Technological Infrastructure Policy An International Perspective:

Technological Infrastructure Policy Morris Teubal, Dominique Foray, Moshe Justman, Ehud Zuscovitch, 2013-03-09

Technological Infrastructure Policy provides a systematic treatment of technological infrastructure TI and Technological Infrastructure Policy TIP which are emerging fields of interest both for academic economists and for policy makers in both advanced and developing economies The specific topics covered include the role of TI in economic growth and development the nature and definition of TI TI components the relationships between TI and markets salient features of TIP Technological Infrastructure Policy reflects the distinction made between basic and advanced TI Basic TI involves the collective absorption of foreign technology for subsequent diffusion to domestic firms Several chapters explicitly deal with this process with an emphasis on the supply of advisory services to small and medium enterprises Advanced TI involves precompetitive cooperation research and development in cutting edge technologies undertaken by consortia of firms Several examples of advanced TIP are given The novel integration of various conceptual and practical aspects of TI and TIP is the strong point of this book

Innovation Policy in a Global Economy Daniele Archibugi, Jeremy Howells, Jonathan Michie, 1999-04-15

Innovation Policy in a Global Economy concludes the successful sequence of books on Globalisation and Technology edited by Daniele Archibugi and Jonathan Michie following Technology Globalisation and Economic Performance Cambridge University Press 1997 and Trade Growth and Technical Change Cambridge University Press 1998 This final volume argues that the opportunities offered by globalisation will only be fully realised by organisations which have developed institutions that allow for the transfer absorption and use of knowledge Innovation Policy in a Global Economy is relevant for graduate and undergraduate courses in management and business economics geography international political economy and innovation and technology studies Presenting original theoretical and empirical research by leading international experts in an accessible style Innovation Policy will be vital reading for researchers and students and of use to public policy professionals

Infrastructure Brett M. Frischmann, 2013-01-01 BInfrastructure The Social Value of Shared Resources devotes much needed attention to understanding how society benefits from infrastructure resources and how management decisions affect a wide variety of interests The book links infrastructure a particular set of resources defined in terms of the manner in which they create value with commons a resource management principle by which a resource is shared within a community The infrastructure commons ideas have broad implications for scholarship and public policy across many fields ranging from traditional infrastructure like roads to environmental economics to intellectual property to Internet policy *Microdynamics of Technological Change* Cristiano Antonelli, 2002-01-04 This volume presents a comprehensive assessment of the economic effects of the emerging information and communication technologies associated with a knowledge based economy and looks at how knowledge is increasingly treated as a product in its own right An original framework is developed to comprehend these fundamental shifts based on three bodies of knowledge the economics of path dependence and of historical time as

they are elaborated in the economics of new technologies economic topology based on the methodology of network analysis the new economics of knowledge and the concept of localized technological change This book provides a unified analytical framework for the study of the transition of advanced economic systems towards a knowledge based economy **Systems of Innovation** Charles Edquist,2013-01-11 The systems of innovation approach is considered by many to be a useful analytical approach for better understanding innovation processes as well as the production and distribution of knowledge in the economy It is an appropriate framework for the empirical study of innovations in their contexts and is relevant for policy makers This text is the result of the work within an international inter disciplinary network or working seminar with the task of building a more solid and sophisticated conceptual and theoretical foundation for the continued study of innovations in a systemic context The book has three parts The first presents an overview and tries to work out some conceptual problems In the second the systems of innovation approach is related to innovation theory Part three is devoted to increasing understanding of the functioning and dynamics of systems of innovation There is also an introduction where the genesis and anatomy of different systems of innovation approaches are discussed and where the systems of innovation approach is characterized in nine dimensions The European Union and Globalisation Brigid Gavin,2001-01-01 This work shows how the EU has evolved constitutionally beyond the internal market into a highly developed system of multi level governance It explores path breaking reforms for increased parliamentary control of globalization in the WTO and a concrete model for implementation **Understanding Industrial and Corporate Change** Giovanni Dosi,David J. Teece,Josef Chytrý,2004-09-30 Understanding Industrial and Corporate Change contains pioneering work on technological organizational and institutional change from leading theorists and practitioners such as Joseph Stiglitz Oliver Williamson Masahiko Aoki Alfred D Chandler Jr and Sidney Winter Trans disciplinary in its approach the book explores three distinct themes Markets and Organizations Evolutionary Theory and Technological Change and Strategy Capabilities and Knowledge Management The chapters are drawn from the journal Industrial and Corporate Change reflecting the diverse contributions it has published since 1992 in such areas as business history industrial organization strategic management organizational theory innovation studies organizational behavior economics political science social psychology and sociology Understanding Industrial and Corporate Change provides an accessible account of recent research and theory on technological organizational and institutional change for academics and advanced students of Business and Management Organization Theory Technology and Innovation Studies and Industrial Economics Science, Technology and Governance John De la Mothe,2001 This anthology examines Love s Labours Lost from a variety of perspectives and through a wide range of materials Selections discuss the play in terms of historical context dating and sources character analysis comic elements and verbal conceits evidence of authorship performance analysis and feminist interpretations Alongside theater reviews production photographs and critical commentary the volume also includes essays written by practicing theater artists who

have worked on the play An index by name literary work and concept rounds out this valuable resource **Public Technology Procurement and Innovation** Charles Edquist, Leif Hommen, Lena Tsipouri, 2012-12-06 Public Technology Procurement and Innovation studies public technology procurement as an instrument of innovation policy In the past few years public technology procurement has been a relatively neglected topic in the theoretical and research literature on the economics of innovation Similarly preoccupation with supply side measures has led policy makers to avoid making very extensive use of this important demand side instrument These trends have been especially pronounced in the European Union There as this book will argue existing legislation governing public procurement presents obstacles to the use of public technology procurement as a means of stimulating and supporting technological innovation Recently however there has been a gradual re awakening of practical interest in such measures among policy makers in the EU and elsewhere For these and other related measures this volume aims to contribute to a serious reconsideration of public technology procurement from the complementary standpoints of innovation theory and innovation policy *From Control to Drift* Claudio Ciborra, Kristin Braa, 2001 Firms are investing considerable resources to create large information infrastructures able to fulfil their varied information processing and communication needs The more the drive towards globalization the more such infrastructures become crucial The wiring of the corporation should be done in a way that is aligned with its corporate strategy it is global and generates value This book presents six in depth case studies of large corporations AstraZeneca IBM Norsk Hydro Roche SKF and Statoil which offer a rich picture of the main issues involved in information infrastructure implementation and management Far from being a linear process the use of the information infrastructure is in fact an open ended process in many cases out of control Current management models and consulting advice do not seem to be able to cope with such a business landscape This book provides the reader with interpretations and theories that can foster a different understanding and approach Thus the economics of standards complexity theory and actor network theory are harnessed to penetrate the issues emerging from the case studies and to generate a new conception of the information infrastructure that is relevant both for researchers and practitioners America Inc.? Linda Weiss, 2014-03-29 For more than half a century the United States has led the world in developing major technologies that drive the modern economy and underpin its prosperity In America Inc Linda Weiss attributes the U S capacity for transformative innovation to the strength of its national security state a complex of agencies programs and hybrid arrangements that has developed around the institution of permanent defense preparedness and the pursuit of technological supremacy She examines how that complex emerged and how it has evolved in response to changing geopolitical threats and domestic political constraints from the Cold War period to the post 9 11 era Weiss focuses on state funded venture capital funds new forms of technology procurement by defense and security related agencies and innovation in robotics nanotechnology and renewable energy since the 1980s Weiss argues that the national security state has been the crucible for breakthrough innovations a catalyst for entrepreneurship and the formation

of new firms and a collaborative network coordinator for private sector initiatives Her book appraises persistent myths about the military commercial relationship at the core of the National Security State Weiss also discusses the implications for understanding U S capitalism the American state and the future of American primacy as financialized corporations curtail investment in manufacturing and innovation **Latecomers in the Global Economy** Michael Storper, Stavros

Thomadakis, Lena Tsipouri, 2005-06-23 Drawing on the example of late developing countries especially from East Asia catching up with established powers the authors address a new formulation of industrial policy for latecoming semi industrialized countries With contributions from some of the best known economists currently working in this area the book will be a valuable guide for economists and international policy makers interested in development issues **China's Industrial Technology** Shulin Gu, 2004-01-14 Offering a comprehensive review of reform policy followed by an examination of major approaches to institutional restructuring Shulin Gu explores the way in which China's industrial technology has responded to economic reforms At the heart of the work is the argument that market reform and organisational change are closely interdependent Gu outlines the interaction of the two in China and reveals the damage which may result if market reform is not accompanied by new organisational design Analysis of these issues is drawn from first hand experience of Chinese technology systems supported by insights from technological innovation economics and transaction cost economics

Knowledge and Innovation for Development Francisco R. Sagasti, 2005-01-01 Sagasti director of the think tank Agenda PER in Lima compares building science and technology capabilities in unindustrialized countries to the eternally futile task of Sisyphus in the Greek myth **Risk, Complexity and ICT** Ole Hanseth, Claudio Ciborra, 2007-01-01 Explores the challenges regarding risks and risk management related to the growing complexity of ICT solutions This book draws upon theories of risk society and reflexive modernization and uses various case studies to demonstrate efforts aimed at controlling and managing the complexities of various ICT solutions **Science, Technology and Global Governance** John R. De La Mothe, 2014-04-23 Science technology and innovation have long been key factors in the competitive advantage of nations Today however the new international political economy is being increasingly driven by science and technology in new ways Integration globalization and internationalization have all become watchwords for a series of dynamic processes in which science and technology are deeply implicated As a result not only are the policies of national governments being exposed in terms of the limits of their sovereignty but science and technology are being increasingly implicated in a wide array of public issues ranging from security privacy development and economic growth to employment environment foreign policy and geopolitics Clearly in today's emerging world the ways in which governments organize their science and technology policy their science and technology intelligence and their research advisory structures and resources matter more today than ever before In turn the contract between science and democracy is being rapidly redefined This book is the first to comprehensively discuss these critical issues **The Oxford Handbook of Internet Studies** William H. Dutton, 2013-01-10

Internet Studies has been one of the most dynamic and rapidly expanding interdisciplinary fields to emerge over the last decade. The Oxford Handbook of Internet Studies has been designed to provide a valuable resource for academics and students in this area, bringing together leading scholarly perspectives on how the Internet has been studied and how the research agenda should be pursued in the future. The Handbook aims to focus on Internet Studies as an emerging field, each chapter seeking to provide a synthesis and critical assessment of the research in a particular area. Topics covered include social perspectives on the technology of the Internet, its role in everyday life and work, implications for communication power and influence, and the governance and regulation of the Internet. The Handbook is a landmark in this new interdisciplinary field, not only helping to strengthen research on the key questions but also shape research policy and practice across many disciplines that are finding the Internet and its political, economic, cultural, and other societal implications increasingly central to their own key areas of inquiry.

New Geographies of Infrastructure Systems. Spatial Science Perspectives and the Socio-Technical Change of Energy and Water Supply Systems in Germany, **Knowledge Capital and the “New Economy”** Pontus Braunerhjelm, 2012-12-06. According to its proponents, the new economy is associated with sustainable growth, increased demand for labor, and zero inflation. On the micro level, this bright avenue into the future is propelled by knowledge capital, flexibility, and new ways of organizing production, such as clusters and networks. Progress in information technology, together with massive deregulation on the national and the international levels, have been credited with setting this development into motion. The concept of the new economy has been rapidly embraced by politicians as it seems to offer a way out of the traditional trade-off between unemployment and wage inflation. However, empirical evidence regarding the microeconomic mechanisms of the new economy is scarce.

Knowledge Capital and the New Economy: Firm Size, Performance, and Network Production intends to narrow this gap by empirically analyzing the composition of knowledge capital and how knowledge capital is distributed across firms of different size. Moreover, the impact of knowledge capital on firms' profitability and international competitiveness is also examined. Finally, we compare cluster dynamics and the institutional set-up in Europe and the U.S. with the purpose of identifying regulations that seem to hinder a conducive environment for expanding and dynamic European clusters. The results of this study emphasize the role of knowledge capital and flexibility. Thus, irrespective of how sustainable the new economy turns out to be, the policy implications in terms of providing institutions that facilitate knowledge-enhancing economic activities, flexible markets, and transparent incentive structures are undeniable. Countries that fail in this respect may find themselves trailing in the international growth and welfare rankings.

Success Strategies and Knowledge Transfer in Cross-Border Consulting Operations Roger Svensson, 2012-12-06. *Success Strategies and Knowledge Transfer in Cross-Border Consulting Operations* analyzes the international operations of consulting firms. Apart from developing a theoretical framework which differs from traditional theories about international trade, the main issues analyzed in this book are:

1. Success determinants when tendering for international consulting contracts.
2. The choice

between exports acquisition of a local firm or establishing a greenfield office when entering foreign markets 3 The extent and nature of knowledge transfer to emerging markets 4 The role of development agencies in international consulting projects 5 The trend towards and consequences of more management services included in international projects 6 The effects on competition when state owned consulting firms are allowed to operate in the international market The empirical analysis of these issues is based on a unique database of individual tender documents which Swedish consulting firms have submitted abroad
