**Technology for America's Economic Growth**, 1994-01      Technology for America's Economic Growth Bill Clinton, Al Gore, United States. President (1993-2001 : Clinton), 1993      The American Economy Nicolas Spulber, 1997-07-13 This work focuses on the economic challenges the American economy has met during the post World War II era and on the new challenges represented notably by the competing economies of Japan Germany and the entire European union that confront it as the twenty first century approaches The book shows how the transformations brought about by international competition fit the long term processes of economic growth and change with respect to structural mutations technological development the role of the government and the evolution of government business relations Nicholas Spulber presents a detailed critique of the thesis alleging that the American economy had experienced some kind of decline and argues that the economy will continue to move forward energetically and successfully if growth and change are primarily left to emerge from the impulses and incentives of the private economy      **Technology for America's Economic Growth** Bill Clinton, William J. Clinton, Albert Gore, 1993-07-01 Covers long term economic growth that creates jobs and protects the environment making government more efficient and more responsive world leadership in basic science math and engineering and America s economic strength new initiatives      A New Way of Doing Business, 1994      Department of Transportation and Related Agencies Appropriations for 1995: Department of Transportation United States. approaches and methodological principles of mezzoeconomic researches their breakthrough improvements upon traditional economic theorization and the broad prospects for innovative practices This monograph fills up a blank in the theoretical system of modern economics and signifies a substantial amelioration of the theorization of modern market economy It demonstrates through forceful exemplification and argumentation that there exists in between microeconomics represented by the enterprise and macroeconomics represented by the state mezzoeconomics represented by regional government in the system of modern economics and that both enterprises and regional governments are entities of market competition in the modern market theory which remedies the theoretical defects in traditional economic and market theories and redefines the theories of modern economics and modern market economy     **Our Changing Planet** ,1993     **Empowering Technology**

civilizational approach to American political economy at the crossroads between cultural studies history sociology and political science Drawing together contributions from a rich variety of fields from geography to cultural studies political science and sociology this work sheds a new light on America s cultural political economy combining theoretical reflection with empirical data and offering innovative perspectives on the crisis and renewal of American capitalism     **Investing in Innovation** Lewis M. Branscomb, James H. Keller, 1999 Shortly after taking office in 1993 President Bill Clinton and Vice President Al Gore called for a shift in American technology policy toward an expansion of public investments in partnerships with private industry The authors of this volume were invited by the Clinton administration to take a hard nonpartisan look at how successful the new policies have been and to propose ways to make their programs more effective The first summary report of the team s recommendations was called the hottest technology policy property on Capitol Hill This book an expansion of that report offers a new set of technology policy principles The authors use the principles to evaluate many federal research programs and to make recommendations for change This volume will set the terms of the debate over the national research and innovation policy for years to come
