The Open Work

Edward A. Vazquez

The Open Work:

The Open Work Umberto Eco, 1989 This book is significant for its concept of openness the artist's decision to leave arrangements of some constituents of a work to the public or to chance and for its anticipation of two themes of literary theory the element of multiplicity and plurality in art and the insistence on literary response as an interaction between reader and text

Meredith, 2015-07-31 Presents a diachronic investigation providing a rich case study as well as an approach tracing the contours of a category of Roman material culture defined by the Roman period technique of openwork carving This work shows how openwork vessels are a reflection of a wide reaching Roman cultural aesthetic

Openwork André Du Bouchet, 2014-01-01 A career retrospective of poetry and prose works by one of the under recognized giants of French literature Andr du Bouchet a great innovator of twentieth century letters has yet to be fully recognized by a wide circle of international readers This inviting volume sets out to remedy the oversight introducing a selection of du Bouchet's poetry and prose to English language readers through the brilliant translations of Paul Auster and Hoyt Rogers Openwork showcases pieces from the author's entire trajectory beginning with little known pieces from the

1950s followed by major poems from the 1960s and concluding with works written or rewritten in the poet's later decades. Throughout his life du Bouchet devoted himself to long walks in his beloved French countryside jotting down entries in notebooks as he rambled. These notebooks more than one hundred all together have emerged as signal works in their own right and their musings are well represented in this anthology.

Transnational Perspectives on the Art of Piero Manzoni and Hélio Oiticica Lara Demori, 2025-08-26. Establishing a missed link between the work of Piero Manzoni and Hélio Oiticica and their respective cultural contexts, this book sheds new light on overlooked aspects of these two artists' practices, particularly focusing on the shift from painting to performance in the long 1960s. Lara Demori envisions a transnational juxtaposition, a conceptual dialogue that discloses overlooked resonances between the work and the *modus operandi* of both artists, repositioning claims of national exceptionalism within a web of constellated practices. This book proposes their oeuvre as heterogeneous critical models to unpack categories of thought used to analyse the postwar decades: Tabula Rasa, Anti Art, Open Work, and self-Marginalisation and Freedom. These in turn are charged with specific histories and offer new paradigms for the formal and social inventions perpetuated by the art of Manzoni, Oiticica, and fellow artists in the context of the *d* tournaments that crossed the 1960s on a global scale. This book will be of interest to scholars working in art history, modernism, and post-modernism, Italian studies, and Brazilian studies.

Nervous Systems Johanna Gosse, Timothy Stott, 2021-11-02. The contributors to *Nervous Systems* reassess contemporary artists and critics' engagement with social, political, biological, and other systems as a set of complex and relational parts, an approach commonly known as systems thinking. Demonstrating the continuing relevance of systems aesthetics within contemporary art, the contributors highlight the ways that artists adopt systems thinking to address political, social, and ecological anxieties. They cover a wide range of artists and topics, from the performances of the Argentinian collective the Rosario Group and the grid drawings of Charles Gaines to the video art of Singaporean artist Charles Lim and the mapping of global logistics infrastructures by contemporary artists like Hito Steyerl and Christoph Büchel. Together, the essays offer an expanded understanding of systems aesthetics in ways that affirm its importance beyond technological applications, detached from cultural contexts.

The United Stories of America Rolf Lundén, 2022-06-08. This book discusses the American short story composite or short story cycle, a neglected form of writing consisting of autonomous stories interlocking into a whole. The critical work done on this genre has so far focused on the clausal strategies of the composites on how unity is accomplished in these texts. This study takes into consideration to a

greater degree than earlier criticism the short story composite as an open work emphasizing the tension between the independent stories and the unified work between the discontinuity and fragmentation on the one hand and the totalizing strategies on the other The discussion of the genre is illustrated with references to numerous American short story composites

Reworking the Ballet Vida L. Midgelow, 2007-11-13 Challenging and unsettling their predecessors modern
choreographers such as Matthew Bourne Mark Morris and Masaki Iwana have courted controversy and notoriety by
reimagining the most canonical of Classical and Romantic ballets In this book Vida L Midgelow illustrates the ways in which
these contemporary reworkings destroy and recreate their source material turning ballet from a classical performance to a
vital exploration of gender sexuality and cultural difference Reworking the Ballet Counter Narratives and Alternative Bodies
articulates the ways that audiences and critics can experience these new versions viewing them from both practical and
theoretical perspectives including eroticism and the politics of touch performing gender cross casting and cross dressing

original maps the aural and discursive terrain of vanguard music today Rather than offering a history of contemporary music
Audio Culture traces the genealogy of current musical practices and theoretical concerns drawing lines of connection
between recent musical production and earlier moments of sonic experimentation It aims to foreground the various rewirings
of musical composition and performance that have taken place in the past few decades and to provide a critical and
theoretical language for this new audio culture This new and expanded edition of the Audio Culture contains twenty five
additional essays including four newly commissioned pieces Taken as a whole the book explores the interconnections among
such forms as minimalism indeterminacy musique concrète free improvisation experimental music avant rock dub reggae
ambient music hip hop and techno via writings by philosophers cultural theorists and composers Instead of focusing on some
crossover between high art and popular culture Audio Culture takes all these musics as experimental practices on par with
and linked to one another While cultural studies has tended to look at music primarily popular music from a sociological
perspective the concern here is philosophical musical and historical Audio Culture includes writing by some of the most
important musical thinkers of the past half century among them John Cage Brian Eno Ornette Coleman Pauline Oliveros
