Family Consequences of Children's Disabilities Denis P. Hogan, 2012-04-01 The Americans with Disabilities Act ADA and other national policies are designed to ensure the greatest possible inclusion of people with disabilities in all aspects of American life But as a matter of national policy we still place the lion's share of responsibility for raising children with disabilities on their families While this strategy largely works sociologist Dennis Hogan maintains the reality is that family financial security the parents relationship and the needs of other children in the home all can be stretched to the limit In Family Consequences of Children's Disabilities Hogan delves inside the experiences of these families and examines the financial and emotional costs of raising a child with a disability The book examines the challenges families of children with disabilities encounter and how these challenges impact family life The first comprehensive account of the families of children with disabilities Family Consequences of Children's Disabilities employs data culled from seven national surveys and interviews with twenty four mothers of children with disabilities asking them questions about their family life social supports and how other children in the home were faring Not surprisingly Hogan finds that couples who are together when their child is born have a higher likelihood of divorcing than other parents do The potential for financial insecurity contributes to this anxiety especially as many parents must strike a careful balance between employment and caregiving Mothers are less likely to have paid employment and the financial burden on single parents can be devastating One third of children with disabilities live in single parent households and nearly 30 percent of families raising a child with a disability live in poverty Because of the high levels of stress these families incur support networks are crucial Grandparents are often a source of support Siblings can also assist with personal care and consequently tend to develop more helpful attitudes be more inclusive of others and be more tolerant But these siblings are at risk for their own health problems they are three times more likely to experience poor health than children in homes where there is no child with a disability Yet this book also shows that raising a child with a disability includes unexpected rewards the families tend to be closer and they engage in more shared activities such as games television and meals Family Consequences of Children's Disabilities offers access to a world many never see or prefer to ignore The book provides vital information on effective treatment rehabilitation and enablement to medical professionals educators social workers and lawmakers This compelling book demonstrates that every mirror has two faces raising a child with a disability can be difficult but it can also offer expanded understanding A Volume in the American Sociological Association's Rose Series in Sociology

Digital Youth with Disabilities Meryl Alper,2014-11-07 An examination of media and technology use by school aged youth with disabilities with an emphasis on media use at home Most research on media use by young people with disabilities focuses on the therapeutic and rehabilitative uses of technology less attention has been paid to their day to day encounters with media and technology the mundane sometimes pleasurable and sometimes frustrating experiences of hanging out messing around and geeking out In this report Meryl Alper attempts to repair this omission examining how school aged children with disabilities use media for social and recreational purposes with a focus on media use at home In doing so she reframes common assumptions about the relationship between young people with disabilities and technology and she points to areas for further study into the role of new media in the lives of these young people their parents and their caregivers Alper considers the notion of screen time and its inapplicability in certain cases when for example an iPad is a child s primary mode of communication She looks at how young people with various disabilities use media to socialize with caregivers siblings and friends looking more closely at the stereotype of the socially isolated young person with disabilities And she examines issues encountered by parents in selecting purchasing and managing media for youth with such specific disabilities as ADHD and autism She considers not only children s individual preferences and needs but also external factors including
