Office of Technology Assessment, 1996 Science and Technology for Development , 1989 *Economic and Political Change in the Middle East (RLE Economy of Middle East)* Elias Tuma, 2014-10-30 In the early 1960s the Middle East suffered from political instability inefficiency of government widespread poverty and inequality low productivity and a mounting population pressure on the region's resources With the exception of some of the oil exporting countries the entire region still suffers from these same burdens There have been many studies in the economic development and industrialization of the region in recent years This study is different motivated by scepticism and a sense of intellectual frustration and apprehension because of the apparent inadequacy of socioeconomic and political development in the Middle East First published in 1987 **China and the Middle East Since World War II** Muhamad S. Olimat, 2014-10-27 This book examines Sino Middle Eastern relations on a bilateral level since World War II It highlights the depth of China's involvement in the region with each country on a five dimensional approach energy security trade relations political relations arms sales security cooperation and cultural relations Regarding each of these criteria the Middle East holds a strategic significance to China's national security vital interests territorial integrity sovereignty regime survival and economic prosperity China has been an integral part of the political developments on the Middle Eastern political scene It has supported the region's quest for independence and national liberation exchanged diplomatic recognition with the region and established political partnerships with the Middle East Trade relations are an essential element of China's involvement in the Middle East Their bilateral trade volume exceeds 220 billion annually and is steadily heading toward 500 billion by the end of 2015 The Middle East supplies fifty four percent of China's energy needs and is expected to provide seventy percent of China's imports by 2020 Energy security has become the core of Sino Middle Eastern relations and the main goal of its increasing involvement in the region China has also become a main source of arms sales to the region The Middle East influenced Chinese culture and language immensely simultaneously influenced by Chinese culture traditions and customs Apparently the peoples of the Middle East are enthusiastic about China's role in the region However the American so called pivoting out and China's imminent pivoting in brings tremendous levels of anxiety in the region A similar situation occurred a century ago when the people of the region the social and political movements in the Middle East and the governments of the region solicited and welcomed the American involvement in the region something they deeply resent and regret China seems

to be going through the same path and the people of the region have begun to scrutinize its presence If Beijing continues its inconsistent policy in the region its injudicious support to autocracies it will defiantly mobilize popular resentment against its involvement in the Middle East Therefore its presence might not endure in comparison to the American British or French presence in the Middle East **List of Publications** United States.
