intuitions and emotions are and how these might differ from deliberate moral evaluation      Reimagining Brazilian Television Eli Carter, 2018-04-26 The Brazilian television industry is one of the most productive and commercially successful in the world At the forefront of this industry is TV Globo and its production of standardized telenovelas which millions of Brazilians and viewers from over 130 countries watch nightly Eli

Television Rewired Martha P. Nochimson, 2019-07-15

In 1990, American television experienced a seismic shift when *Twin Peaks* premiered, eschewing formulaic plots and clear lines between heroes and villains. This game-changing series inspired a generation of show creators to experiment artistically, transforming the small screen in ways that endure to this day. Focusing on six shows: *Twin Peaks*, with a critical analysis of both the original series and the 2017 return; *The Wire*; *Treme*; *The Sopranos*; *Mad Men*; and *Girls*, *Television Rewired* explores what made these programs so extraordinary. As their writers and producers fought against canned plots and moral simplicity, they participated in the evolution of the exhilarating new auteur television, while underscoring the fact that art and entertainment don't have to be mutually exclusive. Nochimson also makes provocative distinctions between true auteur television and shows that were inspired by the freedom of the auteur series but nonetheless remained entrenched within the parameters of formula. Providing opportunities for vigorous discussion, *Television Rewired* will stimulate debates about which of the new television series since 1990 constitute art and which are tweaked, business-driven storytelling.
