Children, Adolescents, and the Media Victor C. Strasburger, Barbara J. Wilson, Amy B. Jordan, 2009 Up to date and case study laden analysis of how children and adolescents interact with the media

Television Violence P. T. Kelly, 1999 If one culprit is suspected above all others for encouraging society to become more violent and unfeeling it is television This medium which has become so pervasive in the last 50 years seems to play an enormous role in the lives of the vast majority of people But who controls the content which exerts such an enormous influence and to an extent controls the people What are they doing now and what will they be doing tomorrow Is violence essential to sell toothpaste and hamburgers What are our children becoming and what will their children be like Will every child carry a gun or other weapon just waiting for someone to trigger their violent nature and ignite their preprogrammed anger

Gentile,2014-09-30 Stripping away the hype this book describes how when and why media violence can influence children of different ages giving parents and teachers the power to maximize the media s benefits and minimize its harm There are many opinions about media violence and children but not all are supported by science In this book the top experts gather the latest results from 50 years of scientific study as the basis for a comprehensive in depth examination of the complex issues surrounding the effects of media violence of different types Each chapter focuses on a particular issue of concern including hot topics such as brain development cyber bullying video games and verbal aggression Articles take into account factors such as economics differences based on the ages of children and differences between types of media violence This book provides the information parents and those who work with families need to make the best choices It includes chapters specifically relevant to the types of bullying schools have the most trouble identifying and controlling Most importantly the writing is both intelligent and accessible so that parents educators pediatricians and policymakers can understand and apply the findings presented

Television George Comstock,Erica Scharrer,1999-04-15 Television What s On Who s Watching and What It Means presents a comprehensive examination of the role of television in one s life The emphasis is on data collected over the past two decades pointing to an increasing and in some instances a surprising influence of the medium Television is not only watched but its messages are attended to and well understood There is no shame in spending hours in front of the set in fact people over estimate the time they spend viewing Television advertising no longer persuades it sells by creating a burst of emotional liking for the commercial The emphases of television news determine not only what voters think about but also the presidential candidate they expect to support on election day Children and teenagers who watch a great deal of television perform poorly on standardized achievement tests and among the reasons are the usurpation of time spent learning to read and the discouragement of book reading Television violence frightens some children and excites others but its foremost effect is to increase aggressive behavior that sometimes spills over into seriously harmful antisocial behavior Incorporates

social psychology political science sociology child development and the growing field of communications Presents tables and graphs clarifying theories and linking sets of data Paints concise portraits of the role of television in entertainment politics and child rearing Contains background for dozens of lectures and articles Contains a comprehensive bibliography of more than 1000 citations many recent

Handbook of Children and the Media Dorothy G. Singer, Jerome L. Singer, 2011-07-25

Media and the American Child George Comstock, Erica Scharrer, 2010-07-27

Media and the American Child summarizes the research on all forms of media on children looking at how much time they spend with media everyday television programming and its impact on children how advertising has changed to appeal directly to children and the effects on children and the consumer behavior of parents the relationship between media use and scholastic achievement the influence of violence in media on anti social behavior and the role of media in influencing attitudes on body image sex and work roles fashion lifestyle The average American child aged 2 17 watches 25 hours of TV per week plays 1 hr per day of video or computer games and spends an additional 36 min per day on the internet 19% of children watch more than 35 hrs per week of TV This in the face of research that shows TV watching beyond 10 hours per week decreases scholastic performance In 1991 George Comstock published Television and the American Child which immediately became THE standard reference for the research community of the effects of television on children Since then interest in the topic has mushroomed as the availability and access of media to children has become more widespread and occurs earlier in their lifetimes No longer restricted to television media impacts children through the internet computer and video games as well as television and the movies There are videos designed for infants claiming to improve cognitive development television programs aimed for younger and younger children even pre literates computer programs aimed for toddlers and increasingly graphic interactive violent computer games Presents the most recent research on the media use of young people Investigates the content of children s media and addresses areas of great concern including violence sexual behavior and commercialization Discusses policy making in the area of children and the media Focuses on experiences unique to children and adolescents

A Cognitive Psychology of Mass Communication Fred W. Sanborn, Richard Jackson Harris, 2019-01-15

In a constantly changing media landscape A Cognitive Psychology of Mass Communication is the

go to text for any course that examines mass communication from a psychological perspective Now in its seventh edition the book continues its exploration of how our experiences with media affect the way we acquire and process knowledge about the world and how this knowledge influences our attitudes and behavior Updates include end of chapter suggestions for further reading new research and examples for a more global perspective as well as an added emphasis on the power of social media in affecting our perceptions of reality and ourselves While including real world examples the book also integrates psychology and communication theory along with reviews of the most up to date research The text covers a diversity of media forms and issues ranging from commonly discussed topics such as politics sex and violence to lesser studied topics such as emotions and prosocial media Readers will be challenged to become more sensitized and to think more deeply about their own media use as they explore research on behavior and media effects Written in an engaging readable style the text is appropriate for graduate or undergraduate audiences The accompanying companion website also includes resources for both instructors and students For students Chapter outlines and review questions Useful links For instructors Guidelines for in class discussions Sample syllabus Summaries Please visit www.routledge.com/cw/sanborn *Moving Experiences* David Gauntlett, 2005 A newly revised and expanded edition of the classic critique of media effects studies Publisher *Media Violence and its Effect on Aggression* Jonathan L. Freedman, 2002-12-15 The scientific evidence does not support the notion that TV and film violence cause aggression in children or in anyone else So argues Jonathan Freedman based on his findings that far fewer than half of the scientific studies have found a causal connection between exposure to media violence and aggression or crime In fact Freedman believes that taken to a more controversial extreme the research could be interpreted as showing that there is no causal effect of media violence at all Media Violence and its Effect on Aggression offers a provocative challenge to the accepted norms in media studies and psychology Freedman begins with a comprehensive review of all the research on the effect of violent movies and television on aggression and crime Having shown the lack of scientific support for the prevailing belief that media violence is connected to violent behaviour he then explains why something that seems so intuitive and even obvious might be incorrect and goes on to provide plausible reasons why media violence might not have had effects on children He contrasts the supposed effects of TV violence on crime with the known effects of poverty and other social factors and discusses the difference between television advertising which he argues does have an effect and violent programs which do not Freedman concludes by noting that in recent years television and films have been as violent as ever and violent video games have become more and more popular yet during this period there has been a dramatic decrease in violent crime He argues that this makes it highly implausible that media violence causes aggression or crime *Handbook of Children, Culture, and Violence* Nancy E. Dowd, Dorothy G. Singer, Robin Fretwell Wilson, 2006 Each chapter contains recommendations for legislators policy makers researchers and families This book should be on the desk and minds of legislators attorneys social workers and other mental health professionals who

encounter and wish to ameliorate the effects of violence in the lives of their young constituents clients and patients JOURNAL OF CHILD AND FAMILY STUDIES Questions relating to violence and children surround us in the media should V chips be placed in every television set How can we prevent another Columbine school shooting from occurring How should pornography on the internet be regulated The Handbook of Children Culture and Violence addresses these questions and more providing a comprehensive interdisciplinary examination of childhood violence that considers children as both consumers and perpetrators of violence as well as victims of it The Handbook offers much needed empirical evidence that will help inform debate about these important policy decisions Moreover it is the first single volume to consider situations when children are responsible for violence rather than focusing exclusively on occasions when they are victimized Providing the first comprehensive overview of current research in the field the editors have brought together the work of a group of prominent scholars whose work is united by a common concern for the impact of violence on the lives of children The Handbook of Children Culture and Violence is poised to become the ultimate resource and reference work on children and violence for researchers teachers and students of psychology human development and family studies law communications education sociology and political science public policy It will also appeal to policymakers media professionals and special interest groups concerned with reducing violence in children s lives Law firms specializing in family law as well as think tanks will also be interested in the Handbook
