Television and Society Nicholas Abercrombie, 1996-05-01 *Television and Society* is a textbook designed to introduce students to the role of television in contemporary society It explores the structure of the television text the way in which that text is produced and the way it is consumed The first section deals with the analysis of television programmes as texts It covers for example the issues of

realism narrative genre and ideology the domestication of television programming and the nature of soap opera and news The section on the production of television deals firstly with the structure of the industry as a whole the ways in which television is financed and distributed the globalization of television and media imperialism and the political economy of television This is followed by a consideration of the internal workings of television organizations including the role of the producer the functioning of the production team the television personality and the producer s perceptions of the audience The final section investigates theories of the television audience and combines qualitative and quantitative studies There is discussion on the history of audience research methods of measuring the audience the domestic context of viewing and television talk Clearly written *Television and Society* will be an ideal textbook for students in media studies cultural studies and the sociology of culture *Understanding Society, Culture, and Television* Paul Monaco, 2000-09-30 What is the real nature of television and what is its place in contemporary society and culture In a provocative rethinking of the medium and its ensuing effects this book argues that we have misunderstood television and have thus contributed to a distorted view of art and culture in the 20th century During the final quarter of this century both in academic and popular circles we have spread wildly exaggerated claims about television s undermining of human consciousness and behavior Television has become a scapegoat for all sorts of societal and cultural ills The arguments presented by many researchers on behalf of the ill effects of TV are fundamentally weak and flawed On the eve of the 21st century the claimed distinctions between high art and popular culture have become a final hopeless repository of pedantry Television can be understood only by viewing it as an art form and measuring its role in society and culture in concert with the first principles of human reason and liberty

Big World, Small Screen ,1992-01-01 *Big World Small Screen* assesses the influence of television on the lives of the most vulnerable and powerless in American society children ethnic and sexual minorities and women Many in these groups are addicted to television although they are not the principal audiences sought by commercial TV distributors because they are not the most lucrative markets for advertisers This important book illustrates the power of television in stereotyping the elderly ethnic groups gays and lesbians and the institutionalized and thus in contributing to the self image of many viewers They go on to consider how television affects social interaction intellectual functioning emotional development and attitudes toward family life sexuality and mental and physical health for example They illustrate the medium s potential to teach and inform to communicate across nations and cultures and to induce violence callousness and amorality Parents will be especially interested in what they say about television viewing and children Finally they offer suggestions for research and public policy with the aim of producing programming that will enrich the lives of citizens all across the spectrum Nine psychologists members of the Task Force on Television and Society appointed by the American Psychological Association have collaborated on *Big World Small Screen* Television and Society. Challenging the popular myth of a present day information revolution Media Technology and Society is essential reading for anyone interested in the social impact of technological change Winston argues that the development of new media forms from the telegraph and the telephone to computers satellite and virtual reality is the product of a constant play off between social necessity and suppression the unwritten law by which new technologies are introduced into society only insofar as their disruptive potential is limited *Television in American Society* Glenn Alan Cheney,1983-01-01 In examining America s

Abstract Television has become an integral and important part of life in the Western world its impacts on society both good and bad are largely unassessed In an effort to focus attention on important questions a collection of essays addresses such concerns as the pervasiveness of television its effects on movies sports and live entertainment its effects on education the political process culture popular tastes family life sociability and initiative its influences on the urban crisis and its role as a business or as a government agency As indications of the many influences of television consider the increase in violent crime decrease in magazine and newspaper circulation growth in popularity of ballet importance of celebrities or the 10 billion spent on receivers While television has great potential as an educational medium it has been accused of inhibiting the learning process and contributing to perceptual aberrations If television is to be harnessd as a useful tool its applications must be better understood *Understanding Society, Culture, and Television* Paul Monaco,2000 **The SAGE**
