

A livable and lovable city?*

The Philips Livable Cities think tank believes that **livable cities are successful cities. They have identified three important and interlinked ingredients of a livable city:**

Resilience

focuses on adaptability, flexibility and balance. It is about the ability of a city to "invent" or "re-invent" itself through shocks and stresses, to harmoniously accommodate old and new values, and to adapt the functions and requirements of the city. It illustrates a city's capacity to balance continuity with change, heritage and innovation, natural spaces and the urban environment to the benefit of its inhabitants.

Inclusiveness

is about creating social integration and cohesion. Inclusive cities are open for participation from the widest range of civil society, irrespective of gender, age, ethnicity, cultural heritage, beliefs, religion and economic status. Inhabitants should have equal opportunities to participate in the activities of a city. Inclusiveness enhances community feelings, the sense of ownership towards the city, the sense of belonging to a place.

Authenticity

is the ability to maintain the local character of the city, the local heritage, culture and environment. At the same time, a city needs to accommodate social, economic and technological changes – and evolve itself. This evolution needs to be sustainable and match the expectations of the citizens.

*Livable cities (Insight Series) based on a concept by Dorine Pothuis, Anne Grootenboer, Tessa, the members of the think tank meeting in September 2010/2011.

The Philips Center for Health & Well-being is focused on improving the lives of people around the world. The Insight Series shares the work-in-progress of the think tanks operating within The Philips Center for Health & Well-being. Through illustrating a snapshot or a concept, they are aimed at stimulating discussion and debate around critical challenges in improving health & well-being worldwide.
