set of 21 volumes originally published between 1955 and 1997 amalgamates several topics on the philosophy of education with a particular focus on religious education curriculum studies and critical thinking This collection of books from some of the leading scholars in the field provides a comprehensive overview of the subject and will be of particular interest to students of philosophy education and those undertaking teaching qualifications **Scepticism** Neil Gascoigne,2014-12-18

The history of scepticism is assumed by many to be the history of failed responses to a problem first raised by Descartes While the thought of the ancient sceptics is acknowledged their principle concern with how to live a good life is regarded as bearing little if any relation to the work of contemporary epistemologists In Scepticism Neil Gascoigne engages with the work of canonical philosophers from Descartes Hume and Kant through to Moore Austin and Wittgenstein to show how themes that first emerged in the Hellenistic period are inextricably bound up with the historical development of scepticism Foremost amongst these is the view that scepticism relates not to the possibility of empirical knowledge but to the possibility of epistemological theory This challenge to epistemology itself is explored and two contemporary trends are considered the turn against foundationalist epistemology and towards more naturalistic conceptions of inquiry and the resistance to this on the part of non naturalistically inclined philosophers In contextualizing the debate in this way Gascoigne equips students with a better appreciation of the methodological importance of sceptical reasoning an analytic understanding of the structure of sceptical arguments and an awareness of the significance of scepticism to the nature of philosophical inquiry **Philosophy and Educational Foundations** Allen Brent,2016-09-19

What models in the social sciences underlie existing or proposed patterns of educational practice What theories of knowledge inform such models and thus arguably sanction such practice In this book first published in 1983 the author seeks some tentative answers Wittgenstein s understanding of family resemblance and Chomsky s linguistic universals are interpreted contrary to Hamlyn as reconcilable notions that can both illuminate and refine Hirst s understanding of categorical concepts In the light of such a reformulated theory Brent suggest ways in which a unified model of the social sciences could yield a unified curriculum theory This title will be of interest to students of the philosophy of education and curriculum studies **Signed - Harpers Quine** Pat McIntosh,2004-06-24 **A Companion to the Philosophy of Language** Bob Hale,Crispin Wright,Alexander Miller,2017-02-17
