Rhodes, 2021-12-28 In this book Rhodes provides a nonevaluative account of coercion He begins with a thorough discussion of the charge that coercion is an essentially contested concept He argues that effective communication of regulations pertaining to human conduct requires a basic level of clarity as to the kind of conduct being regulated Accordingly he argues that before we prescribe or proscribe conduct we should describe it In short he maintains that wherever possible description should precede prescription and proscription Rhodes begins his descriptive project by providing a fundamental account of human motivation Upon this foundation he supports his distinctions between threats offers thoffers and neutral proposals He argues that all coercion claims can be understood in light of these components He applies this analysis to three prominent accounts of coercion as advanced by F A Hayek Harry Frankfurt and Robert Nozick After comparing and contrasting these views Rhodes provides his own account Rhodes s account is based

upon the identification of what he refers to as perceived threat avoidance behavior as a necessary condition for coercion As a descriptive or nonevaluative account Rhodes is able to identify coercion independent from normative judgments He argues that it is not the wrongfulness of some conduct that makes it coercion instead it is the coerciveness of some conduct that makes it wrong Unique to Rhodes s account coercion is not necessarily wrong As a descriptive account his view permits an independent analysis of the moral status of an act of coercion The book concludes with a discussion of the normatively significant variables of a coercion claim

The Eclipse of the Demos Kyong-Min Son, 2020-04-30 As populism presaging authoritarianism surges worldwide and political rights and civil liberties erode pundits politicians and political scientists agree democracy is in crisis But where many blame the rise of neoliberalism Kyong Min Son suggests that a longer historical perspective is in order His book The Eclipse of the Demos traces the crisis of democracy back to a fateful transformation of democratic theory during the Cold War when the idea of the demos a public body configured for the common good gave way to a view of democracy as an instrument used by individuals to serve their private interests While the postwar pressures of totalitarianism and communism did not directly cause this transformation Son contends that they did activate instrumental democracy s three constitutive motifs fear of the masses faith in rational systemic management and an ambivalence about the relationship between capitalism and democracy Forged of these elements drawn from disparate intellectual traditions instrumental democracy displaced a citizenry disposed to judge

competing public claims according to the principles of the common good and political equality In the instrumental model citizens are seen as consumers whose political claims are equivalent simply because each is willing to pay the same price a vote It is this transactional view of democracy Son argues that led to the unchallenged dominance of finance capital and growing social divisions that have fueled the rise of neoliberalism The Eclipse of the Demos envisions an answer to our present predicament a democracy that rests on a demos engaging in collective inquiry and judgment rather than on a group of individuals concerned exclusively with their private welfare By providing a clearer understanding of democracy before neoliberalism this book begins the hard work of realizing that vision *The Social Responsibilities of Business* Morrell Heald, 2018-04-27 The concept of the social responsibility of business has roots in the Puritan doctrine of stewardship as well as the nineteenth century gospel of wealth but business leaders only began to consider community welfare as a whole in the context of their corporate aspirations of the latter half of the twentieth century Originally appearing in 1970 The Social Responsibilities of Business surveys the history of corporate actions in pursuit of social responsibility and attempts to assess likely developments Reissued in 1988 by Transaction with a new introduction by the author and now available in paperback the volume provides Morrell Heald the opportunity to evaluate his earlier predictions and identify prospects for further development in the area of corporate social responsibility Some of Heald's predictions have not yet come to fruition and he reflects upon the reasons No effective structure yet exists to permit an open exchange of views and needs between business and representatives of its various constituencies In addition two of Heald's earlier suggestions have not taken root in the way he anticipated the company foundation and the corporate social audit and he assesses why they have not and what opportunities they still provide The Social Responsibilities of Business provides essential back ground for understanding the developing social role of the corporation and for assessing its future direction **Comparative Socialist Systems** Carmelo Mesa-Lago, Carl Beck, 2010-11-23 The editors have merged work from two disciplines economics and political science in a summary conclusion a sociologist suggests possible extensions in the comparison of socialist systems for the future contributes generously to the field Slavic Review **War and Change in World Politics** Robert Gilpin, 1981 Professor Gilpin uses history sociology and economic theory to identify the forces causing change in the world order The Science of Synthesis Debora Hammond, 2011-05-18 Debora Hammond's The Science of Synthesis explores the development of general systems theory and the individuals who gathered together around that idea to form the Society for General Systems Research In examining the life and work of the SGSR's five founding members Ludwig von Bertalanffy Kenneth Boulding Ralph Gerard James Grier Miller and Anatol Rapoport Hammond traces the emergence of systems ideas across a broad range of disciplines in the mid twentieth century Both metaphor and framework the systems concept as articulated by its earliest proponents highlights relationship and interconnectedness among the biological ecological social psychological and technological dimensions of our increasingly complex lives Seeking to transcend the reductionism and mechanism of classical science

which they saw as limited by its focus on the discrete component parts of reality the general systems community hoped to complement this analytic approach with a more holistic orientation As one of many systems traditions the general systems group was specifically interested in fostering collaboration and integration among different disciplinary perspectives with an emphasis on nurturing more participatory and truly democratic forms of social organization The Science of Synthesis documents a unique episode in the history of modern thought one that remains relevant today This book will be of interest to historians of science system thinkers scholars and practitioners in the social sciences management organization development and related fields as well as the general reader interested in the history of ideas that have shaped critical developments in the second half of the twentieth century *In Search of an Integrative Vision for Technology* Sytse Strijbos, Andrew Basden, 2006-06-22 In Search Of An Integrative Vision For Technology will stimulate its readers to consider the whole story that is information systems within the context of an integrative vision of technology It integrates disparate areas of debate and research while appreciating the contribution that philosophy can make to such thinking It is deliberately broad in coverage and designed to provide useful pointers so that researchers students practitioners and developers can easily apply each point as needed Human issues of technology and their normative aspects is a theme that runs throughout the entire book The integrative vision is centered on an understanding of human practice the twin notions of structure and direction and the leading and the founding functions of such practice While this understanding applies to all technologies it is worked out in more detail for information technology From this philosophical understanding many interdisciplinary areas of interest are identified
