Current Catalog National Library of Medicine (U.S.), First multi year cumulation covers six years 1965 70 **Male Fertility and Infertility** T. D. Glover, C. L. R. Barratt, 2009-03-19 This contemporary account of male fertility provides a much needed bridge between those seeking to understand the subject from an evolutionary and biological perspective and those with clinical responsibility for the investigation and treatment of infertility Accordingly the first half of the book deals with the evolutionary aspects of male reproduction and sperm competition sperm production and delivery in man and other animals spermatogenesis and epididymal function sperm transport in the female tract and the apparent decline in human sperm count The second part of the book puts greater emphasis on clinical problems and opens with a discussion of intracytoplasmic sperm injection its value and limitations This is followed by a review of modern developments in the genetics of male fertility and proceeds to a further chapter on the role of surgical procedures used in the treatment Semen analysis is critically reviewed and the molecular techniques now being used in preimplantation diagnosis and in the study of mitochondrial inheritance are fully described Taken together these chapters written by an international team of authors illustrate the breadth of vision needed to tackle the problem of male fertility **Disturbances in Male Fertility** K. Bandhauer, G. Bartsch, J. Frick, D.M. de Kretser, A. Eshkol, M. Glezerman, J.B. Kerr, B. Lunenfeld, W. Pödlinger, H.P. Rohr, F. Scharfetter, P.D. Temple-Smith, 2012-12-06 Impending famine and a terrifying rate of consumption of natural resources are vital issues which have focussed public interest in the ecologic social and political problems of ever increasing overpopulation in many countries of the world As well as the vast material and intellectual expenditure lavished on family planning and birth control the past decade has seen an immense research effort in the elaboration of improved methods of fertility control both for men and for women During the same period however research into the causes of male fertility disorders has proceeded with equal intensity and a number of promising therapeutic approaches have become the subject of

clinical trials The wish of an individual or of a couple to have offspring is an absolute which requires no further justification and there can be few challenges to a physician as essential as the spouses predicament in a childless marriage Only with a special knowledge of the function pathology and pathophysiology of the reproductive system is he properly equipped to meet that challenge Male Reproductive Function and Semen T. Mann,C. Lutwak-Mann,2012-12-06 To present a coherent and meaningful survey of scientific research endeavour in an area that has expanded as fast as physiology and biochemistry of reproduction in the male is no mean task these days No less prodigious than the growth of knowledge of male reproductive function has been the rate at which the outpouring of publications on this subject has continued since the appearance of The Biochemistry of Semen and of the Male Reproductive Tract in 1964 Since cyclopaedic treatment of this vast literature did not appeal to us we have made no attempt either to rehash the material contained in that book or to enlarge the bibliography beyond the nearly 3500 references included in the present treatise At the same time whilst writing we felt strongly that to advance it is necessary to understand the past and for this reason we have not hesitated to refer especially in the introductory chapter to a number of those fundamental early discoveries in which today s knowledge is deeply and firmly rooted **Treatment of Male Infertility** J. Bain,Wolf-Bernhard Schill,L. Schwarzstein,2012-12-06 Our insight into the mechanisms of the physiology of reproduction has experienced a swift and constant development these last few years The advent of more sophisticated diagnostic methods and their relatively easy clinical application allow for the incorporation of that knowledge into the evaluation of the infertile couple These facts together with an obvious change in social psychology have facilitated the development of different specialities dealing with the problems of infertility It is now possible in medical centers all around the world to undertake a better disposition of the infertile husband to look for advice to be studied and treated Confronted with this situation we are still unable to offer specific therapy in most cases however empirically based therapy abounds Advances in therapy have not kept pace with our increased physio logical knowledge and improved diagnostic techniques Patho physiological mechanisms and etiological factors in male infertility are largely unknown This has significantly hampered both clinical evaluation and advances in treatment allowing for frequent non scientific therapeutic incursions into the armamentarium of the an drologist Several factors have given birth to therapeutic fashions which are bound to survive as long as this state of lack of knowledge con tinues For example we may ask whether the treatment of varicocele constitutes a fashion Though we accept the treatment of varicocele as the best available treatment of male infertility we do not know its mechanism of action and so we cannot predict a therapeutic result *Andrology* John D. Paulson,1986 *Kinins IV* Lowell Greenbaum,2012-12-06 Scientists from 25 countries came together at the Hyatt Regency Hotel on October 21 25 1984 for the 4th International Kinin Congress in the beautiful city of Savannah Georgia Many of the delegates enjoyed southern hospitality for the first time The friendly city with its streets lined with the Live Oak Tree symbol of the Congress the balmy weather and the excellent facilities of the hotel set the stage for scientific events and exchange

that proved so successful The organization of the meeting was the result of many hours days and weeks of effort by many including from Augusta Drs James H Sutherland John Catravas William Davis Jr and Hiroshi Okamoto and from Charleston SC Julie Chao Ronald Mayfield and Donald Miller Special thanks go to Ms Cher Cornett of the Department of Medical Illustration at the Medical College of Georgia for her talent in the design of the logo as well as the graphics of the program and abstracts We are indeed indebted to Dr Paul Brucker Director of the Division of Health Communications at the Medical College of Georgia for his considerable aid in spending time with us to arrange the programming format and continuity Ms Sandra Usry provided very excellent and devoted secretarial help for several years while the Congress was in the making
