The Lopsided Miracle:

Louisanna and the Lopsided Kingdom Myra F. Dingle, 2012-07-31 Louisanna lives with her grandmother Nimee in a huge house on a lonely northern island. Her only companion is her nanny Cerena who has come to realize that Louisanna has inherited her grandmothers second sight. Louisanna is drawn by a force she does not understand to climb the green hill near their house. Once Louisanna reaches the top of the green hill she finds herself in another time and place in a kingdom where Satan is all powerful and nothing is as it should be. Everyone she meets seems to have been expecting her and even though she does not understand why she courageously takes on Satan and his minions with the help of many strange and interesting creatures and beings she has met along the way. Little does Louisanna know that Satan has plans for her that include a journey through the very heart of his darkest realms and to use her as a ploy in his plan to once again make himself higher than God.

Growth Without Miracles Ross Garnaut, Yiping Huang, 2001 China's economic reform constitutes one of the most remarkable events of the second half of the twentieth century. It not only significantly improved the living conditions of the Chinese population but also provides a useful model of economic transition from central planning to a market economy. The gradual approach to reform adopted by the Chinese was widely regarded as suboptimal and likely to fail when compared to the shock therapy method applied in the former Soviet Union and the Eastern European economies. But China has outperformed other transitional economies. To many observers the Chinese experience is either a myth or a miracle. This volume addresses key questions about the initial economic foundations, the reform of macroeconomic policies and macroeconomic stability, the achievements of agricultural reform and the agricultural policy choices facing the Chinese government, the unique characteristics of the township and village enterprises, the successful reform of the state-owned enterprises, the development of factor markets, the contributions of the external sectors to economic growth, the lessons of the Chinese experience for transitional economies and the challenges for economic theory. *Growth without Miracles* brings together thirty widely cited articles by prominent economists in the field of China studies to offer authoritative and thorough assessment and analyses of China's experience during the reform period. It provides a complete story for teachers and students of courses on the Chinese economy and will be of considerable interest to researchers, officials and business people who want to understand past experiences, current problems and the future direction of the Chinese economy.
