Book Review of Ostry, Sylvia ... : Techno-nationalism and Techno-globalism: Conflict and Cooperation, Washington, DC, Brookings Inst., 1995 Henning Klodt, 1996 *Globalization and Economic Nationalism in Asia* Anthony P. D'Costa, 2012-06-14 This collection documents the different ways in which Asian governments have been pursuing economic nationalism even as they have been integrating with the world economy The book challenges the popular view that

with globalization either the role of the state becomes redundant or that states are unable to purposefully intervene in the economy. The book argues that since most states pursue national interests which largely include economic development they work with national business and often intervene on their behalf to create internationally competitive industries. States are thus viewed as integral to capitalist development and economic nationalism is neither theoretically nor empirically redundant. Contributors from Asia and elsewhere present wide ranging arguments and evidence to counter the view that with globalization economic nationalism is passé. Instead they demonstrate that states in Asia are active in shaping trade investment technological industrial and financial outcomes. Using interdisciplinary social science approaches that are also historically sensitive this book critically assesses why and how states in select Asian countries continue to intervene in the economy in both familiar and novel ways. Countries covered include India China South Korea Singapore Japan and the East Asian region as a whole. Together they illustrate why these states practice economic nationalism even as they enthusiastically embrace the generalized process of globalization through domestic reforms and liberalization.

Conflict and Cooperation in National Competition for High-Technology Industry National Research Council, Kiel Institute for World Economics, Hamburg Institute for Economic Research, Board on Science, Technology, and Economic Policy, 1996-11-15. This unique volume contains a powerful set of recommendations on issues at the center of international discussions on investment trade and technology policy. They take into account the globalization of industrial activity and the special characteristics of high technology industries while recognizing the continued policy role of national governments. The book identifies the rationale for promotional measures for high technology industries delineates sources of friction among the leading industrial countries and proposes policies to enhance international cooperation and strengthen the multilateral trading regime. This volume also examines the factors driving collaboration among otherwise competing firms and national programs highlights the need to develop principles of equitable public and private international cooperation and emphasizes the linkage between investment government procurement and other trade policies and prospects for enhanced international cooperation.

Busch,2001-02-05 Trade Warriors examines the strategic trade policies of states in high technology industries **The Digital Innovation Race** Cecilia Rikap,Bengt-Åke Lundvall,2021-12-09 This book develops new theoretical perspectives on the economics and politics of innovation and knowledge in order to capture new trends in modern capitalism It shows how giant corporations establish themselves as intellectual monopolies and how each of them builds and controls its own corporate innovation system It presents an analysis of a new form of production where Google Amazon Facebook Apple and Microsoft and their counterparts in China extract value and appropriate intellectual rents through privileged access to AI algorithms trained by data from organizations and individuals all around the world These companies specific form of

production and rent seeking takes place at the global level and challenges national governments trying to regulate intellectual monopolies and attempting to build stronger national innovation systems It is within this context that the authors provide new insights on the complex interplay between corporate and national innovation systems by looking at the US China conflict understood as a struggle for global technological supremacy The book ends with alternative scenarios of global governance and advances policy recommendations as well as calls for social activism This book will be of interest to students academics and practitioners both from national states and international organizations and professionals working on innovation digital capitalism and related topics *Developing National Systems of Innovation* Eduardo Albuquerque, Wilson Suzigan, Glenda Kruss, Keun Lee, 2015-01-30 Interactions between firms and universities are key building blocks of innovation systems This book focuses on those interactions in developing countries presenting studies based on fresh empirical material prepared by research teams in 12 countries *After Development* Söng-dök Ham, L. Christopher Plein, 1997 This book explores the dynamic changes now taking place in the South Korean government as a result of recent social and economic liberalization Sung Deuk Hahm and L Christopher Plein trace the emergence in Korea of a post developmental state in which both increasingly autonomous capital interests and growing public expectations of a higher quality of life challenge existing authoritarian institutions Separating out the constituent parts of the Korean state they then explore the evolving roles of the Korean presidency and bureaucracy in setting national policy The authors analyze the importance of social and cultural factors as well as the motives of individual political actors in shaping institutional change in Korea They show how shifting socioeconomic conditions have altered the way political decisions are made Hahm and Plein illustrate these transitions with concrete examples of policy making in the area of technology development and transfer an area of critical importance to Korea s rapid modernization The Challenge of Global Capitalism Robert G. Gilpin, 2018-06-05 Many individuals proclaim that global capitalism is here to stay Unfettered markets they argue now drive the world and all countries must adjust no matter how painful this may be for some Robert Gilpin author of the widely acclaimed Political Economy of International Relations Princeton 1987 urges us however not to take an open and integrated global economy for granted Rather we must consider the political circumstances that have enabled global markets to function and the probability that these conditions will continue Gilpin s new book amounts to a magisterial inquiry into all major aspects of the contemporary world political economy Beginning with the 1989 end of the Cold War and the subsequent collapse of communism it focuses on globalization and rapid technological change and covers a broad sweep of economic developments and political cultures Gilpin demonstrates the fragility of a global and integrated economy and recommends what can be done to strengthen it The international community has another chance to solidify the global market economy that collapsed with the outbreak of World War I Yet writes Gilpin the full implications of this historic development for international affairs are not yet clear Will socialist economies make a successful transition to market type economies What role will a dynamic China play in the world

economy Will the United States continue to exercise leadership or gravitate toward self centered policies Gilpin explores such questions along with problems in the areas of trade liberalization multinational corporations and destabilizing financial flows He also investigates the struggles of less developed countries and the spread of economic regionalism particularly in Europe North America and Pacific Asia which directly threatens an open world economy The author maintains that global capitalism and economic globalization have rested and must continue to rest on a secure political foundation However this foundation has eroded since the end of the Soviet threat To ensure survival of the global economy Gilpin concludes the United States and other major powers must recommit themselves to working together to rebuild its weakened political foundations

Renewables Michael Aklin, Johannes Urpelainen, 2018-03-23 A comprehensive political analysis of the rapid growth in renewable wind and solar power mapping an energy transition through theory case studies and policy Wind and solar are the most dynamic components of the global power sector How did this happen After the 1973 oil crisis the limitations of an energy system based on fossil fuels created an urgent need to experiment with alternatives and some pioneering governments reaped political gains by investing heavily in alternative energy such as wind or solar power Public policy enabled growth over time and economies of scale brought down costs dramatically In this book Michael Aklin and Johannes Urpelainen offer a comprehensive political analysis of the rapid growth in renewable wind and solar power mapping an energy transition through theory case studies and policy analysis Aklin and Urpelainen argue that because the fossil fuel energy system and political support for it are so entrenched only an external shock an abrupt rise in oil prices or a nuclear power accident for example allows renewable energy to grow They analyze the key factors that enable renewable energy to withstand political backlash and they draw on this analysis to explain and predict the development of renewable energy in different countries over time They examine the pioneering efforts in the United States Germany and Denmark after the 1973 oil crisis and other shocks explain why the United States surrendered its leadership role in renewable energy and trace the recent rapid growth of modern renewables in electricity generation describing among other things the return of wind and solar to the United States Finally they apply the lessons of their analysis to contemporary energy policy issues
