The Origin Of Modern Humans And The Impact Of Chronometric Dating A Discussion:

The Origin of Modern Humans and the Impact of Chronometric Dating Martin Jim Aitken, Chris B. Stringer, Paul A. Mellars, 2014-07-14 This volume of papers delivered to The Royal Society in February of 1992 explores the debate over the single center hypothesis of human origins versus multi regional evolution Over the last five years there has been growing support for a recent Out of Africa origin of modern humans based on fresh interpretations of the palaeoanthropological and archaeological evidence new applications of physical dating techniques to important sites and a greatly increased genetic data base on recent human variation and its geographical patterning But there has also been a parallel growth of doubts about interpretations of the new evidence from some workers This book provides a review of recent progress and allows some of these doubts to be aired and discussed In addition to the editors the contributors are O Bar Yosef A M Bowcock P Brown H J Deacon L L Cavalli Sforza J D Clark R Gr n J J Hublin A A Lin G H Miller J L Mountain H P Schwarcz N J Shackleton F H Smith and M Stoneking Originally published in 1993 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **The Origin of Modern Humans and the Impact of Chronometric Dating** Royal Society (Great Britain), 1992 Bev lkerungsgeschichte Anthropologie Einzelfund **The Origin of Modern Humans and the Impact of Chronometric Dating** Martin Jim Aitken, C. B. Stringer, P. A. Mellars, 1992 *African Exodus* Chris Stringer, Robin McKie, 2015-07-14 A Choice Outstanding Academic Book A Library Journal Best Sci Tech Book A New York Times Notable Book Once in a generation a book such as African Exodus emerges to transform the way we see ourselves This landmark book which argues that our genes betray the secret of a single racial stock shared by all of modern humanity has set off one of the most bitter debates in contemporary science We emerged out of Africa the authors cont less than 100 000 years ago and replaced all other human populations Employing persuasive fossil and genetic evidence the proof is in the blood not just the bones and an exceptionally readable style Stringer and McKie challenge long held beliefs that suggest we evolved separately as different races with genetic roots reaching back two million years **Neandertals and Modern Humans in Western Asia** Takeru Akazawa, Kenichi Aoki, Ofer Bar-Yosef, 2005-12-27 In this fascinating volume the Middle Paleolithic archaeology of the Middle East is brought to the current debate on the origins of modern humans These collected papers gather the most up to date archaeological discoveries of Western Asia a region that is often overshadowed by African or European findings but the only region in the world where both Neandertal and early modern human fossils have been found The collection includes reports on such well known cave sites as Kebara Hayonim and Qafzeh among others The information and interpretations available here are a must

for any serious researcher or student of anthropology or human evolution The Human Career Richard G. Klein,2024-05-31 Since its publication in 1989 The Human Career has proved to be an indispensable tool in teaching human origins This substantially revised third edition retains Richard G Klein s innovative approach while showing how cumulative discoveries and analyses over the past ten years have significantly refined our knowledge of human evolution Klein chronicles the evolution of people from the earliest primates through the emergence of fully modern humans within the past 200 000 years His comprehensive treatment stresses recent advances in knowledge including for example ever more abundant evidence that fully modern humans originated in Africa and spread from there replacing the Neanderthals in Europe and equally archaic people in Asia With its coverage of both the fossil record and the archaeological record over the 2.5 million years for which both are available The Human Career demonstrates that human morphology and behavior evolved together Throughout the book Klein presents evidence for alternative points of view but does not hesitate to make his own position clear In addition to outlining the broad pattern of human evolution The Human Career details the kinds of data that support it For the third edition Klein has added numerous tables and a fresh citation system designed to enhance readability especially for students He has also included more than fifty new illustrations to help lay readers grasp the fossils artifacts and other discoveries on which specialists rely With abundant references and hundreds of images charts and diagrams this new edition is unparalleled in its usefulness for teaching human evolution **The Oasis Papers 2** Marcia F. Wiseman,2017-02-20 This volume of fourteen papers covers the environment archaeology and conservation of the Dakhleh Oasis as presented at the Second International Conference of this long running project held in Toronto 1997 Four abstracts from papers not submitted to the published volume are also included as is the original conference program **Michigan Discussions in Anthropology** ,2006 Earth Sciences and Archaeology Paul Goldberg,Vance T. Holliday,C. Reid Ferring,2013-11-11 Earth Sciences and Archaeology brings together contributions from an experienced group of archaeologists and geologists whose common objective is to present thorough and current reviews of the diverse ways in which methods from the earth sciences can contribute to archaeological research Many areas of research are addressed here including artifact analysis and sourcing landscape reconstruction and site formation analysis soil micromorphology and geophysical exploration of buried sites Archaeology has benefited from geological methods in many ways in recent decades However in the past ten to twenty years this informal collaboration between geologists and archaeologists has grown into a formal integration of earth science and archaeology on a significant scale This book allows the contributors to assess where we are in terms of interdisciplinary research which approaches work best in specific situations and where this collaborative approach should progress to in the future **The Archaeology of Human Ancestry** Stephen Shennan,James Steele,2005-08-15 Human social life is constrained and defined by our cognitive and emotional dispositions which are the legacy of our foraging ancestors But how difficult is it to reconstruct the social systems and cultural traditions of those

ancestors The Archaeology of Human Ancestry provides a stimulating and provocative answer in which archaeologists and biological anthropologists set out and demonstrate their reconstructive methods Contributors use observations of primates and modern hunter gatherers to illuminate the fossil and artefactual records Thematic treatment covers the evolution of group size group composition and the emotional structure of social bonds sexual dimorphism and the sexual division of labour and the origins of human cultural traditions The Archaeology of Human Ancestry is an essential introduction to the subject for advanced undergraduates and researchers in archaeology and biological anthropology It will also be used by workers in psychology sociology and feminist studies as a resource for understanding human social origins

Human Paleobiology Robert B. Eckhardt, 2000-09-28 Human Paleobiology provides a unifying framework for the study of human populations both past and present to a range of changing environments It integrates evidence from studies of human adaptability comparative primatology and molecular genetics to document consistent measures of genetic distance between subspecies species and other taxonomic groupings These findings support the interpretation of the biology of humans in terms of a smaller number of populations characterised by higher levels of genetic continuity than previously hypothesised Using this as a basis Robert Eckhardt then goes on to analyse problems in human paleobiology including phenotypic differentiation patterns of species range expansion and phyletic succession in terms of the patterns and processes still observable in extant populations This book will be a challenging and stimulating read for students and researchers interested in human paleobiology or evolutionary anthropology

Constructed Ecologies Margaret Grose, 2017-03-16 Today designers are shifting the practice of landscape architecture towards the need for a more complex understanding of ecological science Constructed Ecologies presents ecology as critical theory for design and provides major ideas for design that are supported with solid and imaginative science In the questioning narrative of Constructed Ecologies the author discards many old and tired theories in landscape architecture With detailed documentation she casts off the savannah theory critiques the search for universals reveals the needed role of designers in large scale agriculture abandons the overlay technique of McHarg and introduces the ecological and urban health urgency of public night lighting Margaret Grose presents wide ranging new approaches and shows the importance of learning from science for design of going beyond assumptions of working in multiple rather than single issues of disrupting linear design thinking and of dealing with data This book is written with a clear voice by an ecologist and landscape architect who has led design students into loving ecological science for the support it gives design

American Book Publishing Record Cumulative 1993 R R Bowker Publishing, 1994-03 Cited in BCL3 Sheehy and Walford Compiled from the 12 monthly issues of the ABPR this edition of the annual cumulation lists by Dewey sequence some 41 700 titles for books published or distributed in the US Entry information is derived from MARC II tapes and books submitted to R R Bowker an

[Encyclopedia of Caves and Karst Science](#) John Gunn, 2004-08-02 The Encyclopedia of Caves and Karst Science contains 350 alphabetically arranged entries The topics include cave and karst geoscience cave

archaeology and human use of caves art in caves hydrology and groundwater cave and karst history and conservation and management The Encyclopedia is extensively illustrated with photographs maps diagrams and tables and has thematic content lists and a comprehensive index to facilitate searching and browsing
