*Learning Race and Ethnicity* Anna Everett, 2008 An exploration of how issues of race and ethnicity play out in a digital media landscape that includes MySpace post 9 11 politics MMOGs Internet music distribution and the digital divide It may have been true once that as the famous cartoon of the 1990s put it Nobody knows you re a dog on the Internet and that as an MCI commercial of that era declared on the Internet there is no race gender or infirmity but today with the development of web cams digital photography cell phone cameras streaming video and social networking sites this notion seems quaintly idealistic This volume takes up issues of race and ethnicity in the new digital media landscape The contributors address this topic still difficult to engage honestly clearly empathetically and with informed understanding in twenty first century America with the goal of pushing consideration of a vexing but important subject from margin to center *Learning Race and Ethnicity* explores the intersection of race and ethnicity with post 9 11 politics online hate speech practices and digital youth and media cultures It examines universal access and the racial and ethnic digital divide from the perspective of digital media learning and youth The chapters treat such subjects as racial identity in the computer mediated public sphere minority technology innovators new methods of music distribution digital artist Judy Baca s work with youth Native American digital media literacy and minority youth technology access and the pervasiveness of online health information Contributors Ambar Basu Graham D Bodie Dara N Byrne Jessie Daniels Mohan J Dutta Raiford Guins Guisela Latorre Antonio L pez Chela Sandoval Tyrone D Taborn Douglas Thomas **Gender and Technology** Nina Lerman, Ruth Oldenziel, Arwen P.

Banks, 2006-08-15 This book examines the Digital Divide in light of America s larger racial divide in an attempt to figure out what meaningful access for African American to technologies and the larger American society can or should mean **The Shock Of The Old** David Edgerton, 2011-05-26 It s rare for a book to make you see the world differently but this does exactly that on almost every page Guardian Standard histories of technology give tired accounts of the usual inventions inventors and dates framing

technology as the inevitable march of progress They split history into ages electrification motorisation and computerisation and rarely ask whether anyone bothered to use these inventions at the time Shock of the Old is not one of those histories I Letters exist alongside emails and outlasted telegrams we still make physical books and magazines despite the rise of the Internet a belated rise considering that the technologies that made it possible was invented in 1965 and bookshops thrive despite Amazon More horses were used in the Second World War than any other war in history and propeller planes continue to take off from the same runways as jets Shock of the Old forces us to reassess the significance of old inventions such as corrugated iron and sewing machines and rethink the relative importance we place on the invention of something new its application and its widespread adoption It challenges the idea that we live in an era of ever increasing change and interweaving political economic and cultural history teaches us to think critically about technology

**The ^AShock of the Old** David Edgerton,2011-08-29 From the books of H G Wells to the press releases of NASA we are awash in cliché d claims about high technology s ability to change the course of history Now in The Shock of the Old David Edgerton offers a startling new and fresh way of thinking about the history of technology radically revising our ideas about the interaction of technology and society in the past and in the present He challenges us to view the history of technology in terms of what everyday people have actually used and continue to use rather than just sophisticated inventions

Beyond Cutting Edge? Paul C. Heidebrecht,2014-03-10 A quick scan of any newsstand is enough to confirm the widespread preoccupation with technological change As a myriad of articles and advertisements demonstrate not only are we preoccupied with technology but we are bombarded with numerous reminders that the cutting edge is in constant motion Most often the underlying assumption of Christians is that we have no choice but to find ways to cope with the latest and greatest Indeed it is often assumed that the church has no choice but to find ways to cope with its new technological context This book does not make the same assumptions Building on the work of Mennonite theologian John Howard Yoder it argues that the practices of the church make it possible for Christians to conscientiously engage technology This happens when we recognize that marks of the church such as patience vulnerability and servanthood can put technological ideals such as speed control and efficiency in their proper place In the course of grappling with three examples of morally formative technologies automobiles genetically modified food and the Internet this book goes beyond Yoder s thought by emphasizing that the church also plays a crucial role in our moral formation

will impact future research and practice while also emphasizing issues of diversity and inclusion **American Independent Inventors in an Era of Corporate R&D** Eric S. Hintz, 2021-08-17 How America's individual inventors persisted alongside corporate R D labs as an important source of inventions During the nineteenth century heroic individual inventors such as Thomas Edison and Alexander Graham Bell created entirely new industries while achieving widespread fame However by 1927 a New York Times editorial suggested that teams of corporate scientists at General Electric AT T and DuPont had replaced the solitary garret inventor as the wellspring of invention But these inventors never disappeared In this book Eric Hintz argues that lesser known inventors such as Chester Carlson Xerox photocopier Samuel Ruben Duracell batteries and Earl Tupper Tupperware continued to develop important technologies throughout the twentieth century Moreover Hintz explains how independent inventors gradually fell from public view as corporate brands increasingly became associated with high tech innovation Focusing on the years from 1890 to 1950 Hintz documents how American independent inventors competed and sometimes partnered with their corporate rivals adopted a variety of flexible commercialization strategies established a series of short lived professional groups lobbied for fairer patent laws and mobilized for two world wars After 1950 the experiences of independent inventors generally mirrored the patterns of their predecessors and they continued to be overshadowed during corporate R D's postwar golden age The independents enjoyed a resurgence however at the turn of the twenty first century as Apple's Steve Jobs and Shark Tank's Lori Greiner heralded a new generation of heroic inventor entrepreneurs By recovering the stories of a group once considered extinct Hintz shows that independent inventors have long been and remain an important source of new technologies **Technology in the Middle and Secondary Social Studies Classroom** Scott K. Scheuerell, 2015-03-12 Technology in the Middle and Secondary Social Studies Classroom introduces pre service teachers to the research underpinning the effective integration of technology into the social studies curriculum Building off of established theoretical frameworks veteran social studies teacher educator Scott Scheuerell shows how the implementation of key technologies in the classroom can help foster higher level thinking among students Plentiful user friendly examples illustrate how specific educational tools including games social media flipped classrooms and other emerging technologies spur critical thinking and foster authentic intellectual work A rigorous study Technology in the Middle and Secondary Social Studies Classroom provides a comprehensive up to date research framework for conceptualizing successful technology rich social studies classrooms **Race After Technology** Ruha Benjamin, 2019-07-09 From everyday apps to complex algorithms Ruha Benjamin cuts through tech industry hype to understand how emerging technologies can reinforce White supremacy and deepen social inequity Benjamin argues that automation far from being a sinister story of racist programmers scheming on the dark web has the potential to hide speed up and deepen discrimination while appearing neutral and even benevolent when compared to the racism of a previous era Presenting the concept of the New Jim Code she shows how a range of discriminatory designs encode inequity by explicitly amplifying racial hierarchies by ignoring but

thereby replicating social divisions or by aiming to fix racial bias but ultimately doing quite the opposite Moreover she makes a compelling case for race itself as a kind of technology designed to stratify and sanctify social injustice in the architecture of everyday life This illuminating guide provides conceptual tools for decoding tech promises with sociologically informed skepticism In doing so it challenges us to question not only the technologies we are sold but also the ones we ourselves manufacture Visit the book s free Discussion Guide [www dropbox com](http://www.dropbox.com)
