The Lost Caravel Reexplored:

The Lost Caravel Re-explored Robert Langdon,1988-01-01 **Vanished Islands and Hidden Continents of the Pacific** Patrick D. Nunn,2008-10-31 Islands as well as entire continents are reputed to have disappeared in many parts of the world Yet there is little information on this subject concerning its largest ocean the Pacific Over the years geologists have amassed data that point to the undeniable fact of islands having disappeared in the Pacific a phenomenon that the oral traditions of many groups of Pacific Islanders also highlight There are even a few instances where fragments of Pacific continents have disappeared becoming hidden from view rather than being submerged In this scientifically rigorous yet readily comprehensible account of the fascinating subject of vanished islands and hidden continents in the Pacific the author ranges far and wide from explanations of the region s ancient history to the meanings of island myths Using both original and up to date information he shows that there is real value in bringing together myths and the geological understanding of land movements A description of the Pacific Basin and the ups and downs of the land within its vast ocean is followed by chapters explaining how long before humans arrived in this part of the world islands and continents that no longer exist were once present A succinct account is given of human settlement of the region and the establishment of cultural contexts for the observation of occasional catastrophic earth surface changes and their encryption in folklore The author also addresses the persistent myths of a sunken continent in the Pacific which became widespread after European arrival and were subsequently incorporated into new age and pseudoscience explanations of our planet and its inhabitants Finally he presents original data and research on island disappearances witnessed by humans recorded in oral and written traditions and judged by geoscience to be authentic Examples are drawn from throughout the Pacific showing that not only have islands collapsed and even vanished within the past few hundred years but that they are also liable to do so in the future *Castaway in Paradise* James C. Simmons,1998 *Castaway in Paradise* explores the reality in the myth through the exciting stories of castaways who because of shipwrecks perfidious sea captains or their own choice found themselves true life Robinson Crusoes **The Quest for Origins** K. R. Howe,2003-05-31 Did they come from space from Egypt from the Americas From other ancient civilizations These are some of today s most fanciful claims about the first settlers of the islands of the Pacific But none of them correctly answer the question Where did the Polynesians come from This book is a thoughtful and devastating critique of such new learning and a careful and accessible survey of modern archaeological anthropological genetic and linguistics findings about the origins of Pacific Islanders Professor Howe also examines the two hundred year old history of Western ideas about Polynesian origins in the context of ever changing fads and intellectual fashions *The Cambridge History of the Pacific Islanders* Donald Denoon,2004-03-25 An authoritative and comprehensive history of the Pacific islanders from 40 000 BC to the present day **European Perceptions of Terra Australis** Alfred Hiatt,Christopher Wortham,2016-04-22 *Terra Australis* the southern land was one of the most widespread concepts in European geography

from the sixteenth to the eighteenth centuries although the notion of a land mass in the southern seas had been prevalent since classical antiquity Despite this fact there has been relatively little sustained scholarly work on European concepts of Terra Australis or the intellectual background to European voyages of discovery and exploration to Australia in the eighteenth and nineteenth centuries Through interdisciplinary scholarly contributions ranging across history the visual arts literature and popular culture this volume considers the continuities and discontinuities between the imagined space of Terra Australis and its subsequent manifestation It will shed new light on familiar texts people and events such as the Dutch and French explorations of Australia the Batavia shipwreck and the Baudin expedition by setting them in unexpected contexts and alongside unfamiliar texts and people The book will be of interest to among others intellectual and cultural historians literary scholars historians of cartography the visual arts women s and post colonial studies

Skeletal Biology of the Ancient Rapanui (Easter Islanders) Vincent H. Stefan, George W. Gill, 2016-01-07 Disseminating what is currently known about the skeletal biology of the ancient Rapanui and placing it within the wider context of Polynesian skeletal variation this volume is the culmination of over thirty years of research into the remotely inhabited Easter Island Compiling osteological data deriving from Rapanui skeletal remains into one succinct analysis this book demonstrates how the application of modern skeletal biology research techniques can effectively be employed to address questions of human population origins and microevolution Craniometrics and DNA analysis are used to provide indications as to Rapanui ancestral lineage Evidence is presented in a user friendly manner to allow researchers and graduates to critically analyse the current knowledge of prehistoric Rapanui skeletal variation An important resource providing valuable evidence from human biology that modifies earlier archaeological and cultural anthropological views this book will stimulate further research into the Rapanui

Pākehā Settlements in a Māori World Ian Smith, 2020-01-28 Pākehā Settlements in a Māori World offers a vivid account of early European experience in these islands through material evidence offered by the archaeological record As European exploration in the 1770s gave way to sealing whaling and timber felling Pākehā visitors first became sojourners in small remote camps then settlers scattered around the coast Over time mission stations were established alongside farms businesses and industries and eventually towns and government centres Through these decades a small but growing Pākehā population lived within and alongside a Māori world often interacting closely This phase drew to a close in the 1850s as the numbers of Pākehā began to exceed the Māori population and the wars of the 1860s brought brutal transformation to the emerging society and its economy Archaeologist Ian Smith tells the story of adaptation change and continuity as two vastly different cultures learned to inhabit the same country From the scant physical signs of first contact to the wealth of detail about daily life in established settlements archaeological evidence amplifies the historical narrative Glimpses of a world in

the midst of turbulent change abound in this richly illustrated book As the visual narrative makes clear archaeology brings history into the present making the past visible in the landscape around us and enabling an understanding of complex histories in the places we inhabit Easter Island, Earth Island Paul Bahn, John Flenley, 2017-09-01 Easter Island isolated deep in the South Pacific and now a World Heritage Site was home to a fascinating prehistoric culture one that produced massive stone effigies the moai and the birdman cult and yet much of the island s past remains shrouded in mystery Where did the islanders come from and when How did Rapa Nui culture evolve over the centuries How and why did their natural environment change over time Paul Bahn and John Flenley guide readers through the mysteries and enigmas of Rapa Nui incorporating the records of early explorers folk legends and archaeological evidence along the way They cover the island s geological and environmental history and explore its flora and fauna illustrating how human actions affected the natural environment of the island This fourth edition draws in recent DNA studies of ancient human and animal bones as well as plant remains evolving understandings of how the moai were transported and current efforts to reforest the island
