The Ownership of the News Great Britain: Parliament: House of Lords: Select Committee on Communications, 2008 This report examines the impact that media ownership can have on the news and the effect of consolidation on the newspaper television and radio industries The newspaper industry is facing severe problems as readership levels fall young people turn to other sources of news and advertising moves to the internet Newspaper companies are having to make savings and this is having a particular impact on investment in news gathering and investigative journalism In television news the same trends are evident Most news programmes have smaller audiences than they had ten years ago younger people in particular are watching less television news commercial television channels are losing advertising revenue to the internet New media in particular the internet are having a major impact on the way news is produced and consumed but the traditional forms of news are likely to be the most popular sources of news for the foreseeable future The proliferation of news sources has not been matched by a corresponding expansion in professional and investigative journalism Owners can and do influence the news in a variety of ways They are in a position to have significant political impact The consolidation of media ownership adds to the risk of disproportionate influence The Committee recommends reform of the public interest test criteria for newspaper mergers and also believes that reforming cross media ownership restrictions on regional and local newspaper and radio mergers is necessary The Committee does not consider changes in ownership regulation and competition law to be enough if the aim is to ensure a range of voices and high quality news The public service broadcasting system in the United Kingdom provides an

invaluable news service for the citizen and it is crucial that the contribution of all the public service broadcasters is maintained *Broadcast Journalism* Shrivastava, K M, *Broadcast News Writing, Reporting, and Producing* Frank Barnas, 2013-05-02 Jargon buster convergent journalism Media convergence is the most significant development in the news industry in the last century The ability to interchange text audio and visual communication over the Internet has fundamentally transformed the way news organizations operate Convergence has enabled media companies to gather disseminate and share information over a variety of platforms Throughout the history of journalism it has been common for journalists to study one medium such as traditional print or broadcast and to anticipate a career working only in their chosen field However the 21st century journalist has fluidity to write and deliver news content in a variety of formats source <http://www.convergencejournalism.com> Broadcast News Writing Reporting and Producing presents a solid foundation for any student learning how to become a broadcast journalist in today's world of convergent journalism it is more important than ever that broadcast textbooks cover the most current trends in media Convergent journalism the coverage of news across multiple delivery platforms such as the internet television podcasts ipods blogs etc is here to stay broadcast journalism continues to morph as newer and more advanced content platforms are hatched and developed and broadcast journalists must understand how to write report and produce for multiple platforms simultaneously Just one crucial fact remains students will need training on how to perform successfully in a world in which current events aren't just shown on the ten o'clock evening news Broadcast News Writing Reporting and Producing will be completely overhauled to reflect the trends of convergent journalism on every page New co author Frank Barnas brings a multi faceted perspective of writing reporting and producing that allows for multi platform delivery systems and shows students with real world examples the functions and practices of today's media The new edition will be rewritten and restructured to accommodate common 16 week course modules and will be divided into four major sections of the news gathering writing reporting and producing Sidebars featuring how examples used in the text relate to convergence in journalism help students to draw connections easily between current stories and trends in the industry The comprehensive approach of this text brings a multi faceted perspective of writing reporting and producing that is needed more than ever in today's world of convergent journalism This newest edition is being completely overhauled by the experienced journalist Frank Barnas New photos and illustrations a restructuring of the text expanded end of chapter exercises newer and more relevant examples and more information on producing all contribute to giving readers what they need most a nuanced understanding of how the media of today function in a world without news boundaries *How the News Media Fail American Voters* Kenneth Dautrich, Thomas H. Hartley, 1999 It is often noted that the public is frustrated with the news media But what do American voters really think about how the media present political information While studies have examined how the news shapes opinions as well as what people respond to and remember this is the first book to provide an in depth analysis of how voters use and evaluate

the news media in political elections and the impact these trends have on their use of the news Kenneth Dautrich and Thomas H Hartley performed a four wave national panel survey of voters during the 1996 presidential campaign They found that although voters are profoundly dissatisfied with the usefulness of news in helping them make decisions they are unlikely to stop using the news media or switch media from network news to public broadcasting for instance Thus the media have little incentive to adjust to the needs or wishes of voters Here is an important contribution to the debate about the responsibilities of the news media raging among pundits and policymakers *Directory of College Courses in Radio and Television , Broadcast Journalism* Andrew Boyd,2001 This new edition of Broadcast Journalism is a major revision to the premier textbook in its field and a standard primer for broadcasting courses It is an up to date practical manual for would be reporters eager to enter the hectic arenas of radio and TV news Broadcast Journalism offers a vivid insight into the world of electronic reporting taking you behind the scenes at ITN and the BBC World Service Join camera crews on a stakeout at the High Court and capture the atmosphere in the studios of the world s largest news organisation All the essential skills are covered with step by step instruction in reporting recording and editing using the latest equipment Coverage for radio and TV includes Newswriting Newsgathering Newsreading Interviewing Programme making The digital revolution is transforming the news and this fifth edition explores the new opportunities emerging for journalists and online reporters using the Internet Essential guidance is also given on how you can break into a career in journalism Catalogue of Title-entries of Books and Other Articles Entered in the Office of the Librarian of Congress, at Washington, Under the Copyright Law ...
