The Origin Of British Field Systems An Interpretation:

The Origin of British Field Systems Robert A. Dodgshon, 1980 **Field Systems and Farming Systems in Late Medieval England** Bruce M.S. Campbell, 2023-05-31 The later Middle Ages was an overwhelmingly rural world with probably three out of four households reliant upon farming for a living Yet conventional accounts of the period rarely do justice to the variety of ways in which the land was managed and worked The thirteen essays collected in this volume draw upon the abundant documentary evidence of the period to explore that diversity In the process they engage with the issue of classification without which effective generalisation is impossible and offer a series of solutions to that particularly thorny methodological challenge Only through systematic and objective classification is it possible to differentiate between and map different field systems husbandry types and land use categories That in turn makes it possible to consider and evaluate the relative roles of soils and topography institutional structures and commercialised market demand in shaping farm enterprise both during the period of mounting population before the Black Death and the long era of demographic decline that followed it What emerges is an agrarian world more commercialised differentiated and complex than is usually appreciated whose institutional and agronomic contours shaped the course of agricultural development for centuries to come **Interpreting the Landscape** Michael Aston, 2002-09-11 Most places in Britain have had a local history written about them Up until this century these histories have addressed more parochial issues such as the life of the manor rather than explaining the features and changes in the landscape in a factual manner Much of what is visible today in Britain's landscape is the result of a chain of social and natural processes and can be interpreted through fieldwork as well as from old maps and documents Michael Aston uses a wide range of source material to study the complex and dynamic history of the countryside illustrating his points with aerial photographs maps plans and charts He shows how to understand the surviving remains as well as offering his own explanations for how our landscape has evolved *The Great Meadow* Brian Donahue, 2004-01-01 In *The Great Meadow* Brian Donahue examines the farming practices of the early settlers at Concord in Massachusetts He argues against the long held belief that these farmers used methods that degraded the land shows how the Concord community in fact achieved a successful sustainable system Studies of Field Systems in the British Isles Alan R. H. Baker, 1973-07-19 An enormous amount of research into British field systems has been undertaken by historical geographers economic historians and others since H L Gray's classic work on English Field Systems was published This book both synthesizes and advances our knowledge of field systems in the British Isles **Historical Geography of England and Wales** Robert A. Dodgshon, Robin A. Butlin, 2013-10-22 This text has been designed to cover all aspects and phases of the historical geography of England and Wales in a single volume In its substantially revised and enlarged form the treatment of standard themes has been completely re-written to take account of recent work and shifts in viewpoint while its overall coverage has been extended to embrace newer themes like symbolic landscapes and the geography of the inter-war period Its

comprehensiveness and freshness of approach ensure its continuing value and success as a text Breadth of coverage from prehistory to 1939 Uses a range of data sources and approaches Well illustrated with particular emphasis on key themes Major revision of 1st edition with much wider range of topics

The English Peasantry and the Growth of Lordship Rosamond Faith, 1999-04-01 This account of the changing relationship between lords and peasants in medieval England challenges many received ideas about the origins of the manor the status of the Anglo Saxon peasantry the 12th century economy and the origins of villeinage The author covers the period from the end of the Roman empire to the late 12th century tracing in post Conquest society the continuing influence of developments which originated in Anglo Saxon England Drawing on work in archaeology and landscape studies as well as on documentary sources the book describes a fundamental division within the peasantry that between the very dependent tenants and agricultural workers on the inland of the estates of ministers kinds and lords and the more independent peasantry of the warland The study leads to the expression of views on many aspects of the development of society in the period

Historical Geography: Progress and Prospect Michael Pacione, 2013-01-11 Historical geography has been a major area of activity in recent years Much of the recent work and research findings have been extremely valuable to historians and archaeologists and as background to the study of contemporary geography This reissue first published in 1987 presents an overview of contemporary developments in all the major branches of the discipline As such it provides a valuable introduction to the subject a review of the latest state of the art and a pointer to future research directions

The End of Roman Britain Michael E. Jones, 1998 Jones offers a lucid and thorough analysis of the economic social military and environmental problems that contributed to the failure of the Romans drawing on literary sources and on recent archaeological evidence

The Landscape Archaeology of Anglo-Saxon England N. J. Higham, Martin J. Ryan, 2010 The Anglo Saxon period was crucial to the development of the English landscape but is rarely studied The essays here provide radical new interpretations of its development Traditional opinion has perceived the Anglo Saxons as creating an entirely new landscape from scratch in the fifth and sixth centuries AD cutting down woodland and bringing with them the practice of open field agriculture and establishing villages Whilst recent scholarship has proved this simplistic picture wanting it has also raised many questions about the nature of landscape development at the time the changing nature of systems of land management and strategies for settlement The papers here seek to shed new light on these complex issues Taking a variety of different approaches and with topics ranging from the impact of coppicing to medieval field systems from the representation of the landscape in manuscripts to cereal production and the type of bread the population preferred they offer striking new approaches to the central issues of landscape change across the seven centuries of Anglo Saxon England a period surely foundational to the rural landscape of today

decade of research for English Heritage's Monuments Protection programme The Atlas defines the varied regional character of England's rural settlement and the former distribution of cleared land wooded land and open pastures a quilt with origins dating from one or two thousand years ago or more This volume explores some of the complex interactions and negotiations between the physical and cultural factors that underlie both national patterns and local and regional contrasts

Farming in the First Millennium AD P. J. Fowler, 2002-11-14 Peter Fowler has written an authoritative account of farming in Britain in the first millennium AD This is the first synthesis of our knowledge on this topic for a generation Successive chapters assemble and analyse the latest evidence on farms fields technology food diet and society New interpretations are offered on subjects ranging from implements to illuminated manuscripts and evidence drawn from Northern England Scotland and Wales contributes significantly to the story The book concludes with a magisterial review of the ways in which agriculture shaped early Britain's societies and landscapes It also proposes a chronological model of British agriculture for the whole millennium

Making a Living in the Middle Ages Christopher Dyer, 2003-08-11 Dramatic social and economic change during the middle ages altered the lives of the people of Britain in far reaching ways from the structure of their families to the ways they made their livings In this masterly book preeminent medieval historian Christopher Dyer presents a fresh view of the British economy from the ninth to the sixteenth century and a vivid new account of medieval life He begins his volume with the formation of towns and villages in the ninth and tenth centuries and ends with the inflation population rise and colonial expansion of the sixteenth century This is a book about ideas and attitudes as well as the material world and Dyer shows how people regarded the economy and responded to economic change He examines the growth of towns the clearing of lands the Great Famine the Black Death and the upheavals of the fifteenth century through the eyes of those who experienced them He also explores the dilemmas and decisions of those who were making a living in a changing world from peasants artisans and wage earners to barons and monks Drawing on archaeological and landscape evidence along with more conventional archives and records the author offers here an engaging survey of British medieval economic history unrivaled in breadth and clarity

British Economic and Social History R. C. Richardson, William Henry Chaloner, 1996

Tradition and Transformation in Anglo-Saxon England Susan Oosthuizen, 2013-05-09 Most people believe that traditional landscapes did not survive the collapse of Roman Britain and that medieval open fields and commons originated in Anglo-Saxon innovations unsullied by the past The argument presented here tests that belief by contrasting the form and management of early medieval fields and pastures with those of the prehistoric and Roman landscapes they are supposed to have superseded The comparison reveals unexpected continuities in the layout and management of arable and pasture from the fourth millennium BC to the Norman Conquest The results suggest a new paradigm the collective organisation of agricultural resources originated many centuries

perhaps millennia before Germanic migrants reached Britain In many places medieval open fields and common rights over pasture preserved long standing traditions for organising community assets In central southern England a negotiated compromise between early medieval lords eager to introduce new managerial structures and communities as keen to retain their customary traditions of landscape organisation underpinned the emergence of nucleated settlements and distinctive highly regulated open fields

Interpreting the English Village Mick Aston, Christopher Gerrard, 2013-02-07 An original and approachable account of how archaeology can tell the story of the English village Shapwick lies in the middle of Somerset next to the important monastic centre of Glastonbury the abbey owned the manor for 800 years from the 8th to the 16th century and its abbots and officials had a great influence on the lives of the peasants who lived there It is possible that abbot Dunstan one of the great reformers of tenth century monasticism directed the planning of the village The Shapwick Project examined the development and history of an English parish and village over a ten thousand year period This was a truly multi disciplinary project Not only were a battery of archaeological and historical techniques explored such as field walking test pitting archaeological excavation aerial reconnaissance documentary research and cartographic analysis but numerous other techniques such as building analysis dendrochronological dating and soil analysis were undertaken on a large scale The result is a fascinating study about how the community lived and prospered in Shapwick In addition we learn how a group of enthusiastic and dedicated scholars unravelled this story As such there is much here to inspire and enthuse others who might want to embark on a landscape study of a parish or village area Seven of the ten chapters begin with a fictional vignette to bring the story of the village to life Text boxes elucidate re occurring themes and techniques Extensively illustrated in colour including 100 full page images
