Fashion and Its Social Agendas Diana Crane,2012-06-12 It has long been said that

clothes make the man or woman but is it still true today If so how has the information clothes convey changed over the years Using a wide range of historical and contemporary materials Diana Crane demonstrates how the social significance of clothing has been transformed Crane compares nineteenth century societies France and the United States where social class was the most salient aspect of social identity signified in clothing with late twentieth century America where lifestyle gender sexual orientation age and ethnicity are more meaningful to individuals in constructing their wardrobes Today clothes worn at work signify social class but leisure clothes convey meanings ranging from trite to political In today s multicode societies clothes inhibit as well as facilitate communication between highly fragmented social groups Crane extends her comparison by showing how nineteenth century French designers created fashions that suited lifestyles of Paris elites but that were also widely adopted outside France By contrast today s designers operate in a global marketplace shaped by television film and popular music No longer confined to elites trendsetters are drawn from many social groups and most trends have short trajectories To assess the impact of fashion on women Crane uses voices of college aged and middle aged women who took part in focus groups These discussions yield fascinating information about women s perceptions of female identity and sexuality in the fashion industry An absorbing work *Fashion and Its Social Agendas* stands out as a critical study of gender fashion and consumer culture Why do people dress the way they do How does clothing contribute to a person s identity as a man or woman as a white collar professional or blue collar worker as a preppie yuppie or nerd How is it that dress no longer denotes social class so much as lifestyle Intelligent and informative this book proposes thoughtful answers to some of these questions Library Journal

Italian Fashion since 1945 Emanuela Scarpellini, 2019-07-24 In the course of the twentieth century Italy succeeded in establishing itself as one of the world's preeminent fashion capitals despite the centuries-old predominance of Paris and London. This book traces the story of how this came to be, guiding readers through the major cultural and economic revolutions of twentieth-century Italy and how they shaped the consumption practices and material lives of everyday Italians. In order to understand the specific character of the Italian model, Emanuela Scarpellini considers not only aspects of craftsmanship, industrial production and the evolution of styles but also the economic and cultural changes that have radically transformed Italy and the international scene within a few decades: the post-war economic miracle, the youth revolution, the consumerism of the 1980s, globalization, the environmentalism of the 2000s and the Italy of today. Written in a lively style full of references to cinema, literature, art and the world of media, this work offers the first comprehensive overview of a phenomenon that has profoundly shaped recent Italian history.

Posthuman Glossary Rosi Braidotti, Maria Hlavajova, 2018-02-22 If art, science and the humanities have shared one thing, it was their common engagement with constructions and representations of the human. Under the pressure of new contemporary concerns, however, we are experiencing a posthuman condition: the combination of new developments such as the neoliberal economics of global capitalism, migration, technological advances, environmental

destruction on a mass scale the perpetual war on terror and extensive security systems with a troublesome reiteration of old unresolved problems that mean the concept of the human as we had previously known it has undergone dramatic transformations The Posthuman Glossary is a volume providing an outline of the critical terms of posthumanity in present day artistic and intellectual work It builds on the broad thematic topics of Anthropocene Capitalocene eco sophies digital activism algorithmic cultures and security and the inhuman It outlines potential artistic intellectual and activist itineraries of working through the complex reality of the posthuman condition and creates an understanding of the altered meanings of art vis vis critical present day developments It bridges missing links across disciplines terminologies constituencies and critical communities This original work will unlock the terms of the posthuman for students and researchers alike
