Network Journalism Ansgard Heinrich,2011-04-26 Drawing on current theoretical debates in journalism studies and grounded in empirical research Heinrich here analyzes the interplay between journalistic practice and processes of globalization and digitalization She argues that a new kind of journalism is emerging characterized by an increasingly global flow of news as well as a growing number of news deliverers Within this transformed news sphere the roles of journalistic outlets change They become nodes arranged in a dense net of information gatherers producers and disseminators The interactive connections among these news providers constitute what Heinrich calls the sphere of network journalism

The Dooleys of Richmond Mary Lynn Bayliss,2017-05-15 The Dooleys of Richmond is the biography of two generations of a dynamic and philanthropic immigrant family in the urban South While most Irish Catholic immigrants who poured into the region in the nineteenth century were poor and illiterate John and Sarah Dooley were affluent and well educated They brought sophistication and capital to Virginia where John established one of the largest hat manufacturing companies in the United States Noted for their business acumen and community service the Dooleys became leaders in business education culture and politics in Virginia A bellwether of the South during these tumultuous times the Dooleys fortunes would rise and fall and rise again Mary Lynn Bayliss recounts the family s history during their prosperous antebellum years John and his sons service in the Confederate army John s exploits as leader of the Richmond Ambulance Committee and the loss of the entire Dooley retail and manufacturing operations during the final days of the Civil War After the war the Dooleys son James a leading Richmond lawyer and philanthropist devoted half a century to developing railroad networks across the United States and became a key figure in the industrialization of the New South He and his wife Sallie built Maymont the famed Gilded Age estate that remains a major attraction in Richmond The story of the Dooleys is a fascinating window on southern society and the people who shaped its grand and turbulent history

Don't Stop Thinking About the Music Benjamin S. Schoening,Eric T. Kasper,2011-12-16 In this insightful erudite history of presidential campaign music musicologist Benjamin Schoening and political scientist Eric Kasper explain how politicians use music in American presidential campaigns to convey a range of political messages From Follow Washington to I Like Ike to I Got a Crush on Obama they describe the ways that song use by and for presidential candidates has evolved including the addition of lyrics to familiar songs the current trend of using existing popular music to connect with voters and the rapid change of

music's relationship to presidential campaigns due to Internet sites like YouTube JibJab and Facebook Readers are ultimately treated to an entertaining account of American political development through popular music and the complex two way relationship between music and presidential campaigns Adolphe Gouhenant Paula Selzer, Emmanuel Pecontal, 2019-10-15

Adolphe Gouhenant tells the story of artist revolutionary and early North Texas resident Francois Ignace Adolphe Gouhenant 1804 1871 Born at the dawn of the Romantic era Gouhenant traveled from a small village near the foothills of the Alps to France's second largest city where he built a monument to the arts and sciences atop Lyon's famous Fourviere Hill His wildly ambitious schemes landed him in court and ultimately devastated him financially Participating in clandestine revolutionary organizations Gouhenant organized a secret meeting under the guise of a Masonic banquet and was later imprisoned for conspiracy against the monarchy Aligning himself with the early communist movement Gouhenant advocated for workers rights and was selected by well known Icarian communist Etienne Cabet to lead an advance guard on a treacherous journey across the Atlantic to settle a utopian colony in North Texas Despite broken wagons severe weather and lack of food he navigated overland from New Orleans in 1848 to establish a small settlement in Denton County The community beset by hardships ultimately scapegoated Gouhenant and accused him of being a French agent deliberately sent to lead the group to destruction into the wilds and for this treason they shaved his head and beard and expelled him from the colony which collapsed shortly thereafter Gouhenant then journeyed to Fort Worth to teach the federal soldiers French and art and next to Dallas where he founded the town's first arts establishment in the 1850s He set up shop as a daguerreotypist and photographed the town's early residents His Arts Saloon was the scene of many exhibitions and dances but ultimately became the high stake in a nasty battle among Dallas's leading citizens setting legal precedent for Texas homestead law Gouhenant's death in a freak railroad accident left behind mysterious claims that contribute one last chapter to this amazing man's story

John Bicknell, 2014-11-01 The presidential election of 1844 was one of the two or three most momentous elections in American history. Had Henry Clay won instead of James K. Polk, we'd be living in a very different country today. It cemented the westward expansion that brought Texas, California, and Oregon into the union. It also took place amid religious turmoil that included anti-Mormon and anti-Catholic violence and the Great Disappointment in which thousands of followers of an obscure preacher named William Miller believed Christ would return to earth in October 1844. Author and journalist John Bicknell details even more compelling interwoven events that occurred during this momentous year: the murder of Joseph Smith, the religious fermentation of the Second Great Awakening, John C. Fremont's exploration of the West, Charles Goodyear's patenting of vulcanized rubber, the near death of President John Tyler in a freak naval explosion, and much more. All of these elements illustrate the competing visions of the American future: Democrats v. Whigs, Mormons v. Millerites, nativists v. Catholics, those who risked the venture westward and those who stayed safely behind, and how Polk's victory cemented the vision of a continental nation. John Bicknell has written and edited for FCW Congressional Quarterly Roll Call and was coeditor of the 2012 edition of Politics in America, CQ's 1200-page guide to the US Congress. He lives in Haymarket, Virginia.

Peacekeeping on the Plains Tony R. Mullis, 2004 Operations in the 1850s and assist military historians in their understanding of these activities as they relate to the twenty-first century. Jacket Masterworks of Technology E. E. Lewis, 2010-05 In this absorbing exploration of technological creativity throughout the ages, E. E. Lewis, professor of mechanical engineering at Northwestern University, eloquently tells the story of how science and engineering, which had little in common until a few hundred years ago, came together to create the technological world of the 21st century. Today's technology is the product of a fascinating synergy of science's search for comprehension of the material universe and engineering's drive to build things and make them work. In the 20th century, this synergy achieved many unprecedented successes, the most spectacular of which is arguably the first moon landing of the Apollo program. Rocket science, now symbolic of humanity's most complex technological endeavors, is the culmination of centuries of achievements by architects of pyramids and cathedrals, medieval craft guilds, and pioneering inventors and scientists from the Renaissance through the Industrial Revolution. Melding his own personal experiences from visiting Chartres Cathedral to flying aboard a Boeing 777, with vivid historical vignettes, the author skillfully demonstrates the importance of craft tradition, scientific method, production organization, economics, and more to the creation of modern technology. The many topics that Lewis illuminates include the slow evolution of the wheelwright's craft, the background and training of the architect-engineers who undertook the construction of medieval cathedrals, the importance of patronage and venture capitalists in realizing the big ideas of past and present, the increasing use of visualization as seen in Leonardo's notebooks, Galileo's immense contribution of bringing science and engineering together, the increasing importance of basic science as the seedbed of engineering and design innovations, the challenge of attempting unprecedented feats while minimizing risk, as exemplified by space flight and much

more Whether Lewis is discussing the distribution of weight along flying buttresses the challenges faced by Morse in engineering the telegraph or the Apollo program s monumental team effort the author s deep knowledge of and enthusiasm for his subject and his gift for engaging lively prose make for a fascinating exploration of science and engineering through the ages E E Lewis Evanston IL the former chair of the Department of Mechanical Engineering is professor of mechanical engineering at the McCormick School of Engineering and Applied Science at Northwestern University He is the author of three engineering textbooks and numerous journal articles

“All-Electric” Narratives Rachele Dini, 2021-10-07 Winner of the 2023 Emily Toth Award for Best Single Work in Women's Studies All Electric Narratives is the first in depth study of time saving electrical appliances in American literature It examines the literary depiction of refrigerators vacuum cleaners oven ranges washing machines dryers dishwashers toasters blenders standing and hand held mixers and microwave ovens between 1945 when the all electric home came to be associated with the nation's hard won victory and 2020 as contemporary writers consider the enduring material and spiritual effects of these objects in the 21st century The appropriation and subversion of the rhetoric of domestic electrification and time saving comprises a crucial but overlooked element in 20th century literary forms and genres including Beat literature Black American literature second wave feminist fiction science fiction and postmodernist fiction Through close readings of dozens of literary texts alongside print and television ads from this period Dini shows how U S writers have unearthed the paradoxes inherent to claims of appliances capacity to give back time to their user transport them into a technologically

progressive future or return them to some pastoral past In so doing she reveals literary appliances role in raising questions about gender norms and sexuality racial exclusion and erasure class anxieties the ramifications of mechanization the perils and possibilities of conformity the limitations of patriotism and the inevitable fallacy of utopian thinking while both shaping and radically disrupting the literary forms in which they operated **Disrupting Copyright** Margery Hilko,2021-02-09 New innovations are created every day but today s business leaders are focused on finding disruptive innovations which are cheaper and lower performing than upmarket technologies They create new markets and challenge the status quo of existing technological thinking creating uncertainty both in the future of the innovation and the outcome of the market upheaval Disruptive innovation is an influential innovation theory in business but how does it affect the law Several of these technologies have brought new ways for individuals to deal with copyright works while disrupting existing market expectations while their ability to spawn social norms has presented challenges for legislation Considering disruptive innovation as a class this book examines innovations that have impacted copyright in the past what lessons can be learned from how the law interacted with them and how the law can successfully deal with them going forward Creating comprehensive guidance that can be used when faced with disruptive innovations with the aim of more successful legislation it considers whether copyright law itself has been disrupted through these innovations Exploring whether disruptive innovations as a class have unique properties that necessitate action by legislators and whether these properties have the possibility to disrupt the law itself this book theorises how the law should deal with disruptive innovations in general going beyond a discussion of the regulation of specific innovations to develop a framework for how law makers should deal with disruptive innovations when faced by one **Radiotelegraph & Radiotelephone Codes, Prowords and Abbreviations** John W Alcorn VK2JWA,2013-10-26 What started out as a minor Project in 1987 blew out like the national debt so with all this accumulated info it seemed worthwhile to produce the first book here now is the Latest Online Edition The sources and references have been many and varied and although the utmost care was taken the Lists are far from complete and may contain errors The original Codes etc were designed principally for marine use as this was the field in which radio was initially developed The majority retain this influence but many have been modified and modernized to cover land and air applications Technical terms have also varied as technology has changed however most abbreviations of the computer age have been omitted These are specialist terms of that mode not often encountered in telegraphy **A Phone of Our Own** Harry G. Lang,2000 Lang a professor for the National Technical Institute for the Deaf tells about how three enterprising deaf men Robert Weitbrecht James Marsters and Andrew Saks fought telephone monopolies and bureaucracies and overcame technical difficulties to develop a phone deaf people can use one that converts sounds into text Photos
