Telicity In The Second Language:

Telicity in the Second Language Roumyana Slabakova, 2001-01-01 Annotation Slabakova U of Iowa examines the second language acquisition of English telicity marking by native speakers of Bulgarian Particular attention is paid to subtle differences between English and Slavic telic and atelic sentences Slabakova contends that Vendler's lexical classes of verbs can be represented in four phrase structure templates where lexical properties of the verb and of the object compositionally determine telicity The text is a revised version of the author's Ph D thesis 1997 McGill U Annotation c Book News Inc Portland OR booknews com Second Language Acquisition and Universal Grammar Lydia White, 2003-03-06 This authoritative 2003 textbook provides an overview and analysis of current second language acquisition research conducted within the generative linguistic framework Lydia White argues that second language acquisition is constrained by principles and parameters of Universal Grammar The book focuses on characterizing and explaining the underlying linguistic competence of second language learners in terms of these constraints Theories as to the role of Universal Grammar and the extent of mother tongue influence are presented and discussed with particular consideration given to the nature of the interlanguage grammar at different points in development from the initial state to ultimate attainment Throughout the book hypotheses maintaining that second language grammars are constrained by universal principles are contrasted with claims that Universal Grammar is not implicated relevant empirical research is presented from both sides of the debate This textbook is essential reading for those studying second language acquisition from a linguistic perspective **Meaning in the Second Language** Roumyana Slabakova, 2008-12-10 This book reviews recent research on the second language acquisition of meaning with a view of establishing whether there is a critical period for the acquisition of compositional semantics A modular approach to language architecture is assumed The book addresses the Critical Period Hypothesis by examining the positive side of language development it demonstrates which modules of the grammar are easy to acquire and are not subject to age effects The Bottleneck Hypothesis is proposed which argues that inflectional morphology and its features present the most formidable challenge while syntax and phrasal semantics pose less difficulty to learners Findings from the neurofunctional imaging PET fMRI and electrophysiology ERPs of L2 comprehension are reviewed and critically examined Since it is argued that experimental tasks in those studies are mostly in need of linguistic refinement evidence from behavioral studies of L2 acquisition of semantics are brought to bear on comprehension modeling Learning situations are divided into two types those presenting learners with complex syntax but simple semantics and those offering complex semantic mismatches in simple syntactic contexts The numerous studies of both types reviewed in the book indicate that there is no barrier to ultimate success in the acquisition of phrasal semantics **The Role of Formal Features in Second Language Acquisition** Juana Liceras, Helmut Zobl, Helen Goodluck, 2017-09-25 Using Chomsky's minimalist program as a framework this volume explores the role of formal or functional features in current descriptions and accounts of language

acquisition In engaging up to date articles distinguished experts examine the role of features in current versions of generative grammar and in learnability theory as it relates to native non native and impaired acquisition Proceedings of the Third Purdue Linguistics, Literature, and Second Language Studies Conference Libby Chernouski, David O'Neil, 2019-07-18 This collection brings together scholarship in theoretical and applied linguistics literary and cultural studies and second language studies The contributors here investigate the nature of linguistic cultural and cognitive diversity offering rich insights for theoretical advancement in multiple disciplines Their theoretical and practical explications on discourse literature and linguistic structure contribute to a multifaceted conversation about diversity in language structure and use From the relationships between eye contact and mindfulness to the question of the universality of critical thinking the topics in this volume represent a wide variety of approaches to the study of language Specific areas in which advances are made here include sociolinguistics second language pedagogy and literature studies **The Handbook of Advanced Proficiency in Second Language Acquisition** Paul A. Malovrh, Alessandro G. Benati, 2020-10-13 A comprehensive current review of the research and approaches to advanced proficiency in second language acquisition The Handbook of Advanced Proficiency in Second Language Acquisition offers an overview of the most recent and scientific based research concerning higher proficiency in second language acquisition SLA With contributions from an international team of experts in the field the Handbook presents several theoretical approaches to SLA and offers an examination of advanced proficiency from the viewpoint of various contexts and dimensions of second language performance The authors also review linguistic phenomena among advanced learners through the lens of phonology and grammar development Comprehensive in scope this book provides an overview of advanced proficiency grounded in socially relevant domains of second language acquisition including discourse reading genre based writing and pragmatic competence The authoritative volume brings together the theoretical accounts of advanced language use combined with solid empirical research Includes contributions from an international collection of noted scholars in the field of second language acquisition Offers a variety of theoretical approaches to SLA Contains information on the most recent empirical research that contributes to an understanding of SLA Describes performance phenomena according to multiple approaches to SLA Written for scholars students and linguists The Handbook of Advanced Proficiency in Second Language Acquisition is a comprehensive text that offers the most recent developments in the study of advanced proficiency in the acquisition of a second language *Ultimate Attainment in Second Language Acquisition* Donna Lardiere, 2017-09-25 The first book length treatment of its type Ultimate Attainment in Second Language Acquisition is a case study with a solid theoretical grounding that examines the language of an immigrant learner of English and thereby presents a much needed understanding of the linguistic competence of second language speakers Based on longitudinal data collected over a period of 16 years this clear and accessible presentation is well grounded in linguistic theory and in second language acquisition research issues Author Donna Lardiere presents the narrative of Patty an adult

Chinese immigrant learner of English who achieves native like proficiency in some areas of her English idiolect although reaches a plateau in her language acquisition known as the concept of fossilization By addressing this concept a central idea in second language acquisition research Lardiere fills a void in existing literature Individual chapters focus on Patty's end state knowledge of grammatical areas of finiteness past tense marking word order wh movement and relativization passivization number marking and use of determiners Important topics discussed throughout the book include learner variability in production case study methodology the roles of motivation and prior language L1 knowledge and sensitivity to input in circumscribing ultimate attainment in adult second language acquisition Ultimate Attainment in Second Language Acquisition is intended for anyone whose research is in the areas of second language acquisition language acquisition theoretical applied or developmental linguistics It is also appropriate for graduate level students of TESOL and teachers who work with more advanced learners of foreign languages

Marking Past Tense in Second Language Acquisition Rafael Salaberry, 2008-06-22 This book presents an analysis of the difficulties faced by native speakers of English in the learning of Romance languages While L1 speakers of English may quickly learn to identify and to some extent use the Spanish perfective and imperfective verb endings the L2 representation of tense aspect distinctions among both beginning and advanced learners requires a comprehensive multidimensional analysis Through a detailed examination of new and existing empirical data this book proposes a theoretical analysis of the L2 acquisition of tense aspect marking along the lines of the claim of the default past tense hypothesis This theoretical analysis serves to reconcile competing alternative hypotheses and to highlight potential areas of future research This comprehensive account will be of interest to academics researching second language acquisition and applied linguistics

The L2 Acquisition of Tense Aspect Morphology M. Rafael Salaberry, Yasuhiro Shirai, 2002-10-24 The present volume provides a cross linguistic perspective on the development of tense aspect in L2 acquisition Data based studies included in this volume deal with the analysis of a wide range of target languages Chinese English Italian French Japanese and Spanish Theoretical frameworks used to evaluate the nature of the empirical evidence range from generative grammar to functional typological linguistics Several studies focus on the development of past tense markers but other issues such as the acquisition of a future marker are also addressed An introductory chapter outlines some theoretical and methodological issues that serves as relevant preliminary reading for most of the chapters included in this volume Additionally a preliminary chapter offers a substantive review of first language acquisition of tense aspect morphology The analysis of the various languages included in this volume significantly advances our understanding of this phenomenon and will serve as an important basis for future research

Williams Syndrome Across Languages Susanne Bartke, Julia Siegmüller, 2004-01-01 Williams Syndrome WS aka Williams Beuren Syndrome is a developmental disorder that we have known about for some forty years The cause for WS was detected only recently a micro deletion on chromosome 7 more specifically at the region of chromosome 7q11.23 The cognitive and behavioral profile in WS is characterized by a

marked discrepancy between verbal and non verbal skills combined with relatively spared linguistic skills Recent research has shown considerable progress defining the areas of intactness in linguistic abilities This volume builds on that research giving an overview of the psycholinguistic research undertaken and opening up new perspectives and insights through new data and analyses This book is of interest to researchers of applied cognitive science and to linguists more occupied with theoretical research

Slavic Languages in Psycholinguistics Tanja Anstatt, Anja Gattnar, Christina

Clasmeier, 2016-06-13 Psycholinguistics explores the anchoring of language in cognition The Slavic languages are an attractive topic for psycholinguistic studies since their structural characteristics offer great starting points for the development of research on speech processing The research of these languages with experimental methods is however still in its infancy This book provides an insight into the current research within this field On one hand central topic is the question of how Slavic languages can contribute to psycholinguistic findings On the other hand all chapters introduce their respective psycholinguistic method and discuss it according to its usefulness and transferability to the Slavic languages The researched languages are mainly Russian and Czech however other languages e g Polish Belarusian or Bulgarian are touched upon as well Main topics are the characteristics of the mental lexicon multilingualism word recognition and sentence comprehension Furthermore several contributions address the issue of verbal aspect and aktionsarten as well as other grammatical categories

The Acquisition of the DP in Modern Greek Theodoros Marinis, 2003-01-01 This book offers new data on the

acquisition of functional categories in early child speech Based on longitudinal corpora of five children acquiring Modern Greek as their first language it describes the development of single DPs consisting of definite and indefinite articles complex DPs that require the use of multiple definite articles possessive constructions appositive constructions and Determiner Spreading a form of adjectival modification and number and case marking in nouns and definite articles Detailed quantitative and qualitative analyses show an incremental development of the DP The findings address the debate concerning maturation versus continuity Incremental acquisition of the DP argues in favour of a weak continuity approach to language acquisition Whilst gradual acquisition of the DP remains unexplained within the Principles and Parameters Theory it is fully compatible within Minimalism as it is argued to result from the gradual acquisition of the features associated with the Greek DP

L2

Acquisition and Creole Genesis Claire Lefebvre, Lydia White, Christine Jourdan, 2006-01-01 In this volume second language L2 acquisition researchers and creolists engage in a dialogue focusing on processes at work in L2 acquisition and creole genesis The volume opens with an overview of the relationship between L2 acquisition and pidgins creoles Siegel The first group of papers addresses current language contact at a societal or an individual level Smith Terrill and Dunn Bruhn de Garavito and Atoche Liceras et al Muller The second section focuses on processes characterizing various stages of L2 acquisition and creole genesis relexification and transfer from the L1 and their role in the initial state Sprouse Schwartz Kouwenberg Aboh Ionin Chapters in the third section discuss processes involved in developing grammars namely reanalysis and restructuring

Sanchez Brousseau and Nikiema Steele and Brousseau The final section concentrates on fossilization and the end state
 Cornips and Hulk Montrul Lardiere Between them the chapters cover lexical morphological phonological semantic and syntactic properties of interlanguage grammars and creole grammars **Linguists of Tomorrow** Kleanthes K. Grohmann, Aljona Shelkova, 2012-04-25 This volume is a selection of papers presented at Linguists of Tomorrow the 1st Cyprus Postgraduate Conference in Theoretical and Applied Linguistics held at the University of Cyprus on 7-8 May 2010 The collection includes nine chapters by postgraduate students of linguistics as well as two illustrious keynote papers by Prof Barbara Lust and Prof Thomas McFadden The topics range from theoretical linguistics syntax semantics morphology and phonology to psycholinguistics first and second language acquisition language impairments and language processing and applied linguistics bilingualism dictionaries writing and ethnolinguistics As such this collection of papers by established as well as up and coming researchers will appeal to a wide range of scholars students and academics alike interested in current issues in linguistics The Acquisition of Diminutives Ineta Savickienė, Wolfgang U. Dressler, 2007-01-18 This cross linguistic volume innovates research of the acquisition of diminutives in the inflecting fusional languages Lithuanian Russian Croatian Greek Italian Spanish German and Dutch the agglutinating languages Turkish Hungarian and Finnish and in the inflecting Hebrew These languages differ in various aspects relevant for the acquisition of diminutives and the development of pragmatics in early child language Diminutive formation often tends to be the first pattern of word formation to emerge The main reason for this seems to lie in the pragmatic functions of endearment empathy and sympathy which make diminutives particularly appropriate for child centred communication A main topic of this book is the relation of emergence and early development between diminutives and other categories of word formation and inflection The greater degree of morphological productivity and transparency as well as phonological saliency favors the use of diminutives In this case diminutives may facilitate the acquisition of inflection **Developmental Psycholinguistics** Irina A. Sekerina, Eva M. Fernández, Harald Clahsen, 2008 How do infants and young children coordinate information in real time to arrive at sentence meaning from the words and structure of the sentence and from the nonlinguistic context This volume introduces readers to an emerging field of research experimental developmental psycholinguistics and to the four predominant methodologies used to study on line language processing in children Authored by key figures in psycholinguistics neuroscience and developmental psychology the chapters cover event related brain potentials free viewing eyetracking looking while listening and reaction time techniques also providing a historical backdrop for this line of research Multiple aspects of experimental design data collection and data analysis are addressed in detail alongside surveys of recent important findings about how infants and children process sounds words and sentences Indispensable for students and researchers working in the areas of language acquisition developmental psychology and developmental neuroscience of language this volume will also appeal to speech language pathologists and early childhood educators **Learner Corpora: Construction and Explorations in**

Chinese and Related Languages Howard Hao-Jan Chen, Keiko Mochizuki, Hongyin Tao, 2023-04-02 This edited book reflects the state of the art in learner corpus and related approaches to Chinese as a second language CSL. CSL as a field has flourished in the past few decades due to the increasingly important role of the Chinese language at the world stage yet studies of Chinese as a second language based on learner corpora have been less well developed due to the limited availability of data and lack of theoretical insights. This book represents the latest research in this area by 1) assembling a large group of active researchers from multiple international research communities (USA, China, Hong Kong, Macau, Japan, Taiwan, and France); 2) discussing the latest resources and technologies in Chinese and other Asian languages learner corpora and corpus building; 3) basing Chinese as a second language studies on data from learners of Chinese with a wide range of first language backgrounds (English, Japanese, Korean, French, among others); and 4) integrating corpus methods with a wide range of related methods in allied fields (language acquisition, usage-based linguistics, psycholinguistics, and neurolinguistics). This comprehensive collection is indispensable for anyone who is interested in corpus approaches to CSL and Chinese applied language studies in general.

Third Language Acquisition and Universal Grammar Yan-kit Ingrid Leung, 2009-01-01 This volume presents studies which approach the relatively new field of third language (L3) acquisition from the generative linguistic perspective. It aims to bring together researchers who are interested in L3 acquisition and who are at the same time working within the generative framework, i.e. Chomsky's Universal Grammar (UG) approach to language acquisition. A total of nine contributions are included, reporting research on L3 involving different combinations of source/target languages and investigating various UG-related properties.

The Acquisition of Direct Object Scrambling and Clitic Placement Jeannette C. Schaeffer, 2000-11-13 This book offers a new contribution to the debate concerning the real-time acquisition of grammar in First Language Acquisition Theory. It combines detailed and quantitative observations of object placement in Dutch and Italian child language with an analysis that makes use of the Modularity Hypothesis. Real-time development is explained by the interaction between two different modules of language, namely syntax and pragmatics. Children need to build up knowledge of how the world works, which includes learning that in communicating with someone else, one must realize that speaker and hearer knowledge are always independent. Since the syntactic feature referentiality can only be marked if this pragmatic distinction is made, and assuming that certain types of object placement, such as scrambling and clitic placement, are motivated by referentiality, it follows that the relevant syntactic mechanism is dependent on the prior acquisition of a pragmatic distinction.

Form-Meaning Connections in Second Language Acquisition Bill VanPatten, Jessica Williams, Susanne Rott, Mark Overstreet, 2004-07-21 This volume addresses theoretical and research domains related to questions of how forms-meaning connections are initiated, processed, and stored, and what internal and external factors may affect these mappings.
