Technological Change At Work:

   The Process of Technological Change Jon Clark,Ian McLoughlin,Howard Rose,Robin King,1990-06-28   *Work and Technological Change* Stephen R. Barley,2020-10-27 In recent years a growing number of commentators have declared that we are at the beginning of a technical revolution that will see profound changes in the way we live and work Yet what constitutes a technological revolution and what logic supports how successive technological revolutions have unfolded in Western societies How do technologies change organizations and what are the implications of intelligent technologies for work and employment Here Stephen R Barley reflects on over three decades of research to explore both the history of technological change and the approaches used to investigate how technologies are shaping our work and organizations He begins by placing current developments in artificial intelligence into the historical context of previous technological revolutions drawing on William Faunce s argument that the history of technology is one of progressive automation of the four components of any production system energy transformation transfer and control technologies He then considers how technologies change work and when those changes will and will not result in organizational change In doing so he lays out a role based theory of how technologies produce changes in organizations He then tackles the issue alongside Matt Beane of how to conceptualize a more thorough approach to assessing how intelligent technologies such as artificial intelligence can shape work and employment They identify the main reasons why the current state of research on intelligent technologies in the workplace is inadequate and provide pointers on how empirical studies in this area may and must be improved He concludes with a discussion with his long time colleague Diane Bailey about the fears that arise when one sets out to study technical work and technical workers and the methods that they and future ethnographers can use for controlling those fears

   Technological Change and Labor Markets Reyna Elizabeth Rodríguez Pérez,Liliana Meza González,2024-10-28 In developed countries like the US Germany and the UK it has been observed that workers who perform non routine activities either cognitive or manual have benefited in terms of employment and income while those performing routinary tasks have seen their job prospects and wages decline This has led to a polarization of the labor markets and to a decrease in certain measures of inequality This phenomenon has been attributed to task biased technological change TBTC which differs from the skilled biased technological change in the fact that not only highly skilled workers have benefited from technology advancement This book presents evidence of how digitalization and task biased technological change are affecting the labor markets of different regions of the world and examines the factors that cause this inequality among nations It examines recent issues around the effect of task biased technological change on labor markets and the economy in general with a comparison of different countries in Central and Eastern Europe North America and Latin America as well as in other regions of the world The incorporation of the abovementioned regions presents relevant particularities for the subject matter addressed in the book The book also considers questions such as how labor market effects differ by gender and what the
