UNCITRAL Model Laws on Digital Trade Luca G. Castellani, 2025-09-18. This book provides a detailed analysis of two UNCITRAL texts: the Model Law on Electronic Transferable Records (MLETR) and the Model Law on the Use and Cross-border Recognition of Identity Management and Trust Services (MLIT). The MLETR is the legal tool that enables the use of trade documents such as bills of lading and promissory notes in electronic form. The book discusses core MLETR provisions such as those on scope of application, functional equivalence and reliability standards. It illustrates national variations in enactment techniques and substantive content including in France, Singapore and the United Kingdom. The MLIT provides the legal framework to manage identity management and trust services including electronic signatures. The book explains the different approaches to giving legal recognition and effect to identity management and trust services both domestically and across borders. It discusses the legal framework to accommodate functions and needs of identity management, describes trust services against the background of pre-existing UNCITRAL texts and takes into account the revised EU eIDAS Regulation. Providing an article by article commentary as well as an overview of implementation trends, the book is a fundamental resource for commercial, maritime and banking lawyers, digital economy policymakers, legislative drafters, supply chain management and paperless trade specialists and for anyone interested in understanding the legal aspects of the transition from documents to data in trade.

Telecommunications Policies of Japan Hitoshi Mitomo, 2020-01-11. This book provides a detailed description of Japan's telecommunications policies. It discusses how Japan has addressed a variety of policy challenges ranging from traditional regulatory issues such as the provision of a universal service to the latest tasks including the promotion of cutting edge technologies. Japan is a global leader in information and communication technologies (ICT). In addition to technological advances, an impressive nationwide optical fiber and advanced mobile network infrastructure has been developed which has boosted the economy and benefited society. The Ministry of Internal Affairs and Communications (MIC) has played an important role in ICT deployment. Japan has a unique ICT policy framework that does not separate regulation and promotion unlike many other countries which have an independent regulator. However, since relatively little information has been

provided in English it has been difficult to learn much about Japan's policies. Written by specialists from MIC industry and academia, this is the first collaborative work to provide a comprehensive discussion of Japan's ICT policies, allowing readers to gain an understanding of the topic. *Documentation Abstracts*, 1998. Zhao Ziyang and China's Political Future. Guoguang Wu, Helen Lansdowne, 2013-05-13. What legacies have previous reformers like Zhao Ziyang left to today's China? Does China have feasible political alternatives to today's repressive market Leninism and corrupt state capitalism? Does Zhao's legacy indicate an alternative to the past and for the future? For those who are familiar with the development of Chinese politics since the reform years, Zhao is now widely regarded as a major architect of the nation's profound transition. His contributions to China's post-Mao development are rich and multi-faceted, including those on rural and urban economic reforms, extending to accountable governance, liberal policies concerning domestic affairs, and China's foreign relations. Featuring contributions from leading experts in the field, such as Richard Baum and Xiaonong Cheng, this book explores the historical development of China's political reform issues and how his political legacies are relevant to China's political development since the 1980s to the future. Using recently translated recollection articles by veteran reformers who worked with Zhao in the 1980s, like Du Runsheng, An Zhiwen, Li Rui, Bao Tong, Zhao Ziyang, and *China's Political Future* is a valuable contribution for students and researchers interested in the Chinese politics, Asian politics, and political development in Asia.
