W. Burns, 1998 This book presents a balanced thorough history of television to 1940 considering the factors technical financial and social which influenced and led to the establishment of many of the world's high definition TV broadcasting services This is a major book in the study of history of science technology and media *The Birth of British Television* Mark Aldridge, 2017-09-16 When the BBC launched the world's first regular high definition television service on 2 November 1936 it was the culmination of decades of technological innovations More than this however the service meant that the principle of television had finally found its place The Birth of British Television A History traces the early history and development of television from the experiments of amateurs to the institutionalised developments that led to the world's first regular high definition television service Author Mark Aldridge provides a clear in depth and accessible introduction for those either exploring the period for the first time or seeking new insights into the beginnings of the industry In tracing the origins and development of television Aldridge focuses on a number of important factors including the attitude of the press towards early television and examines the way that expectations of television changed over time prior to its official launch Utilising new research this illuminating study examines how the aims for a new television service developed and the extent to which content and technology were linked The Birth of British Television approaches this formative period from several perspectives from private individuals to the BBC and government while also examining the broader opinions at the time towards the new medium through press reports and feedback from the general public Also included is an assessment of early programming which helps to offer a new and profound evaluation of the development of early television Mark Aldridge is a Lecturer in Film and TV Studies at Southampton Solent University UK He specialises in British television and both film and television history His previous publications include T is for Television 2008 an analysis of the work of Russell T Davies co written with Andy Murray **European Television Discourse in Transition** Helen Kelly-Holmes, 1999 As we enter the age of digital television with its potential offering of five hundred channels this volume addresses the implications of the rapidly changing television environment for societies for groups for identities for communication for our sense of time space place for education for language for genres for our whole way of life **Modernization, Nation-Building, and Television History** Stewart Anderson, Melissa Chakars, 2014-11-20 This innovative collection investigates the ways in which television programs around the world have highlighted modernization and encouraged nation building It is an attempt to catalogue and

better understand the contours of this phenomenon which took place as television developed and expanded in different parts of the world between the 1950s and the 1990s From popular science and adult education shows to news magazines and television plays few themes so thoroughly penetrated the small screen for so many years as modernization with television producers and state authorities using television programs to bolster modernization efforts Contributors analyze the hallmarks of these media efforts nation building consumerism and consumer culture the education and integration of citizens and the glorification of the nation s technological achievements *The Historian, Television and Television History* Graham Roberts, Philip M. *The Impact of International Television* Michael G. Elasmr, 2014-04-08 For several decades cultural imperialism has been the dominant paradigm for conceptualizing labeling predicting and explaining the effects of international television It has been used as an unchallenged premise for numerous essays on the topic of imported television influence despite the fact that the assumption of strong cultural influence is not necessarily reflected in the body of research that exists within this field of study In *The Impact of International Television A Paradigm Shift* editor Michael G Elasmr and

his contributors challenge the dominant paradigm of cultural imperialism and offer an alternative paradigm with which to evaluate international or crossborder message influence In this volume Elasmr has collected original research from leading scholars working in the area of crossborder media influence and contributes his own meta analysis to examine what research findings actually show on the influences of crossborder messages The contributions included here illustrate points such as the contentions of cultural imperialism and the context in which its assumptions emerged and developed the complexities of the relationship between exposure to foreign television and its subsequent effects on local audience members the applicability of quantitative methods to a topic commonly tackled using argumentation critical theory and other qualitative approaches and the difficulty of achieving strong and homogenous effects In bringing together the work of independent researchers The Impact of International Television A Paradigm Shift bridges over 40 years of research efforts focused on imported television influence the results of which as a whole challenge the de facto strong and homogenous effects assumed by those who support the paradigm of cultural imperialism The volume sets a theory driven agenda of research and offers an alternative paradigm for the new generation of researchers interested in international media effects As such the volume is intended for scholars researchers and students in international and intercultural communication cross cultural communication mass communication media effects media and society and related areas It will also be of great interest to academics in international relations cross cultural and social psychology intergroup and international relations international public opinion and peace studies
