*Storytelling in Organizations* Laurence Prusak, Katalina Groh, Stephen Denning, John Seely Brown, 2012-06-14 This book is the story of how four busy executives from different backgrounds and different perspectives were surprised to find themselves converging on the idea of narrative as an extraordinarily valuable lens for understanding and managing organizations in the twenty first century The idea that narrative and storytelling could be so powerful a tool in the world of organizations was initially counter intuitive But in their own words John Seely Brown Steve Denning Katalina Groh and Larry Prusak describe how they came to see the power of narrative and storytelling in their own experience working on knowledge management change management and innovation strategies in organizations such as Xerox the World Bank and IBM *Storytelling in Organizations* lays out for the first time why narrative and storytelling should be part of the mainstream of organizational and management thinking This case has not been made before The tone of the book is also unique The engagingly personal and idiosyncratic tone comes from a set of presentations made at a Smithsonian symposium on storytelling in April 2001 Reading it is as stimulating as spending an evening with Larry Prusak or John Seely Brown The prose is probing playful provocative insightful and sometime profound It combines the liveliness and freshness of spoken English with the legibility of a ready friendly text Interviews with all the authors done in 2004 add a new dimension to the material allowing the authors to reflect on their ideas and clarify points or highlight ideas that may have changed or deepened over time

McCrank,2022-09-30 This extensive bibliographic essay underpins the entire Tarragona Vortex study by focusing on this arena as one of the most contested frontiers in Western history comparable to Jerusalem in the East for broad issues of Romanization Westernization Islamization and Christianization Its book length chapters treat 1 diverse historiographies from local and Spanish to comparative Mediterranean and Crusade History and especially Ethno historiography and the explanatory concept of frontiers 2 the phenomena of religion conversion and reform and the conditioning agents of Islam and Latin Christianity in practice and adversity 3 religious universalism and violence especially religious war 4 the Crusade and Reconquest paradigms and century long debate 5 the environment on land and sea and setting for this History Although these themes are explored to include due reconsideration but avoid major digressions in its telling about Tarragona and the Tarraconensis they underly so much of Late Antique and Medieval historical research that this discussion pertains to the whole field of historical cultural and religious studies      *Character Theology* Tom Steffen,Ray Neu,2024-02-21 Character Theology provides a natural universal way for the world to engage God through his chosen cast of characters As the media eras continue to change oral to print to digital virtual too many Bible scholars and consequently pastors and Bible teachers in the West and beyond lack capability to effectively communicate Scripture to Millennials Gen Z and Gen Alpha These generations find little if any relevance in the Christianity promoted by those stuck in modernity's sticky abstract systematic theology Character Theology relates sticks and transforms these generations Why Because people grasp and engage God most naturally and precisely through his interaction with biblical

characters and their interaction with each other Characters communicate the Creator s characteristics The roadmap to the recovery and expansion of Christianity in the twenty first century will be through Bible characters      **Intelligent Data**
