Twentieth-Century Organ Music Christopher S. Anderson, 2013-06-17 This volume explores twentieth century organ music through in depth studies of the principal centers of composition the most significant composers and their works and the evolving role of the instrument and its music The twentieth century was a time of unprecedented change for organ music not only in its composition and performance but also in the standards of instrument design and building Organ music was anything but immune to the complex musical intellectual and socio political climate of the time Twentieth Century Organ Music examines the organ's repertory from the entire period contextualizing it against the background of important social and cultural trends In a collection of twelve essays experienced scholars survey the dominant geographic centers of organ music France the Netherlands Scandinavia the United States and German speaking countries and investigate the composers who made important contributions to the repertory Reger in Germany Messiaen in France Ligeti in Eastern and Central Europe Howells in Great Britain Twentieth Century Organ Music provides a fresh vantage point from which to view one of the twentieth century's most diverse and engaging musical spheres *Lutheran Churches in Early Modern Europe* Andrew Spicer, 2016-12-05 Until recently the impact of the Lutheran Reformation has been largely regarded in political and socio economic terms yet for most people it was not the abstract theological debates that had the greatest impact upon their lives but what they saw in their parish churches every Sunday This collection of essays provides a coherent and interdisciplinary investigation of the impact that the Lutheran Reformation had on the appearance architecture and arrangement of early

modern churches Drawing upon recent research being undertaken by leading art historians and historians on Lutheran places of worship the volume emphasises often surprising levels of continuity reflecting the survival of Catholic fixtures fittings and altarpieces and exploring how these could be remodelled in order to conform with the tenets of Lutheran belief The volume not only addresses Lutheran art but also the way in which the architecture of their churches reflected the importance of preaching and the administration of the sacraments Furthermore the collection is committed to extending these discussions beyond a purely German context and to look at churches not only within the Holy Roman Empire but also in Scandinavia the Baltic States as well as towns dominated by Saxon communities in areas such as in Hungary and Transylvania By focusing on ecclesiastical material culture the collection helps to place the art and architecture of Lutheran places of worship into the historical political and theological context of early modern Europe
